최신 Salesforce Consultant Analytics-Con-201 무료샘플문제 (Q10-Q15):

질문 # 10

ACRM Analytics consultant is reviewing results from an Einstein Discovery story with a business user. They agree with the findings but notice that none of the fields used in the story have a correlation value greater than 4%. The client is now concerned that the model may not be good enough to deploy. Which action should the consultant take?

- A. A Identify additional data that may have a stronger relationship with the outcome variable.
- B. Use the appropriate algorithm and update the model.
- C. Edit the model accuracy settings and rerun it to evaluate the correlation.

정답: A

질문 # 11

Universal Containers builds a new sales dashboard and wants to make sure account managers can access the dashboard while traveling.

What should the consultant consider doing in this process?

- A. Enable mobile optimization in the analytics settings under Setup.
- B. Make sure the dashboard automatically is optimized for mobile viewing.
- C. A Set the optimal Dashboard width for the Phone layout to get a more accurate preview.

정답: C

질문 # 12

CRM Analytics users at Cloud Kicks are granted access to an app with specific dashboards. When trying to download a specific widget, they are unable to do so.

- A. The dashboard has been created for internal use and the users have a view only license.
- B. The permission set for the users is missing the download data permission.
- C. The users have access to the dashboard but not the dataset.

정답: B

질문 # 13

A versioning feature allows CRM Analytics users to be added as Publishers and make changes separately while a 'Live' version is still being used by other users. Once the changes are complete, the user can then set their updated version as the Live version. Which CRM Analytics item is this leveraged for?

- A. goats
- B. Dataset
- C. App

정답: C

설명:

In CRM Analytics, the versioning feature described is typically leveraged for Apps. This feature allows:

- * Parallel Development: Users can work on changes in a separate version without affecting the live version being accessed by others.
- * Controlled Publishing: Once changes are finalized, the user can then promote their version to be the new live version, ensuring seamless updates without disrupting ongoing usage.
- * Collaborative Workflows: Facilitates teamwork by allowing multiple users to propose and test changes in a controlled environment before making those changes live.

This approach ensures that CRM Analytics apps remain dynamic and can evolve over time while maintaining stability and continuity for end-users.

질문 # 14

A CRM Analytics consultant is asked to make sure the new sales performance dashboard is accessible in the mobile app. They have created multiple mobile layouts for the same dashboard.

How is CRM Analytics expected to perform?

- A. If more than one layout is eligible, the one with the most widgets is used.
- B. If more than one layout is eligible, the one with the most global filters is used.
- C. If more than one layout is eligible, the one with the most device properties set is used.

정답: C
