질문 # 18

During quality inspection, which of the following QM business processes can require a user's digital signature? Note: There are 3 correct answers to this question.

- A. Defect recording in inspection lot
- B. Recording the usage decision for an inspection lot
- C. Valuation of an inspection result
- D. Manual confirmation of a physical sample drawing
- E. Assignment of inspection specification

정답: B,C,D

설명:

Digital signatures in SAP S/4HANA QM (configured via SPRO > Cross-Application Components > Digital Signature) ensure auditability and compliance in critical processes:

* Recording the Usage Decision for an Inspection Lot (B): The usage decision (transaction QA11) can require a digital signature to confirm stock disposition, a common regulatory requirement (e.g., in pharmaceuticals).

* Valuation of an Inspection Result (C): Valuating results (e.g., accept/reject in QE51N) can mandate a signature, especially for critical characteristics, as set in the MIC or inspection type settings.

* Manual Confirmation of a Physical Sample Drawing (D): Confirming sample drawing (transaction QPR2) can require a signature to validate the physical process, configurable in sample management.

* Assignment of Inspection Specification (A): Assigning specs (e.g., in QP01) is a planning step, not typically requiring a signature.

* Defect Recording in Inspection Lot (E): Defect entry (e.g., QF01) may trigger notifications but doesn't standardly require a signature unless custom-configured.

Thus, "B, C, D" are the correct answers. References: SAP Help Portal - "Digital Signatures in QM"; SAP S/4HANA QM Customizing Guide - "Signature Strategy".

- D. Quality Technician Overview

정답: B,D

설명:

SAP Fiori apps in QM support usage decisions (UD):

* Manage Usage Decisions (A): App ID F2171 is specifically designed for recording and managing usage decisions for inspection lots, a direct tool for this task.

* Quality Technician Overview (B): App ID F2173 provides an overview and includes options to perform UD, supporting technicians in lot processing.

* Quality Engineer Overview (C): App ID F2174 focuses on analytics and planning, not direct UD execution.

* Manage Quality Level (D): App ID F2172 manages quality levels (e.g., skip lots), not UD itself.

Thus, "Manage Usage Decisions" and "Quality Technician Overview" are the correct answers. References:
