Free PDF Quiz 2026 Perfect PL-300: Reliable Microsoft Power BI Data Analyst Exam Papers

Compared with other education platform on the market, BraindumpsIT is more reliable and highly efficiently. It provide candidates who want to pass the PL-300 exam with high pass rate study materials, all customers have passed the exam in their first attempt. They all need 20-30 hours to learn on our website can pass the exam. PL-300 Exam Dump is really a high efficiently exam tool that can help you save much time and energy to do other things.

Microsoft Power BI Data Analyst Sample Questions (Q469-Q474):

NEW QUESTION # 469

You create a data model in Power BI.

Report developers and users provide feedback that the data model is too complex.

The model contains the following tables.

The model has the following relationships:

*There is a one-to-one relationship between Sales_Region and Region_Manager.

*There are more records in Manager than in Region_Manager, but every record in Region_Manager has a corresponding record in Manager.

*There are more records in Sales_Manager than in Sales_Region, but every record in Sales_Region has a corresponding record in Sales_Manager.

You need to denormalize the model into a single table. Only managers who are associated to a sales region must be included in the reports.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:

Explanation:

Explanation:

- 1.Merge [Region_Manager] and [Manager] by using an inner join.
- 3.Merge [Sales_Region] and [Sales_Manager] by using an inner join.
- 6.Merge [Sales_Region] and [Region_Manager] by using an inner join.

NEW QUESTION # 470

You have the Power BI data model shown in the following exhibit.

You create two row-level security (RLS) roles named Manager and CFO.

You plan to publish the dataset to the Power BI service.

You need to create DAX expressions for the RLS filters. The solution must meet the following requirements:

- * Each manager must see only the data in the Sales and Human Resources tables for their own country.
- * The CFO must be prevented from seeing the data in the Human Resources table.
- * The CFO must see the sales data of all countries.

How should you complete the DAX expressions to meet the requirements? To answer, drag the appropriate expressions to the correct targets. Each expression may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The Country table contains the following data.

You plan to publish the dataset to the Power BI service.

You need to create DAX expressions for the RLS filters. The solution must meet the following requirements:

- * Each manager must see only the data in the Sales and Human Resources tables for their own country.
- * The CFO must be prevented from seeing the data in the Human Resources table.
- * The CFO must see the sales data of all countries.

How should you complete the DAX expressions to meet the requirements? To answer, drag the appropriate expressions to the correct targets. Each expression may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 471

You have two tables named Customers and Invoice in a Power BI model. The Customers table contains the following fields:

- * CustomerID
- * Customer City
- * Customer State
- * Customer Name
- * Customer Address 1
- * Customer Address 2
- * Customer Postal Code

The Invoice table contains the following fields:

- * Order ID
- * Invoice ID
- * Invoice Date
- * Customer ID
- * Total Amount
- * Total Item Count

The Customers table is related to the Invoice table through the Customer ID columns. A customer can have many invoices within one month.

The Power BI model must provide the following information:

- * The number of customers invoiced in each state last month
- * The average invoice amount per customer in each postal code

You need to define the relationship from the Customers table to the Invoice table. The solution must optimize query performance.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

□ Box 1: One-to-many

A customer can have many invoices within one month.

□ Box 2: Single

For One-to-many relationships, the cross filter direction is always from the "one" side, and optionally from the "many" side (bi-directional). For

Single cross filter direction means "single direction", and Both means "both directions". A relationship that filters in both directions is commonly described as bi-directional.

NEW QUESTION # 472

You are creating a Power BI model to analyze inventory.

You load data into three tables named Date, Product, and Inventory. The Inventory table relates to the Date and Product tables by using one-to-many relationships.

Inventory data is recorded daily with no exceptions. The correct inventory quantity for a given product in a month is the last recorded value for that month. You need to write a DAX measure that will show the correct inventory value when a user analyzes inventory by year, month, or date.

How should you complete the measure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□ Explanation

□

NEW QUESTION # 473

You build a report about warehouse inventory data.

a. The dataset has more than 10 million product records from 200 warehouses worldwide. You have a table named Products that contains the columns shown in the following table.

□ Warehouse managers report that it is difficult to use the report because the report uses only the product name in tables and visuals. The product name is contained within the ProductDescription column and is always the fourth value.

You need to modify the report to support the warehouse managers' requirement to explore inventory levels at different levels of the product hierarchy. The solution must minimize the model size.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

Answer:

Explanation:

□ 1 - Add a column named ProductName that contains only the text between...

□ 2 - Create a product hierarchy of ProductCategory,...

□ 3 - Replace the use of ProductDescription in the report with the product hierarchy.

NEW QUESTION # 474

.....

The Microsoft PL-300 certification exam offers a great opportunity for professionals to demonstrate their expertise and knowledge level. In return, they can become competitive and updated with the latest technologies and trends. To do this they just need to enroll in Microsoft PL-300 Certification Exam and have to put all efforts and resources to pass this challenging PL-300 exam.

Valid Exam PL-300 Preparation: https://www.braindumpsit.com/PL-300_real-exam.html

Sometimes we need to prepare ourselves for other challenges, like an PL-300 exam in life in order to live a better life, BraindumpsIT is the top-rated and leading platform that offers the best Microsoft Power BI Data Analyst, PL-300 exam study material, As far as the standard of PL-300 real questions is concerned, the PL-300 Microsoft Power BI Data Analyst actual questions are designed and verified by qualified Microsoft PL-300 exam trainers, Microsoft Reliable PL-300 Exam Papers The questions are very complex and answering takes time.

There's also an in depth review of many of the key gig economy studies, PL-300 This chapter talks about the Views user interface, shows how each function works, and explains how to create displays.
