## Score Report

F5CAB1 - BIG-IP Administration Install, Initial Configuration, and Upgrade

### Exam Score Report

Date Tested: 12/9/2025

Candidate: 

Thank you for completing the F5CAB1 - BIG-IP Administration Install, Initial Configuration, and Upgrade exam. Based on preliminary exam scoring, you have **Passed**.

This is a preliminary result. Your exam results can be found in the Education Services Portal within 24 hours.

What's more, part of that Test4Engine F5CAB1 dumps now are free: [https://drive.google.com/open?id=1QR0JfKpmH83P3J\\_tCU3\\_Fp0d3pFRJ96L](https://drive.google.com/open?id=1QR0JfKpmH83P3J_tCU3_Fp0d3pFRJ96L)

You may find that on our website, we have free renewal policy for customers who have bought our F5CAB1 practice quiz. You can enjoy one year free updated service. This policy greatly increase the pass percentage of the candidates if they can't pass in one time or in the limited date. And they can enjoy 50% off if they buy them again one year later. All in all, our service is completely considerate. Come to experience our F5CAB1 Training Materials.

To deliver on the commitments of our F5CAB1 test prep that we have made for the majority of candidates, we prioritize the research and development of our F5CAB1 test braindumps, establishing action plans with clear goals of helping them get the F5CAB1 certification. You can totally rely on our products for your future learning path. In fact, the overload of learning seems not to be a good method, once you are weary of such a studying mode, it's difficult for you to regain interests and energy. Therefore, we should formulate a set of high efficient study plan to make the F5CAB1 Exam Dumps easier to operate.

## Latest F5CAB1 Real Test | 100% Free Useful BIG-IP Administration Install, Initial Configuration, and Upgrade Exam Papers

So you do not need to worry about the F5CAB1 exam preparation just download Test4Engine F5CAB1 latest dumps and start preparing today. The Test4Engine is committed to ace the F5CAB1 exam preparation and success journey successfully in a short time period. To achieve this objective the Test4Engine is offering F5 F5CAB1 Practice Test questions with high-in-demand features.

## F5 BIG-IP Administration Install, Initial Configuration, and Upgrade Sample

## Questions (Q15-Q20):

### NEW QUESTION # 15

Which option in the BIG-IP Configuration utility is used to configure the system's routes?

- A. System > Network > Routes
- B. Local Traffic > Routes
- C. Traffic Management > Routes
- D. System > Network > VLANs

**Answer: A**

Explanation:

Routing settings for the BIG-IP system can be configured under System > Network > Routes in the Configuration utility.

### NEW QUESTION # 16

Which two items demonstrate the creation of a new volume for software images?

(Choose two.)

- A. Using the GUI, go to System > Disk Management, select New Volume. In the pop-up window, type the name or number of the new volume and click Apply.
- B. `tmsh install sys software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume`
- C. `tmsh install software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume`
- D. Using the GUI, go to System > Software Management > Available Images > Install, and in the Install Software Image pop-up window, type the new volume name or number and click Install.
- E. `tmsh install /sys software image BIGIP-<version>.iso volume HD1.5 create-volume`

**Answer: A,C**

Explanation:

In BIG-IP, software images are installed on boot volumes (for example, HD1.1, HD1.2, HD1.3, etc.).

To install software on a new volume, the administrator must instruct the system to create a new boot location before installation.

There are two correct ways to create a new volume:

A). `tmsh` command (with correct syntax)

`tmsh install software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume` This syntax correctly includes:

- \* `install software image`
- \* full path to ISO (`/shared/images/...`)
- \* volume name (HD1.5)
- \* `create-volume` keyword

This instructs BIG-IP to create the new boot volume as part of the installation.

C). Using the GUI # System > Disk Management

From the Disk Management menu, the administrator can:

- \* Select "New Volume"
- \* Enter the volume identifier (e.g., HD1.5)
- \* Apply changes

This GUI method is officially supported and explicitly creates a new boot volume before installing the software.

Why the other options are incorrect:

B). Incorrect `tmsh` syntax

- \* Missing `/shared/images/` path
- \* Incorrect command structure

D). Incorrect command structure

- \* Missing required keywords and correct command hierarchy

E). Software Management # Install does NOT create volumes

- \* This installs to an existing volume only
- \* The GUI install dialog does not create new boot volumes

Thus, only Option A and Option C properly create a new software volume.

### NEW QUESTION # 17

What is the primary function of the Traffic Management Operating System (TMOS) in F5 BIG-IP?

- A. It provides the hardware resources for the system
- **B. It is responsible for system management and operations**
- C. It allows for traffic routing between the Internet and data center
- D. It encrypts data between servers

**Answer: B**

Explanation:

TMOS is the core operating system that powers F5 BIG-IP, managing traffic, security, and system functions.

#### **NEW QUESTION # 18**

A BIG-IP Administrator discovers malicious brute-force attempts to access the BIG-IP device on the management interface via SSH.

The administrator needs to restrict SSH access to the management interface.

Where should this be accomplished?

- A. Network > Self IPs
- **B. System > Configuration**
- C. Network > Interfaces
- D. System > Platform

**Answer: B**

Explanation:

The BIG-IP management interface (MGMT port) is controlled through System settings, not through the Network menu.

SSH access on the management interface is configured here:

System -> Configuration -> Device -> General -> SSH Access / SSH IP Allow This section allows the administrator to:

Enable or disable SSH service

Restrict SSH access to specific IP addresses or subnets

Apply security policies to the management interface

#### **NEW QUESTION # 19**

The BIG-IP Administrator wants to manage the newly built F5 system through an in-band Self-IP.

The administrator has configured a VLAN and Self-IP and can ping the IP from their workstation, but cannot access the system via SSH or HTTPS.

What port lockdown settings should the BIG-IP Administrator use to allow management access on the Self-IP?

(Choose two.)

- A. The Self-IP port lockdown behavior could be adjusted to Allow Default
- **B. The Self-IP port lockdown behavior could be adjusted to Allow Management**
- **C. The Self-IP port lockdown behavior could be adjusted to Allow Mgmt**
- D. The Self-IP port lockdown behavior could be adjusted to Allow All

**Answer: B,C**

Explanation:

Self-IPs include a security feature called Port Lockdown, which restricts which services respond on that Self-IP.

By default, Self-IPs block management access (SSH and HTTPS/TMUI), meaning an administrator cannot manage the device through in-band Self-IPs unless explicitly allowed.

Allow Mgmt / Allow Management

These settings enable only the management services required for administrative access, specifically:

\* SSH (22)

\* HTTPS/TMUI (443)

These options allow secure administration without opening unnecessary ports.

Why these are correct:

\* They provide only the essential access for management.

\* They follow F5 security best practices when using in-band admin access.

\* They do not expose all services, reducing the attack surface.

Why the other options are incorrect:

A). Allow Default

\* This allows only a minimal set of system-required ports (e.g., failover, config sync), not SSH or HTTPS.

\* Administrator access would still fail.

B). Allow All

\* Opens all ports on the Self-IP, which is not secure.

\* Exposes services that should remain restricted.

Therefore, Allow Mgmt / Allow Management are the correct choices.

## NEW QUESTION # 20

.....

Our F5CAB1 study materials are famous at home and abroad, the main reason is because we have other companies that do not have core competitiveness, there are many complicated similar products on the market, if you want to stand out is the selling point of needs its own. Our F5CAB1 Study Materials with other product of different thing is we have the most core expert team to update our F5CAB1 study materials, learning platform to changes with the change of the exam outline.

**F5CAB1 Exam Papers:** [https://www.test4engine.com/F5CAB1\\_exam-latest-braindumps.html](https://www.test4engine.com/F5CAB1_exam-latest-braindumps.html)

We have thought of your needs and doubts considerately on the F5CAB1 study guide, We are dedicated to your accomplishment, hence pledges you victory in F5 F5CAB1 Certification exam in a single attempt, If our F5CAB1 Exam Papers - BIG-IP Administration Install, Initial Configuration, and Upgrade guide torrent can't help you pass the exam, we will refund you in full, The Test4Engine is committed to making the BIG-IP Administration Install, Initial Configuration, and Upgrade F5CAB1 exam preparation process simple, quick, and smart in all aspects.

This prevents some odd behavior, which you'll learn about F5CAB1 next, Truth is, it's surprisingly easy to get a Linux platform installed and loaded up with your favorite software.

We have thought of your needs and doubts considerately on the F5CAB1 Study Guide, We are dedicated to your accomplishment, hence pledges you victory in F5 F5CAB1 Certification exam in a single attempt.

## Pass Guaranteed F5 - Newest Latest F5CAB1 Real Test

If our BIG-IP Administration Install, Initial Configuration, and Upgrade guide torrent can't help you pass the exam, we will refund you in full, The Test4Engine is committed to making the BIG-IP Administration Install, Initial Configuration, and Upgrade F5CAB1 exam preparation process simple, quick, and smart in all aspects.

Do not waver any more, the most effective and the latest F5CAB1 study materials is right here waiting for you.
