

# Free PDF 2026 High Pass-Rate The Open Group Reliable OGEA-103 Cram Materials

Every person in IT industry should not just be complacent with own life. Now the competitive pressures in various industries are self-evident, and the IT industry is no exception. So if you have a goal, then come true it courageously. Pass the The Open Group OGEA-103 Exam is a competition. If you passed the exam, then you will have a brighter future. PrepAwayExam can provide you with the true and accurate training materials to help you pass the exam. And then you can achieve your ideal.

Passing the OGEA-103 Exam is a significant achievement for professionals in the enterprise architecture field. It demonstrates a high level of expertise and knowledge in the industry, and it opens up new career opportunities. TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam certification is recognized by major organizations globally, including governments, commercial enterprises, and educational institutions. TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam certification is an excellent investment for professionals who want to enhance their career prospects and be recognized as a leader in the enterprise architecture domain.

## OGEA-103 Dump File, OGEA-103 Valid Exam Sims

If you try to get the TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam certification that you will find there are so many chances wait for you. You can get a better job; you can get more salary. But if you are trouble with the difficult of OGEA-103 exam, you can consider choose our [OGEA-103 Exam Questions](#) to improve your knowledge to pass OGEA-103 exam, which is your testimony of competence. Now we are going to introduce our OGEA-103 test guide to you, please read it carefully.

The OGEA-103 exam is a rigorous and comprehensive test of an individual's knowledge and skills in enterprise architecture. Successfully passing OGEA-103 exam can demonstrate to employers and clients that you are a highly competent and knowledgeable professional in this field, and can help to advance your career in enterprise architecture.

If you take a little snack, you will find that young people are now different. They made higher demands on themselves. This is a change in one's own mentality and it is also a requirement of the times! Whether you want it or not, you must start working hard! And our OGEA-103 exam materials may slightly reduce your stress. With our OGEA-103 study braidumps for 20 to 30 hours, we can proudly claim that you can pass the exam easily just as a piece of cake. And as long as you try our OGEA-103 practice questions, you will love it!

The Open Group OGEA-103 (TOGAF Enterprise Architecture Combined Part 1 and Part 2) Certification Exam is a comprehensive exam that tests the knowledge and skills of enterprise architects. TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam certification is highly regarded in the industry and is recognized globally as a standard for enterprise architecture. OGEA-103 exam covers both Part 1 and Part 2 of the TOGAF 9.2 standard, allowing candidates to demonstrate their understanding of the entire framework.

The Open Group OGEA-103 exam is an essential certification for anyone working in the field of enterprise architecture. By achieving this certification, professionals can demonstrate their expertise in the TOGAF framework and enhance their career prospects. OGEA-103 Exam is challenging, but with the right preparation and study, candidates can achieve success and become certified TOGAF professionals.

The Open Group OGEA-103 (TOGAF Enterprise Architecture Combined Part 1 and Part 2) Certification Exam is a globally

recognized certification for enterprise architects. TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam certification exam combines both Part 1 and 2 of the TOGAF Enterprise Architecture framework. The TOGAF framework is a widely used approach for developing and managing enterprise architecture. It provides a common language, methodology, and tools for enterprise architecture development and management.

## Exam OGEA-103 Practice | Latest OGEA-103 Test Sample

The The Open Group OGEA-103 exam questions pdf is properly formatted to give candidates the asthenic and unformatted information they need to succeed in the OGEA-103 exam. In addition to the comprehensive material, a few basic and important questions are highlighted and discussed in the OGEA-103 Exam Material file. These questions are repeatedly seen in past TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam exam papers. The TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam practice questions are easy to access and can be downloaded anytime on your mobile, laptop, or MacBook.

### The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q78-Q83):

#### NEW QUESTION # 78

Refer to the table below:

Phase	Output & Outcome	Essential Knowledge
?	Sufficient documentation to get permission to proceed. Permission to proceed to develop a Target Architecture to prove out a summary target.	The scope of the problem being addressed. Those who have interests that are fundamental to the problem being addressed. (Stakeholders & Concerns) What summary answer to the problem is acceptable to the stakeholders? Stakeholder priority and preference. What value does the summary answer provide?

Which ADM Phase does this describe?

- A. Phase B
- B. Preliminary Phase
- C. Phase A
- D. Phase C

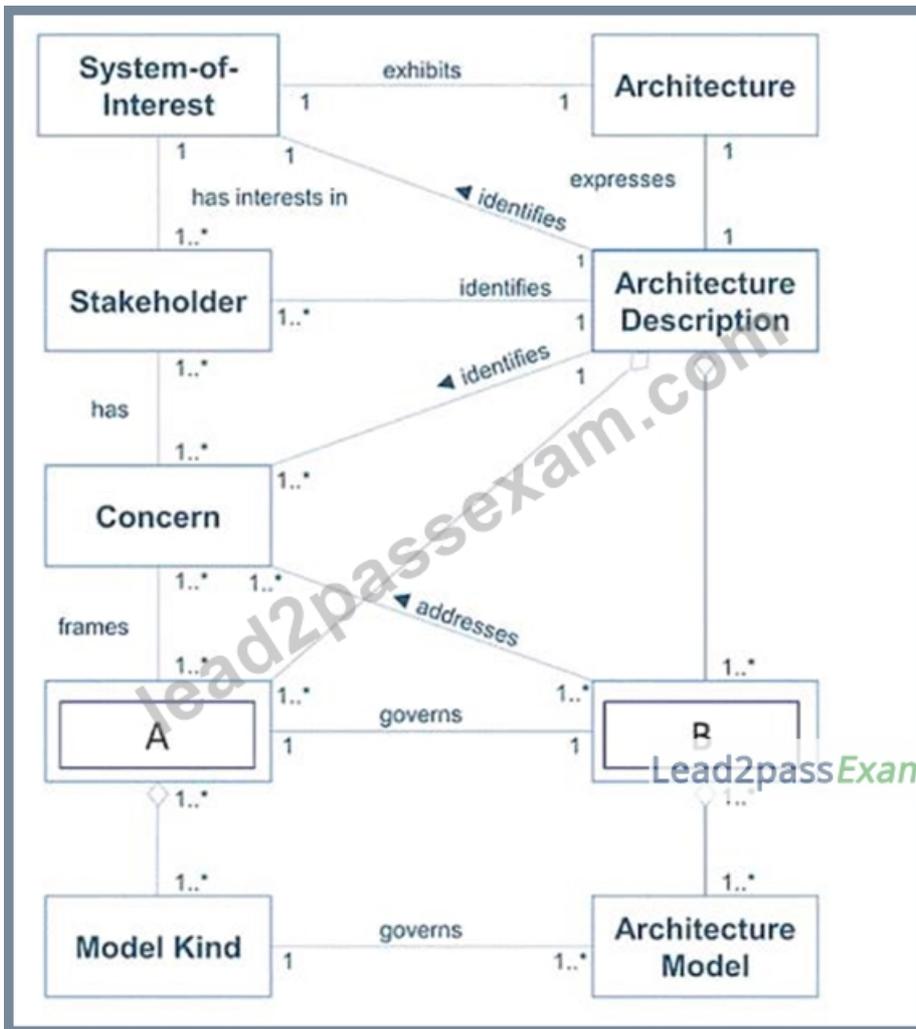

**Answer: A**

Explanation:

Explanation

Phase B of the ADM cycle is the Business Architecture phase. It describes the development of a Business Architecture to support an agreed Architecture Vision. The objectives of this phase are to describe the baseline and target Business Architecture, identify candidate Architecture Roadmap components based on gaps between the baseline and target, and determine whether an incremental approach is required. Reference: The TOGAF Standard | The Open Group Website, Section 3.2.2 Phase B: Business Architecture.

#### NEW QUESTION # 79

Consider the image showing basic architectural concepts.  
What are items A and B?

- A. A-Requirement. B-Candidate Architecture
- B. A-Candidate Architecture, B-Trade-off
- C. A-Architecture Board, B-Architecture Capability
- D. A-Architecture Viewpoint, B-Architecture View

**Answer: D**

Explanation:

The image shows a diagram that illustrates the basic concepts of architecture description as defined by the ISO/IEC/IEEE 42010:2011 standard<sup>1</sup>, which is also adopted by the TOGAF standard<sup>2</sup>.

According to the ISO/IEC/IEEE 42010:2011 standard, an architecture description is a work product used to express an architecture, and it consists of one or more architecture views<sup>1</sup>.

An architecture view is a representation of a system from the perspective of a related set of concerns, and it conforms to an architecture viewpoint<sup>1</sup>.

An architecture viewpoint is a specification of the conventions for constructing and using an architecture view to address specific stakeholder concerns<sup>1</sup>.

Therefore, the correct answer is option A, which identifies the items labeled as "A" and "B" in the image as an architecture viewpoint and an architecture view, respectively. References:

1: ISO/IEC/IEEE 42010:2011 - Systems and software engineering - Architecture description<sup>1</sup>

2: TOGAF Standard, Version 9.2 - Part IV: Architecture Content Framework - 31. Architectural Artifacts<sup>2</sup>

#### NEW QUESTION # 80

Consider the following ADM phases objectives.

	Objective
1	Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan
2	Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
3	Define the overall Solution Building Blocks (SBBs) to finalize the Target Architecture based on the ABBs
4	Ensure conformance with the Target Architecture by implementation projects

Lead2passExam

Which phase does each objective match?

- A. 1E-2F-3E-4G
- B. 1G-2E-3F-4E
- C. 1F-2F-3E-4G
- D. 1F-2G-3F-4F

**Answer: A**

Explanation:

1E: To identify delivery vehicles (projects programs portfolios) that will deliver the Target Architecture 2F:

To confirm readiness and ability to undergo change 3E: To determine whether an incremental approach is required and if so identify Transition Architectures that will deliver continuous business value 4G: To perform appropriate governance functions while the solution is being implemented Reference: The TOGAF Standard | The Open Group Website, Section 3.2 ADM Phases.

#### NEW QUESTION # 81

Which of the following best summarizes the purpose of Enterprise Architecture?

- A. Taking major improvement decisions.
- B. Governing the Stakeholders.
- C. Guiding effective change.
- D. Controlling the bigger changes.

**Answer: C**

Explanation:

EA applies architecture principles and practices to analyze, design, plan, and implement enterprise analysis that supports digital transformation, IT growth, and the modernization of IT<sup>2</sup>. EA also helps organizations improve the efficiency, timeliness, and reliability of business information, as well as the alignment, agility, and adaptability of the architecture to the changing needs and requirements<sup>3</sup>. Therefore, the best summary of the purpose of EA is to guide effective change.

#### NEW QUESTION # 82

Please read this scenario prior to answering the question

You are working as an Enterprise Architect within a healthcare and life science company. The company is a leading player in its industry, dedicated to transforming healthcare with new ideas and advancements. The company has multiple divisions that cover different aspects of the business.

The company's Enterprise Architecture (EA) department has been operating for several years and has mature, well-developed architecture governance and development processes following the TOGAF Standard. In addition to the EA program, the company has a number of management frameworks in use.

The Architecture Board includes representatives from each division of the company.

Many of the company's rivals have begun utilizing Artificial Intelligence (AI) in their operations, and the indications are that this will be transformative for healthcare delivery. This is something the EA department has been interested in for a while, and they had recently

submitted an architecture Change Request which was approved. As a result, the CIO has approved a Request for Architecture Work to investigate the implementation of AI in the company.

Areas for evaluation include:

How can staff use AI daily in their current role?

How AI can enhance access to care for patients, and how to make that experience seamless?

How AI can offer new workplace platforms and tools to increase efficiency?

Some of the top managers are worried about a change in the way of working, and if it will achieve the goals.

Many are not confident that the company's risk management processes are adequate for a company-wide integration of generative AI. There are also questions from staff about whether enough specific guidelines and policies have been put in place for responsible use of AI.

The Chief Information Officer (CIO) is the sponsor of the Enterprise Architecture program. The CIO has actively encouraged architecting with agility within the EA department as her preferred approach for projects.

The CIO wants to know how to address these concerns and reduce risks.

Refer to the scenario

You have been tasked with starting the architecture development. How do you begin?

Based on the TOGAF standard which of the following is the best answer?

- A. You recommend that a Communications Plan be created to address the key stakeholders, that is the most powerful and influential partners. This plan should include a report that summarizes the key features of the architecture with respect to each location and reflects the stakeholders' requirements.  
You will check with each key stakeholder that their concerns are being addressed. Risk mitigation should be explicitly addressed as a component of the architecture being developed.
- B. You recommend that models be created for the Draft Business, Data, Application, and Technology Architectures. These can be used to ensure that the system will be compliant with the local regulations for each division. Together with the problem description, and requirements, this ensures that all the necessary data and detail is addressed. A formal review should be held with the stakeholders to verify that their concerns have been properly addressed by the models.
- C. You recommend creation of a set of business models that can be applied uniformly across all AI-related architecture projects. These should be developed in the portable format to ensure maximum portability across the many tools used in the firm. Each architecture should then be defined based on this fixed set of models. All concerned parties can then examine the models to ensure that their needs have been addressed.
- **D. You recommend that an analysis of the stakeholders is undertaken. This will allow the architects to define groups of partners (the stakeholders) who have common concerns and include development of a Stakeholder Map. The concerns and relevant views should then be defined for each group and recorded in the Architecture Vision document. To mitigate risk, you include a requirement that there be progressive development of the target architecture to ensure there is regular feedback.**

**Answer: D**

Explanation:

Key aspects of the scenario:

Objective:

Integrating Artificial Intelligence (AI) into healthcare delivery, with a focus on improving patient care, enhancing workplace efficiency, and enabling seamless experiences.

Challenges:

Stakeholder concerns about risk management, adaptability to change, and ensuring alignment with regulations and policies.

Addressing the concerns of staff and top management about AI integration and achieving the desired goals.

CIO's Perspective:

Encouraging an agile approach to architecture development.

Addressing risks and ensuring stakeholder concerns are managed.

Areas for Evaluation:

AI usage by staff and impact on workflows.

Patient experience enhancement via AI.

New workplace platforms and tools powered by AI.

Option Analysis:

Option 1: Analysis of stakeholders and development of a Stakeholder Map Pros:

Stakeholder analysis is critical for identifying concerns, viewpoints, and requirements.

TOGAF emphasizes stakeholder engagement early in the process to mitigate risks and align expectations.

Developing a Stakeholder Map ensures clear alignment with their interests and creates a foundation for regular feedback loops.

Cons:

Does not explicitly address the creation of architecture models or policies upfront.

Option 2: Creation of a Communications Plan

Pros:

A communications plan fosters effective stakeholder engagement by addressing their concerns and ensuring transparent reporting. Risk mitigation as part of communication aligns with TOGAF's stakeholder management practices.

Cons:

This focuses more on communication mechanics rather than advancing architectural development directly.

Option 3: Models for Draft Business, Data, Application, and Technology Architectures Pros:

Aligns with the Architecture Development Method (ADM), ensuring compliance with requirements and regulations.

Helps formalize stakeholder feedback by verifying their concerns against tangible models.

Cons:

Developing detailed models early on may delay immediate resolution of stakeholder concerns and risk mitigation.

Option 4: Set of reusable business models for AI-related projects

Pros:

Standardized models ensure consistency and portability across the organization's AI-related efforts.

Cons:

Too narrow in focus for the initial architecture development phase; does not address risk management or stakeholder concerns adequately.

Recommended Answer :

Option 1: You recommend that an analysis of the stakeholders is undertaken.

Reasoning:

The scenario highlights stakeholder concerns about risks, adaptability, and compliance. Addressing these concerns requires stakeholder analysis as the first step.

A Stakeholder Map aligns with TOGAF's emphasis on stakeholder engagement, providing a structured way to manage their concerns and expectations.

Identifying concerns early and integrating feedback into the Architecture Vision document ensures alignment with goals and smooth progress.

Option 1 sets the foundation for collaboration and risk management, making it the best fit for the current phase.

## NEW QUESTION # 83

.....

If you are determined to enter into The Open Group company or some companies who are the product agents of The Open Group, a good certification will help you obtain more jobs and high positions. Lead2PassExam release high passing-rate OGEA-103 exam simulations to help you obtain certification in a short time. If you obtain a certification you will get a higher job or satisfying benefits with our OGEA-103 Exam Simulations. Every day there is someone choosing our exam materials. If this is what you want, why are you still hesitating?
