

Data-Cloud-Consultant Latest Test Sample, Pass Leader Data-Cloud-Consultant Dumps

Salesforce Data Cloud Consultant Dumps – Your Key to Success!

Introduction

The **Salesforce Data Cloud Consultant** exam validates your expertise in implementing and managing Salesforce Data Cloud solutions. If you're aiming for this certification, **Certifiedumps** offers the best resources to help you succeed!

Why Choose Salesforce Data Cloud Consultant Certification?

Earning this certification showcases your knowledge of:
✓ Data ingestion, modeling, and transformation
✓ Identity resolution and segmentation
✓ Activation and governance in Data Cloud
✓ Salesforce ecosystem integration

Get the Best Salesforce Data Cloud Consultant Dumps

At **Certifiedumps**, we provide:
Latest and verified **Salesforce Data Cloud Consultant dumps**
Real exam-like questions and answers

What's more, part of that DumpStillValid Data-Cloud-Consultant dumps now are free: <https://drive.google.com/open?id=1kADGi-TK6oIYdIbkqO652Qg14g3dVnWE>

The customers can immediately start using the Salesforce Certified Data Cloud Consultant (Data-Cloud-Consultant) exam dumps of DumpStillValid after buying it. In this way, one can save time and instantly embark on the journey of Salesforce Certified Data Cloud Consultant (Data-Cloud-Consultant) test preparation. 24/7 customer service is also available at DumpStillValid. Feel free to reach our customer support team if you have any questions about our Data-Cloud-Consultant Exam Preparation material.

We will refund your money if you fail to pass the exam after buying Data-Cloud-Consultant study materials. If you choose us, we will ensure you pass the exam. And we are pass guaranteed and money back guaranteed. Besides, Data-Cloud-Consultant study materials of us will help you pass the exam just one time. With professional experts to compile the Data-Cloud-Consultant Exam Dumps, they are high-quality. And we also have online and offline chat service staff, who possess the professional knowledge about the Data-Cloud-Consultant study materials, and if you have any questions, just contact us, we will give you reply as quickly as possible.

Pass Leader Data-Cloud-Consultant Dumps & Data-Cloud-Consultant Latest Braindumps Pdf

No matter you are exam candidates of high caliber or newbies, our Salesforce Data-Cloud-Consultant exam quiz will be your propulsion to gain the best results with least time and reasonable money. Not only because the outstanding content of Salesforce Certified Data Cloud Consultant Data-Cloud-Consultant Real Dumps that produced by our professional expert but also for the reason that we have excellent vocational moral to improve our Salesforce Certified Data Cloud Consultant Data-Cloud-Consultant learning materials quality.

Salesforce Data-Cloud-Consultant Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Data Cloud Overview: This topic covers Data Cloud's function, key terminology, business value, typical use cases, the Data Cloud lifecycle, dependencies, and principles of data ethics. These sub-topics provide an overview of Data Cloud's capabilities and applications.
Topic 2	<ul style="list-style-type: none"> • Data Ingestion and Modeling: This topic covers the different transformation capabilities within Data Cloud. It includes describing processes and considerations for data ingestion from various sources, defining, mapping, and modeling data using best practices aligned with identity resolution. Lastly, it discusses using available tools to inspect and validate ingested and modeled data.
Topic 3	<ul style="list-style-type: none"> • Identity Resolution: It describes matching and how its rule sets are applied. Furthermore, it discusses reconciling data and its rule sets, the results of identity resolution, and use cases.
Topic 4	<ul style="list-style-type: none"> • Data Cloud Setup and Administration: This topic includes applying Data Cloud permissions, permission sets, org-wide settings. It describes and configures data stream types, and data bundles. Moreover, it discusses use cases for data spaces, creating data spaces, managing and administering Data Cloud using reports, dashboards, flows, packaging, data kits, diagnosing and exploring data using Data Explorer, Profile Explorer, and APIs.

Salesforce Certified Data Cloud Consultant Sample Questions (Q52-Q57):

NEW QUESTION # 52

A customer notices that their consolidation rate has recently increased. They contact the consultant to ask why.

What are two likely explanations for the increase?

Choose 2 answers

- A. New data sources have been added to Data Cloud that largely overlap with the existing profiles.
- B. Identity resolution rules have been removed to reduce the number of matched profiles.
- C. Duplicates have been removed from source system data streams.
- D. Identity resolution rules have been added to the ruleset to increase the number of matched profiles.

Answer: A,D

Explanation:

The consolidation rate is a metric that measures the amount by which source profiles are combined to produce unified profiles in Data Cloud, calculated as $1 - (\text{number of unified profiles} / \text{number of source profiles})$. A higher consolidation rate means that more source profiles are matched and merged into fewer unified profiles, while a lower consolidation rate means that fewer source profiles are matched and more unified profiles are created. There are two likely explanations for why the consolidation rate has recently increased for a customer:

* New data sources have been added to Data Cloud that largely overlap with the existing profiles. This

* means that the new data sources contain many profiles that are similar or identical to the profiles from the existing data sources. For example, if a customer adds a new CRM system that has the same customer records as their old CRM system, the new data source will overlap with the existing one.

When Data Cloud ingests the new data source, it will use the identity resolution ruleset to match and merge the overlapping profiles into unified profiles, resulting in a higher consolidation rate.

* Identity resolution rules have been added to the ruleset to increase the number of matched profiles. This means that the customer has modified their identity resolution ruleset to include more match rules or more match criteria that can identify more profiles as belonging to the same individual. For example, if a customer adds a match rule that matches profiles based on email address and phone number, instead of just email address, the ruleset will be able to match more profiles that have the same email address and phone number, resulting in a higher consolidation rate.

NEW QUESTION # 53

A consultant wants to ensure that every segment managed by multiple brand teams adheres to the same set of exclusion criteria, that are updated on a monthly basis.

What is the most efficient option to allow for this capability?

- A. Create, publish, and deploy a data kit.
- B. Create a segment and copy it for each brand.
- C. Create a nested segment.
- D. Create a reusable container block with common criteria.

Answer: D

Explanation:

The most efficient option to allow for this capability is to create a reusable container block with common criteria. A container block is a segment component that can be reused across multiple segments. A container block can contain any combination of filters, nested segments, and exclusion criteria. A consultant can create a container block with the exclusion criteria that apply to all the segments managed by multiple brand teams, and then add the container block to each segment. This way, the consultant can update the exclusion criteria in one place and have them reflected in all the segments that use the container block.

The other options are not the most efficient options to allow for this capability. Creating, publishing, and deploying a data kit is a way to share data and segments across different data spaces, but it does not allow for updating the exclusion criteria on a monthly basis. Creating a nested segment is a way to combine segments using logical operators, but it does not allow for excluding individuals based on specific criteria. Creating a segment and copying it for each brand is a way to create multiple segments with the same exclusion criteria, but it does not allow for updating the exclusion criteria in one place.

References:

- * Create a Container Block
- * Create a Segment in Data Cloud
- * Create and Publish a Data Kit
- * Create a Nested Segment

NEW QUESTION # 54

A new user of Data Cloud only needs to be able to review individual rows of ingested data and validate that it has been modeled successfully to its linked data model object. The user will also need to make changes if required.

What is the minimum permission set needed to accommodate this use case?

- A. Data Cloud for Marketing Data Aware Specialist
- B. Data Cloud for Marketing Specialist
- C. Data Cloud Admin
- D. Data Cloud User

Answer: D

Explanation:

The Data Cloud User permission set is the minimum permission set needed to accommodate this use case. The Data Cloud User permission set grants access to the Data Explorer feature, which allows the user to review individual rows of ingested data and validate that it has been modeled successfully to its linked data model object. The user can also make changes to the data model object fields, such as adding or removing fields, changing field types, or creating formula fields. The Data Cloud User permission set does not grant access to other Data Cloud features or tasks, such as creating data streams, creating segments, creating activations, or managing users. The other permission sets are either too restrictive or too permissive for this use case. The Data Cloud for Marketing Specialist permission set only grants access to the segmentation and activation features, but not to the Data Explorer feature. The Data Cloud Admin permission set grants access to all Data Cloud features and tasks, including the Data Explorer feature, but it is more than what the user needs. The Data Cloud for Marketing Data Aware Specialist permission set grants access to the Data Explorer feature, but also to the segmentation and activation features, which are not required for this use case.

NEW QUESTION # 55

A customer requests that their personal data be deleted.

Which action should the consultant take to accommodate this request in Data Cloud?

- A. Use a streaming API call to delete the customer's information.
- **B. Use Consent API to request deletion of the customer's information.**
- C. Use Profile Explorer to delete the customer data from Data Cloud.
- D. Use the Data Rights Subject Request tool to request deletion of the customer's information.

Answer: B

Explanation:

The Data Rights Subject Request tool is a feature that allows Data Cloud users to manage customer requests for data access, deletion, or portability. The tool provides a user interface and an API to create, track, and fulfill data rights requests. The tool also generates a report that contains the customer's personal data and the actions taken to comply with the request. The consultant should use this tool to accommodate the customer's request for data deletion in Data Cloud. References: Data Rights Subject Request Tool, Create a Data Rights Subject Request

NEW QUESTION # 56

Northern Trail Outfitters wants to use some of its Marketing Cloud data in Data Cloud.

Which engagement channel data will require custom integration?

- A. Email
- **B. CloudPage**
- C. SMS
- D. Mobile push

Answer: B

Explanation:

Explanation

CloudPage is a web page that can be personalized and hosted by Marketing Cloud. It is not one of the standard engagement channels that Data Cloud supports out of the box. To use CloudPage data in Data Cloud, a custom integration is required. The other engagement channels (SMS, email, and mobile push) are supported by Data Cloud and can be integrated using the Marketing Cloud Connector or the Marketing Cloud API. References: Data Cloud Overview, Marketing Cloud Connector, Marketing Cloud API

NEW QUESTION # 57

.....

As you know, it is not easy to be famous among a lot of the similar companies. Fortunately, we have survived and developed well. So our company has been regarded as the most excellent seller of the Data-Cloud-Consultant learning materials. We positively assume the social responsibility and manufacture the high quality Data-Cloud-Consultant study braindumps for our customers. And with the best Data-Cloud-Consultant training guide and the best services, we will never be proud to do better in this career.
