Übrigens, Sie können die vollständige Version der ZertPruefung Associate-Google-Workspace-Administrator Prüfungsfragen aus dem Cloud-Speicher herunterladen: <https://drive.google.com/open?id=1uYICmGtNcXi8fLzCV97yZmyByIVeSbjO>

Jedem, der die Prüfungsunterlagen und Software zu Google Associate-Google-Workspace-Administrator (Associate Google Workspace Administrator) von ZertPruefung nutzt und die Google Zertifizierungsprüfungen nicht beim ersten Mal erfolgreich besteht, versprechen wir, die Kosten für das Prüfungsmaterial 100% zu erstatten.

## Google Associate-Google-Workspace-Administrator Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> <li>Supporting Business Initiatives: This section of the exam measures the skills of Enterprise Data Managers and covers the use of Google Workspace tools to support legal, reporting, and data management initiatives. It assesses the ability to configure Google Vault for retention rules, legal holds, and audits, ensuring compliance with legal and organizational data policies. The section also involves generating and interpreting user adoption and usage reports, analyzing alerts, monitoring service outages, and using BigQuery to derive actionable insights from activity logs. Furthermore, candidates are evaluated on their proficiency in supporting data import and export tasks, including onboarding and offboarding processes, migrating Gmail data, and exporting Google Workspace content to other platforms.</li> </ul>
Thema 2	<ul style="list-style-type: none"> <li>Configuring Services: This section of the exam evaluates the expertise of IT Systems Engineers and emphasizes configuring Google Workspace services according to corporate policies. It involves assigning permissions, setting up organizational units (OUs), managing application and security settings, and delegating Identity and Access Management (IAM) roles. The section also covers creating data compliance rules, applying Drive labels for data organization, and setting up feature releases such as Rapid or Scheduled Release. Candidates must demonstrate knowledge of security configurations for Google Cloud Marketplace applications and implement content compliance and security integration protocols. Furthermore, it includes configuring Gmail settings such as routing, spam control, email delegation, and archiving to ensure communication security and policy alignment across the organization.</li> </ul>

Thema 3	<ul style="list-style-type: none"> <li>• <b>Data Access and Authentication:</b> This section of the exam evaluates the capabilities of Security Administrators and focuses on configuring policies that secure organizational data across devices and applications. It includes setting up Chrome and Windows device management, implementing context-aware access, and enabling endpoint verification. The section assesses the ability to configure Gmail Data Loss Prevention (DLP) and Access Control Lists (ACLs) to prevent data leaks and enforce governance policies. Candidates must demonstrate an understanding of configuring secure collaboration settings on Drive, managing client-side encryption, and restricting external sharing. It also covers managing third-party applications by controlling permissions, approving Marketplace add-ons, and deploying apps securely within organizational units. Lastly, this section measures the ability to configure user authentication methods, such as two-step verification, SSO integration, and session controls, ensuring alignment with corporate security standards and compliance requirements.</li> </ul>
Thema 4	<ul style="list-style-type: none"> <li>• <b>Troubleshooting:</b> This section of the exam measures the skills of Technical Support Specialists and focuses on identifying, diagnosing, and resolving issues within Google Workspace services. It tests the ability to troubleshoot mail delivery problems, interpret message headers, analyze audit logs, and determine root causes of communication failures. Candidates are expected to collect relevant logs and documentation for support escalation and identify known issues. The section also evaluates knowledge in detecting and mitigating basic email attacks such as phishing, spam, or spoofing, using Gmail security settings and compliance tools. Additionally, it assesses troubleshooting skills for Google Workspace access, performance, and authentication issues across different devices and applications, including Google Meet and Jamboard, while maintaining service continuity and network reliability.</li> </ul>
Thema 5	<ul style="list-style-type: none"> <li>• <b>Managing Objects:</b> This section of the exam measures the skills of Google Workspace Administrators and covers the management of user accounts, shared drives, calendars, and groups within an organization. It assesses the ability to handle account lifecycles through provisioning and deprovisioning processes, transferring ownership, managing roles, and applying security measures when access needs to be revoked. Candidates must understand how to configure Google Cloud Directory Sync (GCDS) for synchronizing user data, perform audits, and interpret logs. Additionally, it tests knowledge of managing Google Drive permissions, lifecycle management of shared drives, and implementing security best practices. The section also focuses on configuring and troubleshooting Google Calendar and Groups for Business, ensuring proper access control, resource management, and the automation of group-related tasks using APIs and Apps Script.</li> </ul>

## Associate-Google-Workspace-Administrator Pass Dumps & PassGuide Associate-Google-Workspace-Administrator Prüfung & Associate-Google-Workspace-Administrator Guide

Solange Sie die Prüfung benötigen, können wir jederzeit die Schulungsunterlagen zur Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung aktualisieren, um Ihre Prüfungsbedürfnisse abzudecken. Die Schulungsunterlagen von ZertPruefung enthalten viele Übungsfragen und Antworten zur Google Associate-Google-Workspace-Administrator Zertifizierungsprüfung und geben Ihnen eine 100%-Pass-Garantie. Mit unseren Schulungsunterlagen können Sie sich besser auf Ihre Associate-Google-Workspace-Administrator Prüfung vorbereiten. Außerdem bieten wir Ihnen einen einjährigen kostenlosen Update-Service.

### Google Associate Google Workspace Administrator Associate-Google-Workspace-Administrator Prüfungsfragen mit Lösungen (Q44-Q49):

#### 44. Frage

Your company wants to start using Google Workspace for email. Your domain is verified through a third-party provider. You need to route the email to Google Workspace. What should you do?

- A. Change your domain's A record to point to Google's mail servers.
- B. Configure a forwarding rule in your current email system to redirect all messages to Gmail.
- C. Update your domain's MX records to the Google Workspace MX records provided in the setup instructions.

- D. Create a CNAME record that maps your domain to "gmail.com."

**Antwort: C**

Begründung:

To route your email to Google Workspace, you need to update your domain's MX (Mail Exchange) records to point to Google's mail servers. This step ensures that emails sent to your domain are delivered to your Google Workspace Gmail accounts. The MX records are provided in the setup instructions during the Google Workspace configuration process.

#### 45. Frage

Your company recently installed a free email marketing platform from the Google Workspace Marketplace. The marketing team is unable to access customer contact information or send emails through the platform. You need to identify the cause of the problem. What should you do first?

- A. Verify that the email marketing platform's subscription is active and up-to-date.
- **B. Check the OAuth scopes that are granted to the email marketing platform and ensure the platform has access to Contacts and Gmail.**
- C. Confirm that the "Manage Third-Party App Access" setting in the Admin console is enabled.
- D. Use the security investigation tool to review Gmail logs.

**Antwort: B**

Begründung:

When a third-party application from the Google Workspace Marketplace is installed, it requests specific permissions (OAuth scopes) to access Google Workspace data and services. If the marketing team is unable to access customer contact information or send emails, the most likely cause is that the installed email marketing platform was not granted the necessary OAuth scopes for Contacts and Gmail during the installation or approval process.

Here's why other options are less likely to be the first step:

A . Verify that the email marketing platform's subscription is active and up-to-date. While important for continued use, a "free" platform from the Marketplace generally doesn't have a subscription that would prevent initial access to basic functions like contacts and sending emails unless it's a trial that expired, which isn't indicated as the primary problem. This would be a later troubleshooting step if scope issues are ruled out.

C . Confirm that the "Manage Third-Party App Access" setting in the Admin console is enabled. This setting controls whether users can install any third-party apps from the Marketplace. If it were disabled, the app likely wouldn't have been installed in the first place. If it was enabled and then disabled, the app would stop working, but the specific problem points to data access, not app disablement.

D . Use the security investigation tool to review Gmail logs. The security investigation tool is excellent for reviewing security events, but it's more for post-incident analysis or suspicious activity. In this scenario, the problem is a lack of functionality for a newly installed app, not a security breach or misconfiguration that would necessarily show up in Gmail logs immediately as an access issue for the app itself. The OAuth scopes are the more direct and initial point of failure.

Reference from Google Workspace Administrator:

Manage third-party app access to data: Google Workspace administrators can control which third-party apps can access their organization's data. This includes reviewing and managing OAuth API access for configured apps.

Reference:

Understanding OAuth scopes: When an application requests access to Google data, it does so by requesting specific "scopes."

These scopes define the particular resources and operations that the application is allowed to perform. For an email marketing platform, scopes for <https://www.googleapis.com/auth/contacts> (or a more specific contact scope) and <https://www.googleapis.com/auth/gmail.send> (or a broader Gmail scope) would be crucial.

Controlling which third-party & internal apps can access Google Workspace data: This section in the Admin console specifically allows administrators to review "Configured apps" and check their "OAuth API access." This is where you would see the scopes granted to the email marketing platform.

#### 46. Frage

Your organization allows employees to use their personal mobile devices to check their work emails. You need to remove the employee's work email data from their phone when they leave the organization. What should you do?

- A. Set up data protection rules to prevent data sharing externally.
- B. Set up basic mobile management on the devices.
- **C. Set up advanced mobile management on the devices.**

- D. Set up 2SV authentication on the devices.

**Antwort: C**

**Begründung:**

With advanced mobile management, you can remotely manage and wipe work-related data from personal devices when an employee leaves the organization. This includes the ability to enforce policies such as requiring a password to access the device, remotely wiping corporate data, and managing access to work resources without affecting the personal data on the device. This solution provides the necessary tools to ensure data security and compliance.

#### **47. Frage**

Your organization is increasingly concerned about its environmental impact. You want to assess the environmental impact of using Google Workspace services. Which report should you use?

- A. Carbon footprint report
- **B. Google Environmental Report**
- C. Accounts report
- D. Apps Monthly Uptime report

**Antwort: B**

**Begründung:**

To assess the environmental impact of using Google Workspace services, you should refer to the Google Environmental Report. Google publishes comprehensive reports detailing its environmental efforts, including the energy efficiency of its data centers, its use of renewable energy, and its overall carbon footprint, which includes the impact of services like Google Workspace.

Here's why option B is the correct choice and why the others are not relevant to assessing the overall environmental impact of using Google Workspace:

**B . Google Environmental Report**

Google regularly publishes detailed environmental reports that cover various aspects of its sustainability initiatives, including its progress towards using renewable energy, its efforts to improve energy efficiency in its operations (which power Google Workspace), and its overall carbon footprint. These reports provide insights into the environmental impact associated with using Google services.

Associate Google Workspace Administrator topics guides or documents reference: While there might not be a specific "Google Workspace Environmental Impact Report" as a standalone document within the Admin console, Google's overarching "Environmental Report" (often found on Google's sustainability or environmental responsibility websites) encompasses the infrastructure and practices that support all Google services, including Google Workspace. Administrators looking for this information would be directed to these publicly available Google reports.

**A . Carbon footprint report**

While the concept of a "carbon footprint report" is relevant to environmental impact, Google typically includes this information within its broader "Environmental Report" rather than providing a separate report specifically for Google Workspace usage within an organization's Admin console. You would likely find data related to the carbon efficiency of Google's infrastructure in their main environmental disclosures.

Associate Google Workspace Administrator topics guides or documents reference: Google's communication about its carbon footprint and environmental efforts is usually consolidated in their public sustainability reports.

**C . Apps Monthly Uptime report**

The Apps Monthly Uptime report provides information about the reliability and availability of Google Workspace services. It focuses on service performance and uptime metrics, not on environmental impact or sustainability.

Associate Google Workspace Administrator topics guides or documents reference: The Google Workspace Admin Help documentation on service-level agreements (SLAs) and service status provides information about uptime guarantees and how to monitor service availability, which is the focus of the Apps Monthly Uptime report.

**D . Accounts report**

The Accounts report in the Google Admin console provides details about user accounts within your organization, such as the number of active users, account status, and other user-related information. It does not contain any data or analysis related to the environmental impact of using Google Workspace services.

Associate Google Workspace Administrator topics guides or documents reference: The Google Workspace Admin Help documentation on reporting and user accounts describes the information available in the Accounts report, which is focused on user management and activity metrics.

Therefore, to assess the environmental impact of using Google Workspace services, your organization should refer to the publicly available Google Environmental Report, which details Google's sustainability efforts and overall environmental performance.

#### 48. Frage

You are investigating a potential data breach. You need to see which devices are accessing corporate data and the applications used. What should you do?

- A. Analyze the audit log in the Admin console for device and application activity.
- B. Analyze the User Accounts section in the Google Admin console.
- C. Analyze the security investigation tool to access device log data.
- D. Analyze the Google Workspace reporting section of the Admin console.

**Antwort: A**

Begründung:

The audit log in the Google Admin console provides detailed information about device and application activity, which is crucial for investigating a potential data breach. You can see which devices have accessed corporate data, as well as which applications were used, giving you a comprehensive view of any unauthorized or suspicious activities. This is the most appropriate and efficient tool for this investigation.

#### 49. Frage

.....

In vielen Situationen erwerben wir noch keine zufriedenstellende Wirkung, wenn wir viel Geld und Zeit ausgeben. Die richtige Methode spielt eine entscheidende Rolle. Wir ZertPruefung Team widmet sich, die beste Methode für Sie zu entwickeln, Google Associate-Google-Workspace-Administrator Prüfung zu bestehen. Von dem Punkt, wenn Sie unsere Google Associate-Google-Workspace-Administrator Prüfungsunterlagen auswählen, bieten wir Ihnen umfassende Garantien. Kostenlose Probe vor dem Kauf, Zahlungssicherheit beim Kauf, einjährige kostenlose Aktualisierung nach dem Kauf der Google Associate-Google-Workspace-Administrator Unterlagen und die volle Rückerstattung für den Durchfall der Google Associate-Google-Workspace-Administrator Prüfung usw. Alle zusammen sind unsere Expression der Garantie für die Interesse der Kunden.
