APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q60-Q65):

NEW QUESTION # 60

What is the primary purpose of an Information Security Management System (ISMS)?

- A. To comply only with legal requirements
- **B. To protect information through a systematic risk management process**
- C. To prevent cyberattacks completely
- D. To eliminate all information security risks

Answer: B

Explanation:

An ISMS provides a structured framework for managing information security risks. ISO/IEC 27001 focuses on protecting confidentiality, integrity, and availability through continual improvement and risk-based decision-making, rather than eliminating all risks or guaranteeing complete protection.

NEW QUESTION # 61

Which statement about the conduct of audits is true?

- A. Third party audits are conducted by a customer of the organization
- **B. One of the focus areas for a surveillance audit is the output from internal audits and management reviews**
- C. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- D. During Stage 1 of a certification audit, evidence is collected by observing activities

Answer: B

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC

17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily a documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

NEW QUESTION # 62

Which clause of ISO/IEC 27001:2022 requires the organization to determine the scope of its ISMS?

- A. Clause 6.1
- **B. Clause 4.3**
- C. Clause 5.1
- D. Clause 9.2

Answer: B

NEW QUESTION # 63

Which activity helps ensure employees understand their information security responsibilities?

- **A. Awareness and training**
- B. Penetration testing
- C. Backup verification
- D. Risk acceptance

Answer: A

Explanation:

Security awareness and training help employees understand organizational policies, recognize security threats, and perform their responsibilities effectively. Educated personnel reduce the likelihood of human error and strengthen the overall effectiveness of the ISMS.

NEW QUESTION # 64

Which clause of ISO/IEC 27001:2022 requires the organization to determine the scope of its ISMS?

- A. Clause 6.1
- **B. Clause 4.3**
- C. Clause 5.1
- D. Clause 9.2

Answer: B

Explanation:

Clause 4.3 requires organizations to define the ISMS scope by considering internal and external issues, interested parties, and organizational boundaries. A clearly defined scope ensures the ISMS applies to the correct business activities and information assets.
