We will send you the latest version immediately once we have any updating about this test.

EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q91-Q96):

NEW QUESTION # 91
Which of the following protocols is used for exchanging routing information between two gateways in a network of autonomous systems?

- A. EGP
- B. OSPF
- C. ICMP

- D. IGMP

Answer: A

NEW QUESTION # 92
The IR team and the network administrator have successfully handled a malware incident on the network. The team is now preparing countermeasure guideline to avoid a future occurrence of the malware incident.
Which of the following countermeasure(s) should be added to deal with future malware incidents? (Select all that apply)

- A. Complying with the company's security policies
- B. Implementing a strong password policy
- C. Implementing strong authentication schemes
- D. Install antivirus software

Answer: D

NEW QUESTION # 93
A stateful multilayer inspection firewall combines the aspects of Application level gateway, Circuit level gateway and Packet filtering firewall. On which layers of the OSI model, does the Stateful multilayer inspection firewall works?

- A. Session & network
- B. Physical, session & application
- C. Physical & application
- D. Network, Session & Application

Answer: D

Explanation:
A stateful multilayer inspection firewall operates across multiple layers of the OSI model, specifically the Network, Session, and Application layers. It combines the features of packet filtering, circuit-level gateway, and application-level gateway firewalls. This type of firewall inspects the state and context of network traffic, ensuring that all packets are part of a known and valid session. It can make decisions based on the connection state as well as the contents of the traffic, providing a thorough inspection across these layers.
References: The information is consistent with the characteristics of stateful multilayer inspection firewalls as described in various sources, which confirm that they work across the Network, Session, and Application layers of the OSI model1234.

NEW QUESTION # 94
Which of the following is a distance vector routing protocols? Each correct answer represents a complete solution. Choose all that apply.

- A. IS-IS
- B. REST IN PEACE
- C. IGRP
