Complete Valid CASPO-001 Test Papers & Leader in Qualification Exams & The Best CASPO-001: Certified Agile Scrum Product Owner (CASPO)

Do you feel anxiety about your coming CASPO-001 exam test? Do you want to find the valid and latest material for the CASPO-001 actual test? PrepAwayTest will help you and bring you to the right direction. Firstly, CASPO-001 free demo is allowable for you to try before you buy. Besides, we will offer you the benefits of 365 days free update. SO, even if the CASPO-001 Actual Test is changed frequently, you do not worry about it, because our CASPO-001 training material is updated according to the actual test and can ensure you pass.

The CASPO certification exam covers a wide range of topics, including agile principles and values, Scrum framework, product backlog management, user stories, release planning, stakeholder management, and product visioning. CASPO-001 Exam is designed to test a candidate's understanding of these topics through multiple-choice questions and scenario-based questions. Upon passing the exam, candidates will receive a globally recognized certification, which demonstrates their proficiency in agile product management and their commitment to continuous learning and professional development.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q78-Q83):

NEW QUESTION # 78
What does it mean to say that an event has a time-box?

- A. The event can take no more than a maximum amount of time.
- B. The event must happen at a set time.
- C. The event must take at least a minimum amount of time.
- D. The event must happen by a given time.

Answer: A

Explanation:
In Scrum, a time-box is a maximum duration for an event, ensuring focus and efficiency. The Scrum Guide states: "All events are time-boxed, meaning they have a maximum duration." For example, Sprint Planning is
8 hours max, Daily Scrum is 15 minutes, etc. The event can end earlier if its purpose is achieved, but it cannot exceed the time-box. Option A refers to scheduling, not time-boxing. Option B implies a deadline, not a duration limit. Option C suggests a minimum, which isn't part of the definition. Thus, D is correct.

NEW QUESTION # 79
Every Scrum Team should have: (Choose the best answer)

- A. At least one representative from each major software engineering discipline (like QA, Dev, UX).
- B. One Lead Developer and no more than eight other members.
- C. The competencies and skills needed to deliver a Done Increment in a Sprint.

Answer: C

Explanation:
The Scrum Guide emphasizes that a Scrum Team must be cross-functional, meaning it has all the competencies and skills necessary to create a "Done" Increment within a Sprint without relying on external resources.
Option A aligns directly with this principle: "The Scrum Team consists of one Scrum Master, one Product Owner, and Developers... They are cross-functional, meaning the members have all the skills necessary to create value each Sprint." Option B, while suggesting a structured representation from disciplines, is too prescriptive and not a Scrum requirement-Scrum does not mandate specific roles like QA or UX within the Developers. Option C imposes a rigid team structure (one Lead Developer and a maximum of eight others), which contradicts Scrum's flexibility in team composition (typically 10 or fewer total, but no specific roles or limits beyond that are mandated). Thus, A is the best answer, focusing on capability rather than structure.

NEW QUESTION # 80
What happens if the customer no longer wants the feature that the Sprint Goal intended to meet? (Choose the best answer)

- A. The Scrum Master should cancel the Sprint
- B. The Product Owner should cancel the Sprint
- C. The executive stakeholders should determine if the Sprint should continue

Answer: B

Explanation:
If the Sprint Goal becomes obsolete (e.g., a feature is no longer needed), the Product Owner can cancel the Sprint. TheScrum Guidestates: "A Sprint can be cancelled if the Sprint Goal becomes obsolete. Only the Product Owner has the authority to cancel the Sprint."
* A:Correct-the Product Owner decides.
* B:Stakeholders advise, but don't decide.

NEW QUESTION # 81
True or False: There must be a release every Sprint.

- A. False
- B. True

Answer: A

Explanation:
Scrum requires a "potentially releasable" Increment each Sprint, but actual release is at the Product Owner's discretion. TheScrum Guidestates: "The Increment must be usable... The Product Owner may choose to release it immediately."
* A:False-release isn't mandatory.

NEW QUESTION # 82
How complete should the Sprint Backlog be at the end of the Sprint Planning meeting? (Choose the best answer)

- A. Every task should be defined
- B. The Product Owner will set the threshold for completeness
- C. Enough to ensure there is work for the first few days of the Sprint
- D. It depends

Answer: C

Explanation:
The Sprint Backlog is a plan that evolves. TheScrum Guidestates: "The Sprint Backlog is a plan by and for the Developers. It is a highly visible, real-time picture of the work that the Developers plan to accomplish during the Sprint." At Sprint Planning's end, it needs enough detail to start, with flexibility to adapt later.
* A:Correct-initial work is planned, not everything.
* B:The Product Owner doesn't control the Sprint Backlog.
* C:Full task definition isn't required; it emerges during the Sprint.
