## Fortinet NSE7\_SSE\_AD-25 100% Accuracy & Pass4sure NSE7\_SSE\_AD-25 Pass Guide

The best news is that during the whole year after purchasing, you will get the latest version of our NSE7\_SSE\_AD-25 exam prep study materials for free, since as soon as we have compiled a new version of the NSE7\_SSE\_AD-25 study materials, our company

will send the latest one of our NSE7\_SSE\_AD-25 study materials to your email immediately. Therefore, we can assure that you will miss nothing needed for the NSE7\_SSE\_AD-25 Exam. What's more, the latest version of our NSE7\_SSE\_AD-25 study materials will be a good way for you to broaden your horizons as well as improve your skills.

## Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q29-Q34):

### NEW QUESTION # 29

When deploying FortiSASE agent-based clients, which three features are available compared to an agentless solution? (Choose three.)

- A. Anti-ransomware protection
- B. ZTNA tags
- C. SSL inspection
- D. Vulnerability scan
- E. Web filter

**Answer: C,D,E**

Explanation:

When deploying FortiSASE agent-based clients, several features are available that are not typically available with an agentless solution. These features enhance the security and management capabilities for endpoints.

\* Vulnerability Scan:

\* Agent-based clients can perform vulnerability scans on endpoints to identify and remediate security weaknesses.

\* This proactive approach helps to ensure that endpoints are secure and compliant with security policies.

\* SSL Inspection:

\* Agent-based clients can perform SSL inspection to decrypt and inspect encrypted traffic for threats.

\* This feature is critical for detecting malicious activities hidden within SSL/TLS encrypted traffic.

\* Web Filter:

\* Web filtering is a key feature available with agent-based clients, allowing administrators to control and monitor web access.

\* This feature helps enforce acceptable use policies and protect users from web-based threats.

References:

FortiOS 7.6 Administration Guide: Explains the features and benefits of deploying agent-based clients.

FortiSASE 23.2 Documentation: Details the differences between agent-based and agentless solutions and the additional features provided by agent-based deployments.

### NEW QUESTION # 30

You are designing a new network for Company X and one of the new cybersecurity policy requirements is that all remote user endpoints must always be connected and protected. Which FortiSASE component facilitates this always-on security measure?

- A. thin-branch SASE extension
- B. inline-CASB
- C. site-based deployment
- D. unified FortiClient

**Answer: D**

Explanation:

The unified FortiClient component of FortiSASE facilitates the always-on security measure required for ensuring that all remote user endpoints are always connected and protected.

\* Unified FortiClient:

\* FortiClient is a comprehensive endpoint security solution that integrates with FortiSASE to provide continuous protection for remote user endpoints.

\* It ensures that endpoints are always connected to the FortiSASE infrastructure, even when users are off the corporate network.

\* Always-On Security:

\* The unified FortiClient maintains a persistent connection to FortiSASE, enforcing security policies and protecting endpoints against threats at all times.

\* This ensures compliance with the cybersecurity policy requiring constant connectivity and protection for remote users.

References:

FortiOS 7.6 Administration Guide: Provides information on configuring and managing FortiClient for endpoint security.

FortiSASE 23.2 Documentation: Explains how FortiClient integrates with FortiSASE to deliver always-on security for remote endpoints.

### NEW QUESTION # 31

Which two advantages does FortiSASE bring to businesses with multiple branch offices? (Choose two.)

- A. It offers centralized management for simplified administration.
- B. It eliminates the need to have an on-premises firewall for each branch.
- C. It enables seamless integration with third-party firewalls.
- D. It offers customizable dashboard views for each branch location

**Answer: A,B**

Explanation:

FortiSASE brings the following advantages to businesses with multiple branch offices:

\* Centralized Management for Simplified Administration:

\* FortiSASE provides a centralized management platform that allows administrators to manage security policies, configurations, and monitoring from a single interface.

\* This simplifies the administration and reduces the complexity of managing multiple branch offices.

\* Eliminates the Need for On-Premises Firewalls:

\* FortiSASE enables secure access to the internet and cloud applications without requiring dedicated on-premises firewalls at each branch office.

\* This reduces hardware costs and simplifies network architecture, as security functions are handled by the cloud-based FortiSASE solution.

References:

FortiOS 7.6 Administration Guide: Provides information on the benefits of centralized management and cloud-based security solutions.

FortiSASE 23.2 Documentation: Explains the advantages of using FortiSASE for businesses with multiple branch offices, including reduced need for on-premises firewalls.

### NEW QUESTION # 32

Refer to the exhibit. The daily report for application usage for internet traffic shows an unusually high number of unknown applications by category.

What are two possible explanations for this? (Choose two.)

□

- A. The private access policy must be set to log Security Events.
- B. Deep inspection is not being used to scan traffic.
- C. The inline-CASB application control profile does not have application categories set to Monitor.
- D. Certificate inspection is not being used to scan application traffic.

**Answer: B,D**

Explanation:

A high percentage of unknown applications often indicates that encrypted traffic is not being properly inspected. Without certificate inspection or deep inspection, FortiSASE cannot decrypt and analyze HTTPS traffic to identify applications, resulting in them being classified as "unknown."

### NEW QUESTION # 33

A customer wants to upgrade their legacy on-premises proxy to a cloud-based proxy for a hybrid network.

Which two FortiSASE features would help the customer achieve this outcome? (Choose two.)

- A. sandbox cloud
- B. zero trust network access (ZTNA)
- C. inline-CASB
- D. secure web gateway (SWG)

**Answer: C,D**

Explanation:

The secure web gateway (SWG) serves as the cloud-based proxy that inspects and controls web traffic, replacing the on-premises proxy. The inline-CASB provides additional visibility and control over cloud application usage, enhancing security in hybrid environments.

## NEW QUESTION # 34

.....

If you want to pass the exam with the shortest time, choosing us, we will achieve this for you. Our NSE7\_SSE\_AD-25 study materials contain the knowledge points you need to learn, through the practicing, and you will master the NSE7\_SSE\_AD-25 exam dumps. You just need to spend 48 to 72 hours on studying, and you can pass the exam. NSE7\_SSE\_AD-25 Study Materials are of high-quality, since the experienced professionals compile them, and they were quite familiar with the questions types of the exam centre.
