Moreover, there is the APP version of ISO-45001-Lead-Auditor study engine, you can learn anywhere at any time.

### PECB Certified ISO 45001 Lead Auditor Exam Sample Questions (Q81-Q86):

#### NEW QUESTION # 81

What type of audit is conducted by an organisation to determine the degree of conformity of its OH&S management system against the requirements of ISO 45001:2018?

- A. Surveillance audit
- **B. First-party audit**
- C. Third-party audit
- D. Supplier audit

**Answer: B**

#### NEW QUESTION # 82

You are conducting an ISO 45001 audit of Widgets Inc., an organization manufacturing machine parts for the aerospace industry. You find a short entry in the incident report file connecting a machine operator who suffered minor injury to his face four weeks ago when a small ribbon of metal hit him while operating his machine.

The subsequent investigation found that he was not wearing the required protective Personal Protective Equipment (PPE). He was subject to disciplinary action and warned that he would lose his job if it happened again.

Select two option of points of investigation which you would consider in order to determine conformity or nonconformity with clause 10.2 of ISO 45001.

- A. Find out when the operator's machine was last subject to a maintenance programme.
- B. Interview the operator to check if he was wearing the correct PPE.
- **C. Check whether any corrective actions were taken to eliminate or reduce the risk of recurrence of the Incident.**
- **D. Establish whether the Incident Investigation determined the root cause of the Incident**
- E. find out whether the operator was sent to the hospital.
- F. Determine whether the Health and Safety Authority was notified of the incident

**Answer: C,D**

Explanation:

Clause 10.2 of ISO 45001 requires organizations to investigate incidents, determine root causes, and implement corrective actions to prevent recurrence.

Analysis of Options:

A . Check whether corrective actions were taken.

This directly relates to the requirement to implement corrective actions to address the identified risks and hazards. Failure to do so would indicate nonconformity.

B . Determine whether the Health and Safety Authority was notified.

Notification is a legal requirement in certain jurisdictions, but it is not explicitly required under ISO 45001 unless the legal context demands it.

C . Establish whether the root cause was determined.

Root cause analysis is fundamental for effective corrective action. Without this, corrective measures may not address the underlying problem.

D . Find out when the operator's machine was last subject to maintenance.

While maintenance is important, it does not directly address the incident's nonconformity.

E . Find out whether the operator was sent to the hospital.

Sending the operator to the hospital is a reactive step and not relevant to compliance with Clause 10.2.

F . Interview the operator about PPE usage.

This is relevant but insufficient for determining compliance with Clause 10.2.

ISO Reference:

Clause 10.2: Investigation of incidents, determination of causes, and implementation of corrective actions.

Clause 8.1.2: Hierarchy of controls and risk reduction.

### NEW QUESTION # 83

Consider the emergency preparedness and response process outlined in ISO 45001. Match each process activity to the correct stage of the PDCA cycle.

To complete the table click on the blank section you want to complete so it is highlighted in red and then click on the applicable text from the options the appropriate process. "

**Answer:**

Explanation:

### NEW QUESTION # 84

Match the correct responsibility with each participant of a second-party audit:

**Answer:**

Explanation:

Explanation:

Explanation:

\* Prepares the audit report # Audit Team Leader: The Audit Team Leader is responsible for compiling and preparing the final audit report, summarizing findings and conclusions.

\* Prepares audit checklists for use during the audit # Auditor: Auditors create checklists to ensure a thorough and systematic evaluation during the audit.

\* Participates under the direction and guidance of an auditor # Auditor in Training: An auditor in training works under supervision to gain experience and contribute to the audit process.

\* Follows up on audit findings within an agreed timeframe # Auditee: The auditee is responsible for addressing and resolving audit findings and providing evidence of corrective actions.

\* A person who accompanies the audit team but does not act as an auditor # Observer: Observers are typically external parties or internal personnel who watch the audit process but do not participate actively.

\* Escorts the auditors but does not participate in the audit # Guide: A guide facilitates the audit by helping auditors navigate the site and access relevant areas or documents.
