New AZ-500 Test Testking, AZ-500 Latest Demo

Being different from the other AZ-500 Exam Questions in the market, our AZ-500 practice materials have reasonable ruling price and satisfactory results of passing rate up to 98 to 100 percent. So our AZ-500 guide prep is perfect paragon in this industry full of elucidating content for exam candidates of various degrees to use for reference. It contains not only the newest questions appeared in real exams in these years, but the most classic knowledge to master.

Microsoft Azure Security Technologies Sample Questions (Q129-Q134):

NEW QUESTION # 129

You have an Azure subscription that contains the following resources:

- * A virtual network named VNET1 that contains two subnets named Subnet1 and Subnet2.
- * A virtual machine named VM1 that has only a private IP address and connects to Subnet1.

You need to ensure that Remote Desktop connections can be established to VM1 from the internet.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

Answer:

Explanation:

□

Explanation

□

NEW QUESTION # 130

You have an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

□

In Azure AD Privileged Identity Management (PIM), the Role settings for the Contributor role are configured as shown in the

exhibit. (Click the Exhibit tab.)

☐ You assign users the Contributor role on May 1, 2019 as shown in the following table.

☐ For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation

NEW QUESTION # 131

You have an Azure subscription named Sub1 that is associated to an Azure Active Directory (Azure AD) tenant named contoso.com.

You plan to implement an application that will consist of the resources shown in the following table.

☐ Users will authenticate by using their Azure AD user account and access the Cosmos DB account by using resource tokens.

You need to identify which tasks will be implemented in CosmosDB1 and WebApp1.

Which task should you identify for each resource? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation

CosmosDB1: Create database users and generate resource tokens.

Azure Cosmos DB resource tokens provide a safe mechanism for allowing clients to read, write, and delete specific resources in an Azure Cosmos DB account according to the granted permissions.

WebApp1: Authenticate Azure AD users and relay resource tokens

A typical approach to requesting, generating, and delivering resource tokens to a mobile application is to use a resource token broker. The following diagram shows a high-level overview of how the sample application uses a resource token broker to manage access to the document database data:

NEW QUESTION # 132

You have an Azure subscription.

You need to create and deploy an Azure policy that meets the following requirements:

When a new virtual machine is deployed, automatically install a custom security extension.

Trigger an autogenerated remediation task for non-compliant virtual machines to install the extension.

What should you include in the policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Reference:

<https://docs.microsoft.com/en-us/azure/governance/policy/how-to/remediate-resources>

NEW QUESTION # 133

You have an Azure subscription that contains the resources shown in the following table.

☐ The subscription is linked to an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

☐ You create the groups shown in the following table.

☐ The membership rules for Group1 and Group2 are configured as shown in the following exhibit.

NOTE: Each correct selection is worth one point.

<https://docs.microsoft.com/en-us/azure/active-directory/enterprise-users/groups-dynamic-membership>
