CompTIA A+ Certification Exam: Core 1 Sample Questions (Q596-Q601):

NEW QUESTION # 596

A technician is installing a wireless access point and is required to run all cabling and make patch cords if necessary.

INSTRUCTIONS

Part 1

For each cable type, click the (+) to select the appropriate connector and tool.

part 2

An access point was moved and no longer has connectivity. Connect the access point, patch panel, and switch by clicking the (+) to select the appropriate cable end for each corresponding location to create a link.

The link will be visible after making the second selection of each pair.

Cable ends may be used multiple times, and all placeholders will be filled.

Answer:

Explanation:

See the solution below in Explanation.

Explanation

Check the exhibit diagram for both parts.

Part 2

A close-up of several ports Description automatically generated

NEW QUESTION # 597

An office manager reports that a printer is experiencing performance issues. Printouts are smudging when they are handled, and, recently, whenever the manager tries to print oversized documents, the paper jams before anything is printed on it.

Answer:

Explanation:

NEW QUESTION # 598

Which of the following DNS record types is used to direct email to a mail server?

- A. CNAME
- B. SOA
- C. MX
- D. SRV

Answer: C

Explanation:

An MX (Mail Exchange) record specifies the mail server responsible for receiving email for a domain.

* Why Not A (CNAME): CNAME is used for domain aliasing, not for email delivery.

* Why Not B (SRV): SRV records are used to locate specific services, not mail servers.

* Why Not D (SOA): SOA records provide domain information but do not handle email.

CompTIA A+ Exam Reference: Core 1 (220-1101), Section 2.6, DNS record types.

NEW QUESTION # 599

Which of the following wireless technologies would a company most likely implement for inventory management?

- A. RFID
- B. 5G
- C. Bluetooth
- D. NFC

Answer: A

Explanation:

Explanation

RFID stands for Radio Frequency Identification, which is a technology that uses radio waves to identify and track objects that have RFID tags attached to them. RFID tags are small devices that store information and can be read by RFID readers without direct contact or line of sight. RFID can be used for inventory management, as it can provide real-time visibility and accuracy of the
