Salesforce Salesforce-Data-Cloud題庫最新資訊和Testpdf - 認證考試產品中的領先提供商

要想通過Salesforce Salesforce-Data-Cloud認證考試，選擇相應的訓練工具是非常有必要的。而關於Salesforce Salesforce-Data-Cloud認證考試的研究材料是很重要的一部分，我們的Testpdf能很好很快地提供關於通過Salesforce Salesforce-Data-Cloud認證考試的研究材料。我們的Testpdf的IT專家都很有經驗，他們的研究材料和你考試的考題十分接近的，幾乎一模一樣。Testpdf是一個專門為要參加認證考試的人提供便利的網站，能有效的幫助考生通過考試。

最新的 Accredited Professional Salesforce-Data-Cloud 免費考試真題 (Q55-Q60):

問題 #55

Which consideration related to the way Data Cloud ingests CRM data is true?

- A. The CRM Connector's synchronization times can be customized to up to 15-minute intervals.
- B. CRM data cannot be manually refreshed and must wait for the next scheduled synchronization.
- **C. The CRM Connector allows standard fields to stream into Data Cloud in real time.**
- D. Formula fields are refreshed at regular sync intervals and are updated at the next full refresh.

答案： C

解題說明：

The correct answer is D. The CRM Connector allows standard fields to stream into Data Cloud in real time.

This means that any changes to the standard fields in the CRM data source are reflected in Data Cloud almost instantly, without waiting for the next scheduled synchronization. This feature enables Data Cloud to have the most up-to-date and accurate CRM data for segmentation and activation¹.

The other options are incorrect for the following reasons:

A). CRM data can be manually refreshed at any time by clicking the Refresh button on the data stream detail page². This option is false.

B). The CRM Connector's synchronization times can be customized to up to 60-minute intervals, not 15-minute intervals³. This option is false.

C). Formula fields are not refreshed at regular sync intervals, but only at the next full refresh⁴. A full refresh is a complete data ingestion process that occurs once every 24 hours or when manually triggered. This option is false.

問題 #56

Which type of measures with aggregate functions are supported?

- A. Date
- B. Text
- C. Numeric
- D. Boolean

答案: C

解題說明:

Explanation

Numeric is the only type of measures that support aggregate functions. Measures are numeric fields that can be aggregated using functions such as SUM, AVG, MIN, MAX, or COUNT. For example, you can use a measure to calculate the total revenue or the average order value from your data. Date, Text, and Boolean are not types of measures, but types of dimensions. Dimensions are fields that can be used to group or filter data, but not to perform calculations. References: Measures and Dimensions

問題 #57

Which method should an administrator use when performing aggregations in windows of 15 minutes on data collected via the Interactions SDK and Mobile SDK?

- A. Activation
- B. Calculated Insight
- C. Streaming Insight
- D. Segment

答案: C

解題說明:

Explanation

This method should be used when performing aggregations in windows of 15 minutes on data collected via the Interactions SDK and Mobile SDK. Streaming Insight allows you to query and aggregate data from real-time streams using window functions.

問題 #58

What is the role of artificial intelligence (AI) in Data Cloud?

- A. Generating email templates for use cases
- B. Creating dynamic data-driven management dashboards
- C. Enhancing customer interactions through insights and predictions
- D. Automating data validation

答案： C

解題說明：

Role of AI in Data Cloud: Artificial intelligence (AI) plays a crucial role in Salesforce Data Cloud by leveraging data to generate insights and predictions that enhance customer interactions.

Insights and Predictions:

AI Algorithms: Use machine learning algorithms to analyze vast amounts of customer data.

Predictive Analytics: Provide predictive insights, such as customer behavior trends, preferences, and potential future actions.

Enhancing Customer Interactions:

Personalization: AI helps in creating personalized experiences by predicting customer needs and preferences.

Efficiency: Enables proactive customer service by predicting issues and suggesting solutions before customers reach out.

Marketing: Improves targeting and segmentation, ensuring that marketing efforts are directed towards the most promising leads and customers.

Use Cases:

Recommendation Engines: Suggest products or services based on past behavior and preferences.

Churn Prediction: Identify customers at risk of leaving and engage them with retention strategies.

問題 #59

The website team at Cumulus Financial Services wants to understand which identified users have browsed the jobs page on their website at least twice within the last 12 hours. Which component should a consultant recommend to achieve this goal?

- A. Streaming Data Transformation
- B. Calculated Insight
- C. Streaming Insight
- D. Segment

答案： C

解題說明：

This component should be recommended to achieve the goal of understanding which identified users have browsed the jobs page on their website at least twice within the last 12 hours. Streaming Insight allows you to query and filter data from real-time streams using window functions and aggregation functions.
