**Valid UiPath-ABAv1 Test Notes - Pdf Demo UiPath-ABAv1 Download**

This is a simple and portable document of real UiPath UiPath-ABAv1 Exam Questions. It contains actual UiPath UiPath-ABAv1 exam questions and answers and can be helpful for quick revision or for studying on the go. It is also printable so you can easily study on a hard copy of the pdf having a break from staring.

## UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q131-Q136):

### NEW QUESTION # 131

What should the RPA Business Analyst do during the Build RPA phase?

- A. Validate changes and evaluate the impact
- B. Prepare test data with the SME
- **C. Create test scenarios and test cases**
- D. Coordinate unit & technical testing

**Answer: C**

Explanation:

During the Build RPA phase, the RPA Business Analyst is responsible for creating test scenarios and test cases. This role entails working closely with stakeholders to perform in-depth process analysis for selected processes, defining business requirements, and ensuring the created documents accurately reflect the automation solution (UiPath Academy).

For a more detailed understanding of the role and responsibilities of an Automation Business Analyst, you can explore further on UiPath Academy.

### NEW QUESTION # 132

Which of the following are one of the three features offered by UiPath Process Mining within the Automation Potential dashboard?

- A. Automation Rate, Total case value, FTE
- B. Automation Rate, Manual Processing Time, Number of cases
- **C. Automation Rate, Manual Processing Time, FTE**
- D. Automation Rate, Avg. number of events, FTE

**Answer: C**

Explanation:

Understanding UiPath Process Mining:

UiPath Process Mining analyzes data from IT systems to generate insights about automation opportunities. The Automation Potential dashboard provides metrics like Automation Rate, Manual Processing Time, and FTE savings to help identify and prioritize processes for automation.

Why Option A is Correct:

Automation Rate: Indicates the proportion of tasks that can be automated.

Manual Processing Time: Reflects the time spent on tasks manually, highlighting potential savings.

FTE (Full-Time Equivalent): Measures the labor effort involved, showing the potential for resource optimization.

Why Other Options Are Incorrect:

Option B: Average number of events is not a specific feature of the Automation Potential dashboard.

Option C: Total case value is unrelated to Process Mining features.

Option D: Number of cases is not a metric in the Automation Potential dashboard.

By focusing on these key features, UiPath Process Mining provides actionable insights into process efficiency and automation readiness.

### NEW QUESTION # 133

Which of the following principles applies during the Process Documentation stage?

- A. Sign-Off is not mandatory if the feedback was implemented after review.
- B. Including more scenarios and business rules should be done after the first review
- **C. A minimum of one review is required**
- D. High-level process map should be created only after the To-Be process map is done

**Answer: C**

Explanation:

During the Process Documentation stage, it is a best practice and often a requirement to have at least one review of the documentation created, such as the Process Design Document (PDD). This ensures that all stakeholders agree on the process as documented and that it accurately represents the business needs and technical requirements. References: UiPath Documentation on Process Documentation at <https://docs.uipath.com/>.

#### NEW QUESTION # 134

Which of the following can be found in the Process Overview part of the PDD?

- **A. High Level As-Is Process Map**
- B. Process schedule and frequency
- C. Process SME and Process Owner
- D. Applications names and versions

**Answer: A**

Explanation:

In the Process Overview part of the Process Design Document (PDD), a high-level As-Is Process Map is included. This part typically encompasses the current state of the process, outlining the steps, decisions, and interactions that occur in the process as it currently exists without automation. References: UiPath Documentation on PDD at <https://docs.uipath.com/>.

#### NEW QUESTION # 135

How are changes usually categorized in terms of implementation effort, which is calculated in days, in the Change Control Process of an automation project?

- A. Easy, Moderate, or Complex and the company usually defines the timeframe for each of these categories.
- B. Changes are usually quantified in terms of the manpower needed rather than the number of days it takes to implement.
- C. Minor, Major, or Critical and it's usually the responsibility of the Project Manager to decide on the duration for these categories.
- **D. Low, Medium, or High and it's typically up to the company to decide on the number of days for each category.**

**Answer: D**

Explanation:

In the context of UiPath's Change Control Process:

Categorization: Changes are categorized as Low, Medium, or High based on the time and resources required for implementation.

Low: Typically involves minor adjustments with minimal impact, requiring fewer resources and less time.

Medium: Changes that involve moderate effort, such as adjustments to existing automations.

High: Significant changes that require a longer duration, extensive testing, and resource involvement.

Effort Calculation: The company decides the duration for each category, e.g., Low (<2 days), Medium (2-5 days), High (>5 days).

Alignment with Change Management Principles: These categories ensure clear communication, effective planning, and prioritization during the change request and implementation stages.

#### NEW QUESTION # 136

.....

On each attempt, the UiPath UiPath-ABAv1 practice test questions taker will provide a score report. With this report, one can find mistakes and remove them for the final attempt. A situation that the web-based test creates is similar to the UiPath-ABAv1 Real Exam Questions. Practicing in this situation will help you kill UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) exam anxiety.
