Choose NCP-MCA exam Topics Pdf to prepare for your coming test, and you will get unexpected results. NCP-MCA pdf version is very convenient to read and review. If you like to choose the paper file for study, the NCP-MCA pdf file will be your best choice. The Nutanix NCP-MCA Pdf Dumps can be printed into papers, so that you can read and do marks as you like. Thus when you open your dumps, you will soon find the highlights in the NCP-MCA papers. What's more, the 99% pass rate can help you achieve

your goals.

Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q22-Q27):

NEW QUESTION # 22

An administrator has run a multi-step Playbook. but sees the Failed status, as shown in the exhibit. What could be causing the playbook to fail?

- A. IP Address SSH action has a timeout of 5 minutes.
- B. PowerShell action has a timeout of 5 minutes.
- C. VM action has a timeout of 5 minutes.
- D. puppet action has a timeout of 5 minutes.

Answer: A

Explanation:

The image shows a failed status for an SSH_VM_Task, which is manually triggered. Since the task involves SSH, it's likely that the IP Address SSH action has a timeout of 5 minutes, causing the playbook to fail if it cannot complete within this time frame. The IP Address SSH action is used to execute commands on a remote VM using SSH. It requires the IP address, username, password, and command to run as inputs. The timeout parameter specifies how long the action will wait for the command to finish before aborting. If the timeout is too short, the action may fail due to network latency, slow execution, or other factors. NEW QUESTION # 23

An administrator needs to run a blueprint deployment and tasks in a different Prism Central (PC) instance than the PC instance running Self-Service (formerly Calm).

How should the administrator satisfy this requirement?

- A. Export the blueprint to the remote Prism Central.
- B. Add a remote Prism Central instance as an account.
- C. Add a remote Prism Element instance as an account.
- D. Export the package to the remote Prism Central.

Answer: B

Explanation:

To run a blueprint deployment and tasks in a different Prism Central instance than the one running Self-Service (formerly Calm), the administrator should add the remote Prism Central instance as an account. This configuration allows Self-Service to interact with multiple Prism Central instances, enabling the management and deployment of blueprints across different environments.

NEW QUESTION # 24

What two view options are available when launching Calm blueprints? (Choose two.)

- A. View as Admin
- B. Developer
- C. Consumer
- D. View as Project Admin

Answer: B,C

Explanation:

When launching Calm blueprints, there are two view options available: Developer and Consumer. The Developer view allows you to create, edit, and manage blueprints, as well as access advanced features such as macros, actions, and scripts. The Consumer view allows you to launch and manage applications from the Marketplace, as well as access basic features such as variables, tasks, and

alerts. The view option is determined by the role assigned to the user in the project. Users with the Project Admin or Project Auditor role can switch between the Developer and Consumer views, while users with the Project User role can only access the Consumer view. Reference:

Nutanix Certified Professional - Multicloud Automation (NCP-MCA) v6.5, Section 1 - Describe and Differentiate Automation Concepts and Principles, page 3 Nutanix Multicloud Automation Administration (NMCAA), Module 2 - Nutanix Calm, Lesson 2.1 - Nutanix Calm Overview, page 9 Nutanix Calm User Guide, Introduction to Nutanix Calm, Nutanix Calm User Interface

NEW QUESTION # 25

An administrator has built a Playbook to run a Powershell script in a VM when a specific alert is generated. Several days later, the alert is generated, but the script does not execute and there are no Plays recorded for the Playbook.

What is causing this issue?

- A. The version of Playbooks is not correct for the version of Prism Central.
- **B. The script executed, but closed with an error code.**
- C. The Playbook was never enabled.
- D. The path to the script was not correct.

Answer: B

NEW QUESTION # 26

Refer to the exhibit.

The VM appSAP01dev is a SAP development environment application and it is common to have memory constrained alerts on this VM, but the administrator wants to avoid adding memory to development VMs like this one, since this is normally done for only production VMs.

Which two actions should the administrator take to avoid adding memory to the development VMs? (Choose two.)

- **A. Assign the category Environment:Development to development VMs**
- **B. Modify the Alert by adding the correct category**
- C. Assign the category Environment:Production to the production VMs
- D. Disable the Alert in Prism Central

Answer: A,B

NEW QUESTION # 27

.....

Just as an old saying goes, it is better to gain a skill than to be rich. Contemporarily, competence far outweighs family backgrounds and academic degrees. One of the significant factors to judge whether one is competent or not is his or her NCP-MCA certificates. Generally speaking, NCP-MCA certificates function as the fundamental requirement when a company needs to increase manpower in its start-up stage. In this respect, our NCP-MCA practice materials can satisfy your demands if you are now in preparation for a NCP-MCA certificate.
