Our 300-710 study dumps are suitable for you whichever level you are in right now. Whether you are in entry-level position or experienced exam candidates who have tried the exam before, this is the perfect chance to give a shot. High quality and high accuracy 300-710 real materials like ours can give you confidence and reliable backup to get the certificate smoothly because our experts have extracted the most frequent-tested points for your reference, because they are proficient in this exam who are dedicated in this area over ten years. If you make up your mind of our 300-710 Exam Questions after browsing the free demos, we will staunchly support your review and give you a comfortable and efficient purchase experience this time.

Cisco 300-710 certification exam covers topics such as NGFW policy configuration, network analysis policy configuration, file type and network-based malware detection, and correlation policies. It also includes topics related to web and email security, including URL filtering, email encryption, and anti-spam and anti-virus configurations. 300-710 exam also tests candidates on their knowledge of Cisco Firepower Management Center (FMC) and its features, such as user management, device management, and reporting.

Cisco Firepower NGFW is one of the most widely used security solutions in the market, offering advanced threat protection and network visibility across physical, virtual, and cloud environments. As cyber threats continue to evolve and become more sophisticated, organizations need skilled professionals who can implement, manage, and optimize Firepower NGFW solutions to protect their networks and assets. The 300-710 Exam validates the knowledge and skills required for this critical role, including

configuring and troubleshooting Firepower NGFW devices, implementing access control policies, and using advanced security features to detect and prevent cyber attacks.

## Securing Networks with Cisco Firepower Exam Demo - 300-710 Torrent Vce & Securing Networks with Cisco Firepower Pass Guide

If you think it is an adventure for purchasing our Cisco 300-710 braindump, life is also a great adventure. Before many successful people obtained achievements, they had a adventure experience. Moreover, the candidates that using our Cisco 300-710 Test Questions and test answers can easily verify their quality. Actual4Dumps Cisco 300-710 certification training ensured their success.

The Securing Networks with Cisco Firepower certification exam consists of 60-70 multiple-choice and simulation-based questions, and candidates have 90 minutes to complete it. 300-710 Exam is available in English and Japanese and can be taken at any Pearson VUE testing center worldwide. Successful candidates will be awarded the Cisco Certified Network Professional Security (CCNP Security) certification, which is recognized globally as a mark of excellence in network security.

### Cisco Securing Networks with Cisco Firepower Sample Questions (Q139-Q144):

#### NEW QUESTION # 139

When deploying a Cisco ASA Firepower module, an organization wants to evaluate the contents of the traffic without affecting the network. It is currently configured to have more than one instance of the same device on the physical appliance. Which deployment mode meets the needs of the organization?

- A. **inline tap monitor-only mode**
- B. passive monitor-only mode
- C. inline mode
- D. passive tap monitor-only mode

**Answer: A**

Explanation:

For passive monitor-only mode we need extra switch with span port.

<https://www.cisco.com/c/en/us/td/docs/security/asa/asa910/configuration/firewall/asa-910-firewall-config/access-sfr.html>

#### NEW QUESTION # 140

A network administrator needs to create a policy on Cisco Firepower to fast-path traffic to avoid Layer 7 inspection. The rate at which traffic is inspected must be optimized. What must be done to achieve this goal?

- A. Disable TCP inspection.
- B. Enable the FXOS for multi-instance.
- C. Configure modular policy framework.
- D. **Configure a prefilter policy.**

**Answer: D**

#### NEW QUESTION # 141

Users report that Cisco Duo 2FA fails when they attempt to connect to the VPN on a Cisco Secure Firewall Threat Defense (FTD) device. IT staff have VPN profiles that do not require multifactor authentication and they can connect to the VPN without any issues. When viewing the VPN troubleshooting log in Cisco Secure Firewall Management Centre (FMC), the network administrator sees an error in the Cisco Duo AAA server has been marked as failed. What is the root cause of the issue?

- A. Multifactor authentication is not supported on Secure FMC managed devices.
- B. **Duo trust certificates are missing from the Secure FTD device.**
- C. AD Trust certificates are missing from the Secure FTD device.
- D. The internal AD server is unreachable from the Secure FTD device.

**Answer: B****Explanation:**

If users report that Cisco Duo 2FA fails when attempting to connect to the VPN on a Cisco Secure Firewall Threat Defense (FTD) device, and the VPN troubleshooting log in FMC shows an error indicating that the Cisco Duo AAA server has been marked as failed, the root cause is likely missing Duo trust certificates on the FTD device. Trust certificates are essential for establishing a secure and trusted connection between the FTD and the Duo authentication service.

**Steps:**

- \* Obtain the necessary Duo trust certificates.
- \* Install the certificates on the FTD device.
- \* Verify the configuration to ensure that the FTD device can properly communicate with the Duo AAA server.

This resolves the authentication failure by ensuring that the FTD device can trust the Duo server.

**NEW QUESTION # 142**

| Application | Times Accessed | Application Risk | Productivity Rating | Data Transferred (MB) |
|-------------|----------------|------------------|---------------------|-----------------------|
| BitTorrent  | 0              | Very High        | Very Low            | 1.7281                |
| TOR         | 5              | Medium           | Low                 | 0.0006                |
| SSL client  | 10,100         | Medium           | Medium              | 48.4102               |
| Skype       | 644            | Medium           | Medium              | 10.3545               |
| cURL        | 280            | Medium           | Medium              | 0.4840                |

Refer to the exhibit. An engineer is analyzing a Network Risk Report from Cisco FMC. Which application must the engineer take immediate action against to prevent unauthorized network use?

- A. Chrome
- B. Kerberos
- C. TOR
- D. YouTube

**Answer: C****NEW QUESTION # 143**

A network administrator is configuring a transparent Cisco Secure Firewall Threat Defense registered to a Cisco Secure Firewall Management Center. The administrator wants to configure the Secure Firewall Threat Defense to allow ARP traffic to pass between two interfaces of a bridge group. What must be configured?

- A. An access policy must allow MAC address 0100.0CCC.CCCD.
- B. ARP inspection must be disabled.
- C. Use the default configuration on the devices.
- D. An access policy must allow MAC address FFFF.FFFF.FFFF.

**Answer: C****NEW QUESTION # 144**
