We have accommodating group offering help 24/7. It is our responsibility to aid you through those challenges ahead of you. So instead of focusing on the high quality NetSec-Pro latest material only, our staff is genial and patient to your questions of our NetSec-Pro real questions. It is our obligation to offer help for your trust and preference. Besides, you can have an experimental look of demos and get more information of NetSec-Pro Real Questions. The customer-service staff will be with you all the time to smooth your acquaintance of our NetSec-Pro latest material.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.
Topic 2	<ul style="list-style-type: none"> • Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.
Topic 3	<ul style="list-style-type: none"> • NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.

Topic 4	<ul style="list-style-type: none"> • Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.
Topic 5	<ul style="list-style-type: none"> • Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.

NetSec-Pro Guide Torrent - NetSec-Pro Exam Prep - NetSec-Pro Pass Rate

We strongly advise you to buy our online engine and windows software of the NetSec-Pro study materials, which can simulate the real test environment. There is no doubt that you will never feel bored on learning our NetSec-Pro practice materials because of the smooth operation. You will find that learning is becoming interesting and easy. And you will be more confident to pass the exam since that you have experience the Real NetSec-Pro Exam.

Palo Alto Networks Network Security Professional Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which two SSH Proxy decryption profile settings should be configured to enhance the company's security posture? (Choose two.)

- A. Allow sessions with legacy SSH protocol versions.
- B. Block connections that use non-compliant SSH versions.
- C. Block sessions when certificate validation fails.
- D. Allow sessions when decryption resources are unavailable.

Answer: B,C

Explanation:

Blocking non-compliant SSH versions and failing certificate validations are fundamental security measures:

Block sessions when certificate validation fails

"The SSH Proxy profile should block sessions that fail certificate validation to ensure that only trusted hosts are allowed." (Source: SSH Proxy Decryption Best Practices) Block connections using non-compliant SSH versions Older SSH versions may have vulnerabilities or lack modern encryption algorithms.

"To enforce stronger security, block SSH sessions that use older or deprecated versions of the SSH protocol that do not comply with your security posture." (Source: SSH Decryption and Best Practices) Together, these measures minimize the risk of MITM attacks and secure SSH traffic.

NEW QUESTION # 15

When configuring Security policies on VM-Series firewalls, which set of actions will ensure the most comprehensive Security policy enforcement?

- A. Configure policies using User-ID and App-ID, enable decryption, apply appropriate security profiles to rules, and update regularly with dynamic updates.
- B. Configure port-based policies, check threat logs weekly, conduct software updates annually, and enable decryption.
- C. Configure a block policy for all malicious inbound traffic, configure an allow policy for all outbound traffic, and update regularly with dynamic updates.

- D. Configure all default policies provided by the firewall, use Policy Optimizer, and adjust security rules after an incident occurs.

Answer: A

Explanation:

A comprehensive security approach uses:

- * User-ID for identity-based policies
- * App-ID for application-based security
- * Decryption to inspect encrypted traffic
- * Security profiles to enforce protections
- * Dynamic updates to ensure up-to-date threat coverage

"For comprehensive security, combine User-ID, App-ID, decryption, and security profiles. Keep the firewall updated with dynamic content updates to maintain the strongest security posture." (Source: Best Practices for Security Policy) This ensures real-time, identity-aware, and application-centric security enforcement.

NEW QUESTION # 16

In a Prisma SD-WAN environment experiencing voice quality degradation, which initial action is recommended?

- A. Switch all VoIP traffic to backup paths.
- **B. Review real-time analytics of path performance.**
- C. Immediately modify path quality thresholds.
- D. Request an RMA of the ION devices.

Answer: B

Explanation:

Voice quality issues in SD-WAN deployments are typically linked to path performance metrics (latency, jitter, packet loss).

Reviewing real-time analytics helps pinpoint root causes and appropriate mitigation.

When experiencing performance issues, the first step is to analyze real-time performance data.

Prisma SD-WAN provides path quality analytics to identify degradation and ensure informed troubleshooting.

This data-driven approach avoids unnecessary configuration changes.

NEW QUESTION # 17

A cloud security architect is designing a certificate management strategy for Strata Cloud Manager (SCM) across hybrid environments. Which practice ensures optimal security with low management overhead?

- A. Configure manual certificate deployment with quarterly reviews and environment-specific security protocols.
- B. Implement separate certificate authorities with independent validation rules for each cloud environment.
- C. Use cloud provider default certificates with scheduled synchronization and localized renewal processes.
- **D. Deploy centralized certificate automation with standardized protocols and continuous monitoring.**

Answer: D

Explanation:

A centralized certificate automation approach reduces management overhead and security risks by standardizing processes, automating renewals, and continuously monitoring the certificate lifecycle.

Implementing a centralized certificate management approach with automation and continuous monitoring ensures optimal security while reducing operational complexity in hybrid environments.

NEW QUESTION # 18

When configuring Security policies on VM-Series firewalls, which set of actions will ensure the most comprehensive Security policy enforcement?

- **A. Configure policies using User-ID and App-ID, enable decryption, apply appropriate security profiles to rules, and update regularly with dynamic updates.**
- B. Configure port-based policies, check threat logs weekly, conduct software updates annually, and enable decryption.
- C. Configure a block policy for all malicious inbound traffic, configure an allow policy for all outbound traffic, and update

regularly with dynamic updates.

- D. Configure all default policies provided by the firewall, use Policy Optimizer, and adjust security rules after an incident occurs.

Answer: A

Explanation:

A comprehensive security approach uses:

- User-ID for identity-based policies
- App-ID for application-based security
- Decryption to inspect encrypted traffic
- Security profiles to enforce protections
- Dynamic updates to ensure up-to-date threat coverage

For comprehensive security, combine User-ID, App-ID, decryption, and security profiles. Keep the firewall updated with dynamic content updates to maintain the strongest security posture.

This ensures real-time, identity-aware, and application-centric security enforcement.

NEW QUESTION # 19

.....

If you still spend a lot of time studying and waiting for NetSec-Pro qualification examination, then you need our NetSec-Pro test prep, which can help solve all of the above problems. I can guarantee that our study materials will be your best choice. Our NetSec-Pro valid practice questions have three different versions, including the PDF version, the software version and the online version, to meet the different needs, our NetSec-Pro Study Materials have many advantages, and you can free download the demo of our NetSec-Pro exam questions to have a check.
