Besides, our Chrome-Enterprise-Administrator exam dumps are always checked to update to ensure the process of preparation smoothly. You can try our Chrome-Enterprise-Administrator Free Download study materials before you purchase. Please feel free to contact us if you have any questions about the Chrome-Enterprise-Administrator pass guide.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 2	• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 3	• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 4	• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.

Topic 5	• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.

Prepare for the Google Chrome-Enterprise-Administrator Exam on Any Device with Easy4Engine PDF Format

Our product boosts varied functions to be convenient for you to master the Chrome-Enterprise-Administrator training materials and get a good preparation for the exam and they include the self-learning function, the self-assessment function, the function to stimulate the exam and the timing function. We provide 24-hours online on Chrome-Enterprise-Administrator Guide prep customer service and the long-distance professional personnel assistance to for the client. If clients have any problems about our Chrome-Enterprise-Administrator study materials they can contact our customer service at any time.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q23-Q28):

NEW QUESTION # 23
The security team has a request to approve two extensions with similar functionality. They only want to approve one extension for use in the environment to avoid redundancy What is an objective measurement that the security team can use to help determine which extension may be safer to use?

- A. Chrome Web Store Ratings
- B. Permission Count
- C. Chrome Manifest Version
- D. 3rd Party Risk Score

Answer: D

Explanation:
A "3rd Party Risk Score" provides an objective assessment of the extension's security and privacy risks, often based on automated analysis of its code, requested permissions, developer reputation, and other factors. This is a more data-driven approach to evaluating safety compared to simply counting permissions (which doesn't account for the sensitivity of each permission), the Manifest version (which indicates features but not necessarily safety), or Chrome Web Store ratings (which are subjective and can be manipulated).

NEW QUESTION # 24
A browser administrator is looking to deploy Chrome Enterprise Core and build a configuration that supports both managed device browsers as well as managed profiles Company
- Employees
- Users
- Contractors
If this is the current organizational unit (OU) structure in the Google Admin console, which change should the administrator make to the structure to support the desired use case?

- A. Create a Managed Browsers OU nested under the Employees OU
- B. Create a Managed Browsers OU nested under the Contractors OU
- C. Create a Managed Browsers OU nested under the Users OU
- D. Create a Managed Browsers OU nested under the Company OU

Answer: D

Explanation:
To effectively manage both managed device browsers (which apply policies at the device level) and managed profiles (which apply

policies at the user profile level), creating a separate OU at the top level (under
"Company") or directly under it, specifically for "Managed Browsers," is the recommended approach. This allows for distinct policies tailored to the browser instance, regardless of the user signed in. Nesting under specific user OUs (Employees, Users, Contractors) would complicate the management of shared devices or scenarios where different user types might use the same managed browser.

NEW QUESTION # 25

An administrator is using Organizational Units (OU) to apply different Chrome browser settings to different types of devices The administrator needs to ensure that the browsers are placed in the correct OU Which token must the administrator generate and apply?

- A. Enrollment Token
- B. Browser Policy Token
- C. Cloud Management Token
- D. Device Management Token

Answer: A

Explanation:
The **Enrollment Token** is the key to associating a Chrome browser instance with a specific organizational unit (OU) in the Google Admin console during the enrollment process. By applying the correct enrollment token during setup, the browser will be placed in the designated OU and inherit the policies configured for that OU. Device Management Tokens are more relevant for ChromeOS devices. Browser Policy Tokens are not a standard term for OU assignment during enrollment. Cloud Management Token is a general term encompassing the enrollment process.

NEW QUESTION # 26

Users in the organization report that browsers force a restart after a new update has been downloaded, which interrupts their work day What could an engineer do to improve the experience while maintaining security?

- A. Change Chrome browser updates to only occur when a user checks
- B. Create a relaunch window in Relaunch notification
- C. Add a quiet period to the Relaunch notification
- D. Set the auto update check policy to occur during core work hours

Answer: B

Explanation:
To minimize disruption while ensuring updates are applied, an engineer can configure a "Relaunch window" in the Relaunch notification settings. This allows users to be prompted to restart within a specific timeframe that is less likely to interrupt their critical work hours, giving them more control over when the restart occurs after an update. Disabling automatic updates (option A) would compromise security. Adding a quiet period (option B) only suppresses notifications, not the forced restart. Setting the auto-update check policy to occur during core work hours (option C) affects when updates are downloaded, not when the restart occurs.

NEW QUESTION # 27

Which data point is available in the Chrome Versions report*?

- A. Active Browsers
- B. Inactive Browsers
- C. Total Browsers
- D. Last update

Answer: A

Explanation:
The Chrome Versions report specifically focuses on the distribution of different Chrome browser versions across the managed fleet. A key data point in this report is the number of "Active Browsers" on each version, allowing administrators to understand their update status and identify any significant fragmentation. While
"Total Browsers" might be a related metric, the core focus of the "Versions" report is on the active instances and their respective

versions. Information on "Inactive Browsers" or the "Last update" time for individual browsers might be found in other reports.

NEW QUESTION # 28
......

If you want to inspect the quality of our Chrome-Enterprise-Administrator Study Dumps, you can download our free dumps from Easy4Engine and go through them. The unique questions and answers will definitely impress you with the information packed in them and it will help you to take a decision in their favor.
