Practice C_SEC_2405 Tests - 100% Pass C_SEC_2405: SAP Certified Associate - Security Administrator First-grade Book Free

Now passing C_SEC_2405 exam is not easy, so choosing a good training tool is a guarantee of success to get the C_SEC_2405 certificate. If you choose our C_SEC_2405 exam materials, we will free update within one year after you purchase. That is to say we can ensure that we will provide you with exam information and exam practice questions and answers immediately. It can let you be fully prepared for exam, and almost have 100% pass rate of C_SEC_2405 Exam. We can not only allow you for the first time to participate in C_SEC_2405 exam to pass it successfully, but also help you save a lot of valuable. Don't miss such a good opportunity because of your hesitation.

SAP C_SEC_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.

Topic 2	• Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
Topic 3	• User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.

SAP Certified Associate - Security Administrator Sample Questions (Q52-Q57):

NEW QUESTION # 52

Which SAP Fiori deployment option requires the Cloud connector?

- A. SAP S/4HANA Cloud Public Edition
- B. SAP Business Technology Platform
- C. SAP S/4HANA embedded
- D. SAP Fiori for SAP S/4HANA standalone front-end server

Answer: B

Explanation:

The SAP Business Technology Platform (BTP) deployment option for SAP Fiori requires the Cloud connector. The Cloud connector serves as a secure tunnel between SAP BTP and on-premise systems, enabling Fiori apps hosted on BTP to access data and services from on-premise SAP S/4HANA or other systems. It ensures secure communication without exposing on-premise systems to the public internet, supporting hybrid scenarios. SAP S/4HANA Cloud Public Edition operates entirely in the cloud, not requiring the Cloud connector for Fiori access. SAP Fiori for SAP S/4HANA standalone front-end server and SAP S/4HANA embedded deployments typically run within the same system or network, using direct connections rather than the Cloud connector. By requiring the Cloud connector for BTP, SAP ensures secure and efficient integration of Fiori apps with on-premise back-ends, supporting flexible deployment models while maintaining robust security standards in hybrid cloud environments.

NEW QUESTION # 53

In which order do you define the security-relevant objects in SAP BTP?

- A. Role template
- B. Role3
- C. Role collection

Answer: A,B,C

NEW QUESTION # 54

Which of the following is part of the SAP S/4HANA central UI component?

- A. SAP Fiori launchpad
- B. SAP Fiori analytical application
- C. SAP Fiori transactional application
- D. SAP Fiori object page

Answer: A

Explanation:

The SAP Fiori launchpad is the central UI component in SAP S/4HANA, serving as the primary entry point for users to access Fiori applications. It provides a unified, role-based interface where users can navigate to transactional, analytical, or object page applications via tiles organized in catalogs and spaces. The launchpad integrates with the SAP Fiori infrastructure, ensuring consistent user experience and secure access to applications. SAP Fiori object pages, transactional applications, and analytical applications are

specific types of Fiori apps accessed through the launchpad, not central UI components themselves. The launchpad's role as the central hub supports personalized navigation, single sign-on, and application management, making it a cornerstone of the S/4HANA user interface. By centralizing access, the Fiori launchpad enhances usability and security, ensuring that users only interact with applications authorized by their roles, aligning with SAP's modern, user-centric design philosophy for enterprise systems.

NEW QUESTION # 55

Which limitations apply to restricted users in SAP HANA Cloud? Note: There are 3 correct answers to this question.

- A. They can only create objects in their own database schema.
- B. They can only connect to the database using HTTP/HTTPS.
- C. They cannot create objects in the database.
- D. They cannot connect via ODBC or JDBC.
- E. They only have full SQL access via the SQL console.

Answer: A,B,C

Explanation:

Restricted users in SAP HANA Cloud face several limitations to ensure secure and controlled access:

- * Schema Restriction (A): Restricted users are limited to creating objects within their own schema.
- * HTTP/HTTPS Connection (B): These users are restricted to connecting through HTTP/HTTPS protocols for enhanced security.
- * Object Creation Restriction (E): Restricted users do not have permissions to create database objects in general.

NEW QUESTION # 56

Which log types are available in the Administration Console of Cloud Identity Services? Note: There are 2 correct answers to this question.

- A. Usage logs
- B. Troubleshooting logs
- C. Performance logs
- D. Change logs

Answer: A,D

Explanation:

In the Administration Console of Cloud Identity Services, the following log types are available:

- * Change Logs (A): These logs capture all modifications made to configurations, user data, or system settings.
- * Usage Logs (D): Usage logs provide details on how the system is being utilized, including user access patterns and system resource usage.
