AZ-400 Pdf Torrent | AZ-400 Exam Collection

Regardless of your weak foundation or rich experience, AZ-400 exam torrent can bring you unexpected results. In the past, our passing rate has remained at 99%-100%. This is the most important reason why most candidates choose AZ-400 test guide. Failure to pass the exam will result in a full refund. But as long as you want to continue to take the Designing and Implementing Microsoft DevOps Solutions exam, we will not stop helping you until you win and pass the certification. In this age of the Internet, do you worry about receiving harassment of spam messages after you purchase a product, or discover that your product purchases or personal information are illegally used by other businesses? Please do not worry; we will always put the interests of customers in the first place, so AZ-400 Test Guide ensure that your information will not be leaked to any third party.

Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q197-Q202):

NEW QUESTION # 197

You have a project in Azure DevOps that contains a release pipeline. The pipeline contains two stages named QA and Prod. QA deploys code to an Azure web app named webapp1. Prod deploys code to an Azure web app named webapp2. You need to ensure that code deployments to webapp2 are blocked if Azure Application Insights generates Failed requests alerts following the deployment of new code to webapp1.

What should you do for each stage? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 198

You are using the Dependency Tracker extension in a project in Azure DevOps.

You generate a risk graph for the project.

What should you use in the risk graph to identify the number of dependencies and the risk level of the project? To answer, drag the appropriate elements to the correct data points. Each element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 199

You need to recommend a solution for deploying charts by using Helm and Tiller to Azure Kubernetes Service (AKS) in an RBAC-enabled cluster.

Which three commands should you recommend be run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Step 1: `kubectl create`

You can add a service account to Tiller using the `--service-account <NAME>` flag while you're configuring Helm (step 2 below). As a prerequisite, you'll have to create a role binding which specifies a role and a service account name that have been set up in advance.

Example: Service account with cluster-admin role

```
$ kubectl create -f rbac-config.yaml
```

```
serviceaccount "tiller" created
```

```
clusterrolebinding "tiller" created
```

```
$ helm init --service-account tiller
```

Step 2: `helm init`

To deploy a basic Tiller into an AKS cluster, use the `helm init` command.

Step 3: `helm install`

To install charts with Helm, use the `helm install` command and specify the name of the chart to install.

<https://docs.microsoft.com/en-us/azure/aks/kubernetes-helm>

https://docs.helm.sh/using_helm/#tiller-namespaces-and-rbac

NEW QUESTION # 200

You have a project in Azure DevOps.

You need to associate an automated test to a test case.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

□

The process to associate an automated test with a test case is:

Create a test project containing your automated test. What types of tests are supported?

Check your test project into an Azure DevOps or Team Foundation Server (TFS) repository.

Create a build pipeline for your project, ensuring that it contains the automated test. What are the differences if I am still using a XAML build?

Use Visual Studio Enterprise or Professional 2017 or a later version to associate the automated test with a test case as shown below. The test case must have been added to a test plan that uses the build you just defined.

Reference:

<https://docs.microsoft.com/en-us/azure/devops/test/associate-automated-test-with-test-case>

NEW QUESTION # 201

You are designing a configuration management solution to support five apps hosted on Azure App Service.

Each app is available in the following three environments: development, test, and production.

You need to recommend a configuration management solution that meets the following requirements:

Supports feature flags

Tracks configuration changes from the past 30 days

Stores hierarchically structured configuration values

Controls access to the configurations by using role-based access control (RBAC) permission Stores shared values as key/value pairs that can be used by all the apps Which Azure service should you recommend as the configuration management solution?

- A. Azure Key Vault
- B. Azure App Configuration
- C. Azure App Service
- D. Azure Cosmos DB

Answer: D

Explanation:

The Feature Manager in the Azure portal for App Configuration provides a UI for creating and managing the feature flags that you use in your applications.

App Configuration offers the following benefits:

A fully managed service that can be set up in minutes

Flexible key representations and mappings

Tagging with labels

Point-in-time replay of settings

Dedicated UI for feature flag management

Comparison of two sets of configurations on custom-defined dimensions

Enhanced security through Azure-managed identities

Encryption of sensitive information at rest and in transit

Native integration with popular frameworks

App Configuration complements Azure Key Vault, which is used to store application secrets.
