Exam FCSS_ADA_AR-6.7 Course & FCSS_ADA_AR-6.7 Latest Test Pdf

Our FCSS_ADA_AR-6.7 exam material boosts both the high passing rate which is about 98%-100% and the high hit rate to have few difficulties to pass the test. Our FCSS_ADA_AR-6.7 exam simulation is compiled based on the resources from the authorized experts' diligent working and the real exam and confer to the past years' exam papers thus they are very practical. The content of the questions and answers of FCSS_ADA_AR-6.7 Exam Questions is refined and focuses on the most important information. To let the clients be familiar with the atmosphere and pace of the real FCSS_ADA_AR-6.7 exam we provide the function of stimulating the exam.

Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q60-Q65):

NEW QUESTION # 60

What is the hourly bucket used in baselining?

- A. To store hourly baselines reports for every hour of the day during weekdays and weekends
- B. To store data for specific baselines during the weekend, if there is a spike in network activity

- C. To store data for specific baselines for every hour of the day during weekdays and weekends
- D. To store data for specific baselines during peak business hours of weekdays

Answer: C

Explanation:

In FortiSIEM baselining, an hourly bucket is used to maintain hourly-specific statistical baselines. This helps detect anomalies by comparing current activity against historical norms for each hour of the day, separately for weekdays and weekends.

The system maintains hourly profiles, ensuring that anomalies are detected based on similar timeframes. This approach prevents false positives due to natural variations in network activity across different times of the day and different days of the week.

NEW QUESTION # 61

Which two statements about the maximum device limit on FortiSIEM are true? (Choose two.)

- A. The device limit is defined for the whole system and is shared by every customer on a service provider edition.
- B. The device limit is defined per customer and every customer is assigned a fixed number of device limit by the service provider.
- C. The device limit is based on the license type that was purchased from Fortinet.
- D. The device limit is only applicable to enterprise edition.

Answer: B,C

NEW QUESTION # 62

Refer to the exhibit.

Within what time window is the incident auto cleared?

- A. 30 minutes
- B. 1 day
- C. Null
- D. 1800 seconds

Answer: C

Explanation:

In the exhibit, the "Clear If" condition does not specify a condition for auto-clearing the incident. If an incident does not have a specific clear condition, it remains active until manually resolved or cleared by another process.

NEW QUESTION # 63

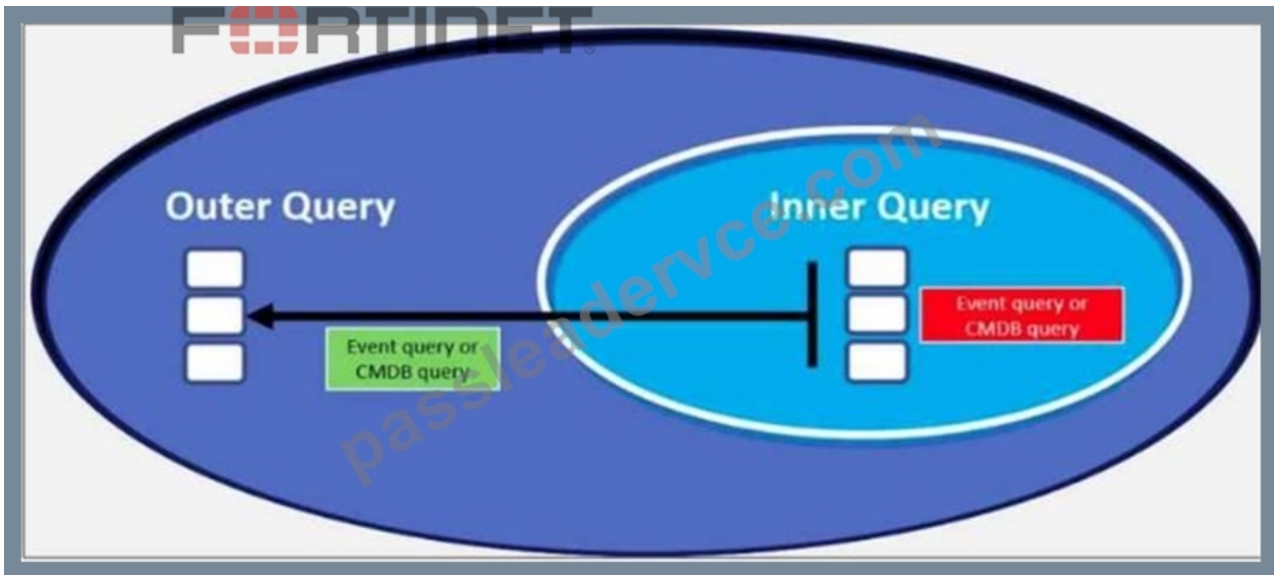

Which three processes are collector processes? (Choose three.)

- A. phRuleMaster
- B. phMonitorAgent
- C. phParser
- D. phAgentManager
- E. phReportMaster

Answer: B,C,D

NEW QUESTION # 64

Refer to the exhibit.

Which scenario is not a supported nested query scenario?

- A. The outer query is the event query, and the inner query is the event query.
- **B. The outer query is the CMDB query, and the inner query is the CMDB query.**
- C. The outer query is the event query, and the inner query is the CMDB query.
- D. The outer query is the CMDB query, and the inner query is the event query.

Answer: B

Explanation:

FortiSIEM does not allow CMDB queries to be nested within other CMDB queries. CMDB data is static information, and nesting would not add value or function properly in query execution.

NEW QUESTION # 65

.....

PassLeaderVCE provides with actual Fortinet FCSS_ADA_AR-6.7 exam dumps in PDF format. You can easily download and use FCSS_ADA_AR-6.7 PDF dumps on laptops, tablets, and smartphones. Our real FCSS_ADA_AR-6.7 dumps PDF is useful for applicants who don't have enough time to prepare for the examination. If you are a busy individual, you can use FCSS_ADA_AR-6.7 Pdf Dumps on the go and save time.
