It is known to us that getting the Deep-Security-Professional certification is not easy for a lot of people, but we are glad to tell you good news. The study materials from our company can help you get the Deep-Security-Professional certification in a short time. Now we are willing to introduce our Deep-Security-Professional practice questions to you in detail, we hope that you can spare your valuable time to have a look to our Deep-Security-Professional Exam questoins. Please believe that we will not let you down. You can just free download the demo of our Deep-Security-Professional training guide on the web to know the excellent quality.

Trend Deep-Security-Professional Exam is a certification offered by Trend Micro, a leading provider of cybersecurity solutions. Trend Micro Certified Professional for Deep Security certification is designed to validate the skills and knowledge of professionals who work with Trend Micro's Deep Security product. Deep Security is a comprehensive security platform that provides protection for virtual, cloud, and physical environments.

Trend Deep-Security-Professional certification is recognized globally and is highly respected in the IT industry. Trend Micro Certified Professional for Deep Security certification is an excellent way for IT professionals to demonstrate their proficiency in Trend Micro's security solutions and to enhance their career prospects. Trend Micro Certified Professional for Deep Security certification exam is designed to provide a comprehensive assessment of the candidate's knowledge of the product, and successful completion of the exam indicates that the candidate has a deep understanding of the product's functionality and can effectively deploy and manage it in an enterprise environment.

Real Deep-Security-Professional Testing Environment - New Deep-Security-Professional Exam Labs

Deep-Security-Professional study guide provides free trial services, so that you can gain some information about our study contents, topics and how to make full use of the software before purchasing. It's a good way for you to choose what kind of Deep-Security-Professional training prep is suitable and make the right choice to avoid unnecessary waste. Our purchase process is of the safety and stability if you have any trouble in the purchasing Deep-Security-Professional practice materials or trail process, you can contact us immediately.

Trend Deep-Security-Professional Certification Exam is a vendor-neutral certification that is recognized globally. Trend Micro Certified Professional for Deep Security certification demonstrates a professional's ability to deploy and manage Trend Micro's Deep Security solution to protect against advanced threats and attacks. Trend Micro Certified Professional for Deep Security certification exam includes hands-on tasks that test a professional's ability to configure and manage Deep Security, as well as multiple-choice questions that assess their knowledge of the product.

Trend Micro Certified Professional for Deep Security Sample Questions (Q22-Q27):

NEW QUESTION # 22
The details of a policy are displayed in the exhibit. Based on these details, which of the following statements is true?

☐

- A. Packets failing the Network Packet Sanity Check will still be allowed to pass through the network engine.
- B. Any events generated by computers within your corporate network, as defined by an IP address range, will be ignored
- C. The credibility scores for visited web sites will be cached. If access to the web site is re-quested again within 30 minutes, its credibility score will be retrieved from the cache instead of the configured Smart Protection source.
- D. Live packet streams coming through the network engine will be replicated and all traffic analysis will be performed on the replicated stream

Answer: C

NEW QUESTION # 23
Which of the following statements is true regarding Intrusion Prevention rules?

- A. Intrusion Prevention rules can block unrecognized software from executing.
- B. Intrusion Prevention rules can detect or block traffic associated with specific applica-tions, such as Skype or file-sharing utilities.
- C. Intrusion Prevention rules check for the IP addresses of known malicious senders within a packet
- D. Intrusion Prevention rules monitor the system for changes to a baseline configuration.

Answer: B

Explanation:
Intrusion Prevention rules (IPS) are designed to analyze network traffic and can include rules that detect or block traffic from specific applications, such as Skype, file sharing, and other protocols.
Option A is incorrect: Blocking unrecognized software is done by Application Control.
Option B is partially correct but is typically handled by the firewall; IPS focuses more on signatures and payload inspection.
Option D is incorrect: Monitoring system configuration is done by Integrity Monitoring.
From the official documentation:
"Intrusion Prevention rules can control or block application protocols (such as Skype, BitTorrent, file-sharing utilities) as well as detect exploits and attacks." References:
Trend Micro Deep Security 20 LTS Administrator's Guide: Intrusion Prevention Module Deep Security Help: IPS Rules for Application Control

NEW QUESTION # 24
What is IntelliScan?

- A. IntelliScan reduces the risk of viruses entering your network by blocking real-time compressed executable files and pairs them with other characteristics to improve mal-ware catch rates.
- B. IntelliScan is a mechanism that improves scanning performance. It recognizes files that have already been scanned based on a digital fingerprint of the file.
- C. IntelliScan is a malware scanning method that monitors process memory in real time. It can identify known malicious processes and terminate them.
- D. IntelliScan is a method of identifying which files are subject to malware scanning as determined from the file content. It uses the file header to verify the true file type.

Answer: D

NEW QUESTION # 25
Which of the following statements correctly describes Smart Folders?

- A. Smart Folders are a collection of subfolders containing the policy settings that are ap-plied to child policies or directly to Computers.

- B. Smart Folders are the containers used to store the results of Recommendation Scans. Once a Recommendation Scan has completed, and administrator can click a Smart Folder and select which of the recommended rules to apply.
- C. Smart Folders identify the folders that will be scanned when a Real-Time, Manual or Scheduled malware scan is run.
- D. Smart Folders act as a saved search of computers which is executed each time the folder is clicked to display its contents.

Answer: D

Explanation:
Smart Folders are used to group your computers dynamically. The computers displayed in a Smart Folder are determined by a set of custom rules, that act as a saved search which is executed each time you click on the folder to display its contents. This allows administrators to easily filter and group computers by these defined properties.
Explication: Study Guide - page (127)

NEW QUESTION # 26
Which of the following statements is true regarding software inventories used as part of the Application Control Protection Module?

- A. An administrator can share the inventory of allowed software with other computers protected by Deep Security Agents, by copying the inventory database file (ac.db) from the source computer.
- B. An administrator can view the list of allowed of software in the inventory from the De-tails tab for each individual Computer.
- C. When an administrator allows software that would be otherwise blocked by the En-forcement Mode, it isn't added to the inventory of approved software. Instead, it is added to that computer's white list.
- D. Disable the Application Control Protection Module when installing software upgrades, otherwise, the new software will be prevented from installing.

Answer: C
