

C_CPI_2506 Prüfungsvorbereitung, C_CPI_2506 Probesfragen

P.S. Kostenlose 2025 SAP C_CPI_2506 Prüfungsfragen sind auf Google Drive freigegeben von DeutschPrüfung verfügbar:
<https://drive.google.com/open?id=17XFpwJqF5cTbq3sacciJo-6ByQVs3o8->

Wir hoffen, dass sich alle Ihrer in der SAP C_CPI_2506 Prüfungssoftware gesetzten Erwartungen erfüllen können. Die Vollständigkeit und Autorität der Test-Bank, Vielfältigkeit der Versionen von Unterlagen--- Es gibt 3 Versionen, nämlich PDF, Online Test Engine und Practice Testing Engine, und auch die kostenlose Demo und einjährige Aktualisierung der SAP C_CPI_2506 Software, alles enthält unsere herzlichste Anstrengungen!

Machen Sie sich noch Sorgen um die schwere SAP C_CPI_2506 Zertifizierungsprüfung? Keine Sorgen. Mit den Schulungsunterlagen zur SAP C_CPI_2506 Zertifizierungsprüfung von DeutschPrüfung ist jede IT-Zertifizierung einfacher geworden. Die Schulungsunterlagen zur SAP C_CPI_2506 Zertifizierungsprüfung von DeutschPrüfung sind der Vorläufer für die SAP C_CPI_2506 Zertifizierungsprüfung.

C_CPI_2506 Dumps und Test Überprüfungen sind die beste Wahl für Ihre SAP C_CPI_2506 Testvorbereitung

Sind Sie mit Ihrer Arbeit zufrieden? Sind Sie damit Zufrieden, was Sie jetzt machen? Wollen Sie Ihre Arbeitsfähigkeit erhöhen? Dann müssen Sie zuerst mehr nützliche Fähigkeiten für Ihre Arbeit beherrschen. Und das wichtigste ist, dass Arbeitsgeber wissen, Sie mehr Arbeitsfähigkeiten beherrschen. Dann legen Sie SAP C_CPI_2506 Prüfung ab. C_CPI_2506 Prüfung kann Ihren Wunsch erreichen. Und es macht nichts, wenn Sie die Prüfungsfragen nicht genug kennen, weil Sie die Hilfe und die Vorbereitungswerkzeuge an DeutschPrüfung finden können. Die Prüfungsfragen und-antworten können Ihnen helfen, SAP C_CPI_2506 Zertifikat zu bekommen.

SAP C_CPI_2506 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Thema 2	• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.

Thema 3	Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Thema 4	SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

SAP Certified Associate - Integration Developer C_CPI_2506 Prüfungsfragen mit Lösungen (Q51-Q56):

51. Frage

From which of the following can you create an API proxy directly? Note: There are 2 correct answers to this question.

- A. API provider
- B. S/4HANA API
- C. Open Connectors
- D. Source URL

Antwort: A,D

Begründung:

In SAP API Management (part of Integration Suite), an API Proxy acts as a facade for a backend service. You can create an API proxy directly from:

API Provider # An API provider represents the backend system (e.g., SAP S/4HANA, SAP Gateway, third-party services). Proxies can be generated from these providers.

Source URL # You can directly specify the backend system's endpoint URL, and an API proxy will be generated from it.

Other options:

Open Connectors # Provides harmonized APIs to third-party apps (e.g., Salesforce, HubSpot), but you don't create proxies directly from them.

S/4HANA API # While S/4HANA APIs can be exposed, they are typically accessed via an API Provider or URL, not directly listed as a creation source.

52. Frage

You have set up an integration process to use a SOAP adapter. Which event allows you to run the integration flow directly after deployment?

- A. End Event
- B. Start Event
- C. Start Message
- D. End Message

Antwort: C

Begründung:

A Start Message event allows you to run the integration flow directly after deployment. A Start Message event is triggered when a message arrives at the integration flow through an inbound channel, such as a SOAP adapter. You can use a Start Message event to initiate an integration process based on a message input. Reference: Modernize Integration with SAP Integration Suite | openSAP

53. Frage

Which of the following capabilities within SAP Integration Suite are core for integration? Note: There are 3 correct answers to this question.

- A. Integration Assessment

- B. Open Connectors
- C. Integration Advisor
- **D. API Management**
- **E. Cloud Integration**

Antwort: A,D,E

Begründung:

The following capabilities within SAP Integration Suite are core for integration: Integration Assessment, Cloud Integration, and API Management. Integration Assessment allows you to evaluate your integration landscape and strategy and identify the best-fit integration technologies and tools for your scenarios. Cloud Integration allows you to design, deploy, and monitor integration flows between cloud and on-premise systems using various adapters and protocols. API Management allows you to create, publish, secure, and monitor APIs across different environments and platforms. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

54. Frage

To activate the Event Mesh (EMIS) capability in the SAP Integration Suite, which role collections must be assigned to the user performing the activation?

- A. API_Manager and Monitoring-Viewer
- B. Integration_Administrator and Security_Auditor
- **C. Integration_Provisioner and Subaccount Administrator**
- D. Process_orchestrator and Subaccount_Viewor

Antwort: C

Begründung:

To activate Event Mesh (EMIS) capability in SAP Integration Suite, the required role collections are:

Integration_Provisioner # Allows provisioning of new capabilities (including Event Mesh) in Integration Suite.

Subaccount Administrator # Grants permission to manage and configure subaccount-level entitlements and service activations.

Other options:

Integration_Administrator, API_Manager, Monitoring_Viewor # Used for operational tasks, not provisioning.

Process_orchestrator # Refers to on-premise PI/PO, not BTP roles.

Security_Auditor # Auditing role, not activation.

Thus, the correct roles are Integration_Provisioner and Subaccount Administrator.

55. Frage

What do you use in an integration flow to handle unexpected errors?

- A. Status code checks
- B. Try-catch subprocesses
- **C. Exception-handling subprocesses**
- D. Exception handler integration flow elements

Antwort: C

Begründung:

In SAP Cloud Integration (part of Integration Suite), error handling within integration flows is implemented using:

Exception Subprocesses # Dedicated subprocesses triggered by an Error Start Event to handle unexpected runtime exceptions.

These allow logging, error notifications, or compensating logic.

Other options:

Try-Catch subprocesses # Not a modeling construct in SAP CPI.

Exception handler integration flow elements # Not a standard artifact; error handling is done with exception subprocesses.

Status code checks # Useful for response validation but not full error handling.

Thus, the correct answer is Exception-handling subprocesses.

56. Frage
