

3V0-32.23 Latest Exam Materials | 3V0-32.23 Training Pdf

VMware 3V0-32.23 Certification Details	
Exam Code	3V0-32.23
Full Exam Name	VMware Cloud Management and Automation Advanced Design
No. of Questions	60
Online Practice Exam	VMware Certified Advanced Professional - Cloud Management and Automation Design 2023 (VCAP-CMA Design 2023) Practice Test
Sample Questions	VMware 3V0-32.23 Sample Questions
Passing Score	300 / 500
Time Limit	145 minutes
Exam Fees	\$450 USD
Become successful with VMEexam.com	

2026 Latest Itbraindumps 3V0-32.23 PDF Dumps and 3V0-32.23 Exam Engine Free Share: https://drive.google.com/open?id=1rp_J6c-36b-WRiM5bk1Dy6i4cAPfHaCW

Our system is high effective and competent. After the clients pay successfully for the 3V0-32.23 certification material the system will send the products to the clients by the mails. The clients click on the links in the mails and then they can use the 3V0-32.23 prep guide dump immediately. Our system provides safe purchase procedures to the clients and we guarantee the system won't bring the virus to the clients' computers and the successful payment for our 3V0-32.23 learning file. Our system is strictly protect the clients' privacy and sets strict interception procedures to forestall the disclosure of the clients' private important information. Our system will automatically send the updates of the 3V0-32.23 learning file to the clients as soon as the updates are available. So our system is wonderful.

Itbraindumps has created budget-friendly 3V0-32.23 study guides because the registration price for the VMware certification exam is already high. You won't ever need to look up information in various books because our VMware 3V0-32.23 Real Questions are created with that in mind. Additionally, in the event that the curriculum of VMware changes, we provide free upgrades for up to three months.

Free PDF 3V0-32.23 - High Hit-Rate Cloud Management and Automation Advanced Design Latest Exam Materials

There is no denying the fact that everyone in the world wants to find a better job to improve the quality of life. Generally speaking, these jobs are offered only by some well-known companies. In order to enter these famous companies, we must try our best to get some certificates as proof of our ability such as the 3V0-32.23 Certification. Nowadays, the 3V0-32.23 certification has been one of the criteria for many companies to recruit employees. And in order to obtain the 3V0-32.23 certification, taking the 3V0-32.23 exam becomes essential.

VMware 3V0-32.23 exam covers a wide range of topics related to cloud management and automation, including designing and implementing VMware vRealize Automation solutions, designing and implementing VMware vRealize Operations Manager solutions, designing and implementing VMware vRealize Suite Lifecycle Manager solutions, and designing and implementing VMware vRealize Log Insight solutions. Additionally, the exam tests the candidate's knowledge of integrating VMware solutions with third-party systems, designing and implementing security solutions for VMware environments, and designing and implementing disaster recovery solutions using VMware technologies.

VMware 3V0-32.23 Certification Exam is a highly specialized certification that focuses on Cloud Management and Automation Advanced Design. It is intended for IT professionals who are looking to deepen their knowledge of cloud management and automation technologies, as well as those who are looking to validate their skills and expertise in this area.

VMware Cloud Management and Automation Advanced Design Sample Questions (Q150-Q155):

NEW QUESTION # 150

When completing a VMware Identity Manager (Workspace ONE Access) physical design, what key design decision(s) should be addressed?

- A. Defining company mission statements
- B. Choosing office artwork
- C. Planning secure user authentication and access management processes
- D. Selecting employee training topics

Answer: C

NEW QUESTION # 151

A financial services company has mandated that all IP and DNS entries be allocated from an existing third-party IPAM solution. Also, for auditing purposes, all systems must handle user authentication via the existing open source LDAP directory. When considering a logical design for this scenario, which is true about the dependency relationships of these systems?

- A. The LDAP system is an upstream dependency and the IPAM system is a downstream dependency of vRealize Automation.
- B. Both the IPAM and LDAP systems are external, upstream dependencies of vRealize Automation.
- C. The LDAP system is an upstream dependency and the IPAM system is a downstream dependency of vRealize Automation.
- D. Both the IPAM and LDAP systems are external, downstream dependencies of vRealize Automation.

Answer: D

NEW QUESTION # 152

A development team would like to ensure that provisioned machines automatically update a customer asset database (CMDB) resource that is managed by the domain administration team. All updates to the CMDB must be communicated to members of the domain administration team. An XaaS workflow has been written to interact with the asset database. Which scenario satisfies the remaining requirements?

- A. Configure an approval policy with a post-approval level that notifies the domain administration team when the workflow has run.
- B. Design an Event Broker event that triggers when the workflow is run and automatically runs a notification scenario informing the domain administration team and allows them to authorize.
- C. Include an email notification and user input workflow in the XaaS workflow that applies to domain administrator members for authorizing the update.
- D. Include an email notification workflow in the XaaS workflow that sends an update email to the domain administration team.

Answer: D

NEW QUESTION # 153

An architect is designing the VMware Aria Operations component of a Cloud Management solution. The following information has been provided by the customer:

The solution must support the monitoring of virtual machines across three physical sites.

The latency between each physical site is less than 10 ms.

The solution must be resilient to a site failure.

The solution should be resilient to a failure within a site.

Which two design decisions should the architect document to meet the requirements? (Choose two.)

- A. The VMware Aria Operations cluster should be deployed across all clusters using vSphere Fault Tolerance
- B. All VMware Aria Operations components should reside on clusters configured for vSphere Fault Tolerance
- C. The VMware Aria Operations cluster should be deployed across all sites using Continuous Availability
- D. The VMware Aria Operations cluster should be deployed across all sites using vSphere High Availability
- E. The VMware Aria Operations cluster should be deployed in each site using High Availability

Answer: C,E

Explanation:

Continuous Availability enables a single resilient cluster across multiple sites, protecting against site failure with low latency (<10 ms). Alternatively, deploying a separate cluster in each site with High Availability protects against failures within each site. Both approaches satisfy the requirements for resilience at both site and node levels.

NEW QUESTION # 154

The architect for a teaching hospital is planning the deployment of a highly-distributed cloud management platform based on VMware vRealize Automation. The design must ensure that all virtual machines should be setup in a prescribed order. vSphere 6.5 will be used as the deployment platform.

vSphere Availability VM Groups and VM Rules will be used.

The design will use vRealize Orchestrator embedded in the vRealize Automation Appliances. Place the virtual machine groups in the correct start-up order.

Virtual Machine Groups

vRealize Automation IaaS Managers

vRealize Automation IaaS Web Servers

External vRealize Automation Database Server (Microsoft SQL Server)

vRealize Automation IaaS DEM Workers

vRealize Automation Virtual Appliances

Correct Order

Answer:

Explanation:

Virtual Machine Groups	Correct Order
vRealize Automation IaaS Managers	External vRealize Automation Database Server (Microsoft SQL Server)
vRealize Automation IaaS Web Servers	vRealize Automation Virtual Appliances
External vRealize Automation Database Server (Microsoft SQL Server)	vRealize Automation IaaS Web Servers
vRealize Automation IaaS DEM Workers	vRealize Automation IaaS Managers
vRealize Automation Virtual Appliances	vRealize Automation IaaS DEM Workers

NEW QUESTION # 155

.....

If you want to get 3V0-32.23 certification, you may need to spend a lot of time and energy. With our 3V0-32.23 study materials, you can save a lot of time and effort. We know that you must have a lot of other things to do, and our 3V0-32.23 learning guide will relieve your concerns in some ways. We can claim that if you study with our 3V0-32.23 practice engine for 20 to 30 hours, you will be confident to pass the exam by the first attempt.
