Questions

Web-based software works without installation. FCSS - Security Operations 7.4 Analyst exam practice test software works on all well-known browsers, including Chrome, Firefox, Safari, and Opera. Trust Actualtests4sure - Fortinet FCSS_SOC_AN-7.4 exam preparation products and be prepared for the FCSS - Security Operations 7.4 Analyst at your home. Preparing and testing yourself, again and again, can be nerve-wracking, so in this scenario, we provide a Fortinet FCSS_SOC_AN-7.4 PDF for exam preparation.

Fortinet FCSS - Security Operations 7.4 Analyst Sample Questions (Q65-Q70):

NEW QUESTION # 65

Which feature should be prioritized when configuring collectors in a high-traffic network environment?

- A. Low-latency data processing
- B. High-frequency log rotation
- C. Aesthetic interface adjustments
- D. Periodic storage expansion

Answer: A

NEW QUESTION # 66

Configuring playbook triggers correctly is crucial for which aspect of SOC automation?

- A. Automating responses to detected incidents based on predefined conditions
- B. Making sure that SOC analysts are kept busy
- C. Ensuring that all security incidents receive a human response
- D. Increasing the manual tasks in the SOC

Answer: A

NEW QUESTION # 67

Review the following incident report:

Attackers leveraged a phishing email campaign targeting your employees.

The email likely impersonated a trusted source, such as the IT department, and requested login credentials.

An unsuspecting employee clicked a malicious link in the email, leading to the download and execution of a Remote Access Trojan (RAT).

The RAT provided the attackers with remote access and a foothold in the compromised system.

Which two MITRE ATT&CK tactics does this incident report capture? (Choose two.)

- A. Initial Access
- B. Defense Evasion
- C. Lateral Movement
- D. Persistence

Answer: A,D

Explanation:

Understanding the MITRE ATT&CK Tactics:

The MITRE ATT&CK framework categorizes various tactics and techniques used by adversaries to achieve their objectives.

Tactics represent the objectives of an attack, while techniques represent how those objectives are achieved.

Analyzing the Incident Report:

Phishing Email Campaign: This tactic is commonly used for gaining initial access to a system. Malicious Link and RAT Download: Clicking a malicious link and downloading a RAT is indicative of establishing initial access.

Remote Access Trojan (RAT): Once installed, the RAT allows attackers to maintain access over an extended period, which is a persistence tactic.

Mapping to MITRE ATT&CK Tactics:

Initial Access:

This tactic covers techniques used to gain an initial foothold within a network.

Techniques include phishing and exploiting external remote services.

The phishing campaign and malicious link click fit this category.

Persistence:

This tactic includes methods that adversaries use to maintain their foothold.

Techniques include installing malware that can survive reboots and persist on the system

The RAT provides persistent remote access, fitting this tactic.

Exclusions:

Defense Evasion:

This involves techniques to avoid detection and evade defenses.

While potentially relevant in a broader context, the incident report does not specifically describe actions taken to evade defenses.

Lateral Movement:

This involves moving through the network to other systems.

The report does not indicate actions beyond initial access and maintaining that access.

Conclusion:

The incident report captures the tactics of Initial Access and Persistence.

Reference: MITRE ATT&CK Framework documentation on Initial Access and Persistence tactics.

Incident analysis and mapping to MITRE ATT&CK tactics.

NEW QUESTION # 68

Which of the following are critical when analyzing and managing events and incidents in a SOC?

(Choose Two)

- A. Immediate escalation for all alerts
- B. Immediate escalation for all alerts
- C. Rapid identification of false positives
- D. Periodic system downtime for maintenance

Answer: A,C

NEW QUESTION # 69

What should be a priority when configuring playbook tasks to ensure effective SOC automation?

- A. Aligning tasks with the specific stages of incident response
- B. Limiting tasks to non-critical alerts
- C. Making tasks visible to external stakeholders
- D. Ensuring tasks are scheduled during office hours only

Answer: A

NEW QUESTION # 70
