F3 Trainingsunterlagen - F3 Testengine

Wir sollen im Leben nicht immer etwas von anderen fordern, wir sollen hingegen so denken, was ich für andere tun kann. In der Arbeit können Sie große Gewinne für den Boss bringen, legt der Boss natürlich großen Wert auf Ihre Position sowie Gehalt. Wenn wir ein kleiner Angestellter sind, werden wir sicher eines Tages ausrangiert. Wir sollen uns bemühen, die CIMA F3 Zertifizierung zu bekommen und Schritt für Schritt nach oben gehen. Die Fragen und Antworten zur CIMA F3 Zertifizierungsprüfung von EchteFrage helfen Ihnen, den Erfolg durch eine Abkürzung zu erlangen. Viele IT-Fachleute haben die Fragenkataloge zur CIMA F3 Prüfung von EchteFrage gekauft.

Um sich auf die CIMA CIMAPRA19-F03-1 Prüfung vorzubereiten, müssen Kandidaten eine starke Finanz- und Buchhaltungshintergrund haben. Sie sollten ein gründliches Verständnis von Finanztheorien, Modellen und Strategien haben. Darüber hinaus sollten die Kandidaten praktische Erfahrungen in der Entwicklung und Umsetzung von Finanzstrategien für Organisationen haben. Um die Prüfung zu bestehen, sollten die Kandidaten umfassende Studien und Prüfungsvorbereitungen durchführen, einschließlich des Besuchs von Schulungen, des Lesens von Studienmaterialien und des Übens von vergangenen Prüfungsfragen.

CIMA F3 Financial Strategy F3 Prüfungsfragen mit Lösungen (Q363-Q368):

363. Frage

Select the most appropriate dividend for each of the following statements:

Only pay a dividend once all positive NPV projects have been funded.

Investors prefer a predictable cash flow.

May create volatile dividend movements.

Stable growth

Residual policy

Constant payout ratio

Antwort:

Begründung:

364. Frage

A company based in Country D, whose currency is the D\$, has an objective of maintaining an operating profit margin of at least 10% each year.

Relevant data:

- * The company makes sales to Country E whose currency is the E\$. It also makes sales to Country F whose currency is the F\$.
- * All purchases are from Country G whose currency is the G\$.
- * The settlement of all transactions is in the currency of the customer or supplier.

Which of the following changes would be most likely to help the company achieve its objective?

- A. The D\$ strengthens against the G\$ over time.
- B. The D\$ strengthens against the E\$ over time.
- C. The D\$ weakens against the G\$ over time.
- D. The F\$ weakens against the D\$ over time.

Antwort: A

Begründung:

Revenues are in E\$ and F\$, costs are in G\$, and reporting currency is D\$.

If the D\$ strengthens against G\$ (option C), then G\$ costs translate into fewer D\$, so reported costs fall and operating profit margin improves.

A stronger D\$ against E\$ or F\$ (A or B) reduces the D\$ value of sales, hurting margins.

A weaker D\$ against G\$ (D) makes G\$-denominated costs more expensive in D\$, also hurting margins.

So the change that most helps maintain/improve margin is C.

365. Frage

Which THREE of the following statements are correct in respect of the issuance of debt securities.

- A. The redemption yield on a corporate bond can be determined by calculating the internal rate of return based on the cash flows arising during the duration of the bond.
- B. A bond issuer must appoint at least one market-maker to ensure that there is a liquid market in its traded bonds.
- C. A corporate entity coming to the bond market for the first time will find it easier to issue corporate bonds than to arrange a

conventional term loan.

- **D. Governments are the most frequent issuers of bonds and the proceeds are used to fund government expenditure or service the national debt.**
- E. Investors in traded bonds have an ownership (or equity stake) in the company which issued the bonds.

Antwort: A,B,D

Begründung:

A). "A bond issuer must appoint at least one market-maker..." - TRUE (in exam context) On public bond markets, an issuer typically works with one or more banks/dealers as market-makers. Their role is to quote buy and sell prices and help ensure liquidity so investors can trade in and out. From an exam perspective, this is treated as a standard feature of traded corporate/government bonds.

B). "The redemption yield... can be determined by calculating the internal rate of return..." - TRUE The redemption yield (yield to maturity) is exactly the IRR of the bond's cash flows (all coupon payments plus redemption amount) based on the current market price. That's standard CIMA F3 territory.

C). "Investors in traded bonds have an ownership stake..." - FALSE

Bondholders are creditors, not owners. They have a contractual right to interest and principal, but no equity participation, voting rights, or residual claim (except in liquidation after other priorities).

D). "A first-time bond issuer will find it easier to issue bonds than arrange a conventional term loan." - FALSE It's usually the opposite. For a new issuer, arranging a bank term loan is typically quicker and simpler than accessing the bond market, which involves credit ratings, documentation, listing and investor marketing.

E). "Governments are the most frequent issuers of bonds..." - TRUE

Governments regularly issue sovereign bonds (treasuries, gilts, etc.) both to finance spending and to roll over existing national debt.

This is exactly how public deficits are funded in practice and is a standard statement in financial strategy texts.

Hence: A, B and E.

366. Frage

A company is in the process of issuing a 10 year \$100 million bond and is considering using an interest rate swap to change the interest profile on some or all of the \$100 million new finance.

The company has a target fixed versus floating rate debt profile of 1:1. Before issuing the bond its debt profile was as follows:

Floating rate bank borrowing	\$200 million
Fixed rate bond	\$200 million
Total	\$400 million

Which of the following is the most appropriate interest rate swap structure for the company?

- A. Pay fixed receive floating interest rate swap for \$50 million.
- **B. Receive fixed pay floating interest rate swap for \$50 million.**
- C. Receive fixed pay floating interest rate swap for \$100 million.
- D. Pay fixed receive floating interest rate swap for \$100 million.

Antwort: B

367. Frage

A project requires an initial outlay of \$2 million which can be financed with either a bank loan or finance lease.

The company will be responsible for annual maintenance under either option.

The tax regime is:

* Tax depreciation allowances can be claimed on purchased assets.

* If leased using a finance lease, tax relief can be claimed on the interest element of the lease payments and also on the accounting depreciation charge.

The trainee management accountant has begun evaluating the lease versus buy decision and has produced the following data. He is not confident that all this information is relevant to this decision.

	\$000
Salvage value at the end of the project	20
Lease payments	2,200
Tax relief on full lease payment	550
Tax relief on interest element of lease payments	200
Tax relief on tax depreciation allowances	450
Tax relief on accounting depreciation charge	400
Maintenance charges	100

Using only the relevant data, which of the following is correct?

- A. The bank loan is \$30,000 MORE expensive than the finance lease.
- B. The bank loan is \$20,000 LESS expensive than the finance lease.
- C. The bank loan is \$70,000 LESS expensive than the finance lease.
- D. The bank loan is \$120,000 LESS expensive than the finance lease.

Antwort: C
