Huawei H12-841_V1.5 Useful Dumps & H12-841_V1.5 Pass Exam

We assure that you can not only purchase high-quality H12-841_V1.5 prep guide but also gain great courage & trust from us. A lot of online education platform resources need to be provided by the user registration to use after purchase, but it is simple on our website. We provide free demo of H12-841_V1.5 guide torrent, you can download any time without registering. Fast delivery—after payment you can receive our H12-841_V1.5 Exam Torrent no more than 10 minutes, so that you can learn fast and efficiently. Besides, we provide 24*365 online service and remote professional staff to guide you about downloading or using our H12-841_V1.5 exam torrent. Still other more service terms are waiting for your experience. Why don't you try and purchase our H12-

841_V1.5 prep guide?

Huawei HCIP-Datacom-Campus Network Planning and Deployment V1.5 Sample Questions (Q82-Q87):

NEW QUESTION # 82
(In Huawei's free mobility solution, if one device functions as both an authentication point and a policy enforcement point, the administrator needs to subscribe to IP-security group entries to view user information.)

- A. TRUE
- B. FALSE

Answer: B

Explanation:
In Huawei's free mobility solution based on iMaster NCE-Campus, the method used for obtaining IP-security group entries depends on whether the device acts as an authentication point, a policy enforcement point, or both. When a devicefunctions as both an authentication point and a policy enforcement point, it can directly obtain user identity information during the authentication process. According to HCIP Datacom Campus Network documentation, when authentication occurs on a device, that device locally learns user identity attributes such as IP address, security group, and access policy. In this scenario, the device doesnot need to subscribeto IP-security group entries from iMaster NCE-Campus in order to view or use user information. iMaster NCE-Campus proactively delivers relevant policy and security group information to the device as part of centralized control and coordination. IP-security group entrysubscriptionis required only when the policy enforcement point isnotthe authentication point. In that case, the enforcement device must subscribe to IP-security group entries or receive them from the authentication device to correctly enforce policies.
Because the device in this scenario performs both authentication and enforcement roles, user information is directly available without subscription. Therefore, the statement claiming that administrators must subscribe to IP-security group entries to view user information is incorrect.
Hence, the correct answer isFALSE, which aligns with Huawei free mobility operational principles defined in HCIP Datacom Campus Network materials.

NEW QUESTION # 83
In the OSPF protocol for wide area networks, what is the function of Type 7 LSA (NSSA External LSA)?

- A. Transmit external AS routes throughout the entire OSPF Autonomous System without translation.
- B. Transfer summarized routes between areas to reduce routing table entries.
- C. When transmitting external routes from an AS within an NSSA area, the ABR must convert them to Type 5 LSA before transmitting them to other areas.
- D. Transmit link-state information between routers within the area.

Answer: C

NEW QUESTION # 84
In troubleshooting MPLS VPN networks, if you need to "view the forwarding information of the MPLS public network label on the PE device (such as label value, outgoing interface)," which of the following commands should you use?

- A. display mpls lsp
- B. Display OSPF peer
- C. display ip routing-table vpn -instance
- D. display bgp vpnv4 all routes

Answer: A

NEW QUESTION # 85
In Huawei's WAN bandwidth optimization solution, for "cross-regional web browsing traffic (HTTP/HTTPS)," which of the following technologies can "accelerate webpage loading speed and reduce waiting time"?

- A. Edge caching of static web page resources (such as images and JS files cached to edge nodes).
- B. Directly transmit webpage data without any optimization.
- C. Only increase link bandwidth without optimizing web page transmission mechanisms.
- D. Reduce webpage resolution, sacrificing display quality for speed.

Answer: A

NEW QUESTION # 86
Which of the following are core functions of Huawei's SD-WAN iMaster NCE-WAN management platform, supporting the full lifecycle management of SD-WAN networks? (Multiple choice)

- A. Real-time network performance monitoring and alerts (e.g., link latency, application bandwidth usage)
- B. Only supports manual configuration via command line; no visual management is available.
- C. No alarm mechanism; faults require manual inspection to detect.
- D. Automatic network topology discovery and visualization
- E. Batch distribution of configuration templates (e.g., unified configuration for branch devices)

Answer: A,D,E

NEW QUESTION # 87
.....

By reviewing these results, you will be able to know and remove your mistakes. These H12-841_V1.5 practice exams are created as per the pattern of the HCIP-Datacom-Campus Network Planning and Deployment V1.5 (H12-841_V1.5) real examination. Therefore, HCIP-Datacom-Campus Network Planning and Deployment V1.5 (H12-841_V1.5) mock exam takers will experience the real exam environment. It will calm down their nerves so they can appear in the H12-841_V1.5 final test without anxiety or fear.
