BCS Foundation Certificate in Business Analysis V4.0 Sample Questions (Q46-Q51):

NEW QUESTION # 46

A use case Place Order must always invoke a related use case Check Credit.
How is the association between the two use cases shown?

- A. By a broken, arrowed line stereotyped with the word <>
- B. By a broken, arrowed line stereotyped with the word <>.
- **C. By a broken, arrowed line stereotyped with the word <>.**
- D. By a solid line with no arrowhead or stereotype.

Answer: C

NEW QUESTION # 47

Which of the following statements about the scenario analysis investigation technique is FALSE?

- **A. Helps prepare the scripts that will be used to test the delivered solution.**
- B. Helps identify tacit knowledge used in business practice.
- C. Provides a broad view of the business area under investigation.
- D. Provides a basis for developing subsequent prototypes.

Answer: A

Explanation:

Scenario analysis is an investigation technique used to explore and evaluate potential future scenarios or situations. It helps stakeholders understand how different factors might impact a business area or process.

Key Characteristics of Scenario Analysis:

Broad View: Scenario analysis provides a comprehensive understanding of the business area by considering multiple possible outcomes.

Prototyping Basis: The insights gained from scenario analysis can inform the development of prototypes.

Tacit Knowledge Identification: By exploring real-world scenarios, it helps uncover implicit knowledge embedded in business practices.

Testing Scripts: Scenario analysis is not directly involved in preparing test scripts, which are typically created during the testing phase.

Evaluation of Each Option:

A . Provides a broad view of the business area under investigation:

Scenario analysis evaluates multiple possibilities, offering a broad perspective.

Conclusion: This is true .

B . Provides a basis for developing subsequent prototypes:

Insights from scenario analysis can guide prototype development.

Conclusion: This is true .

C . Helps identify tacit knowledge used in business practice:

Exploring scenarios uncovers hidden knowledge and practices.

Conclusion: This is true .

D . Helps prepare the scripts that will be used to test the delivered solution:

Preparing test scripts is part of testing activities, not scenario analysis.

Conclusion: This is false .

NEW QUESTION # 48

The horizontal bar of the T-shaped professional describes what?

- **A. The multi-disciplinary breadth of skill and knowledge**
- B. The variants of a business analyst.
- C. Professional techniques of a business analyst.
- D. The deep and specific domain knowledge

Answer: A

Explanation:

The T-shaped professional model is used in business analysis to describe the ideal mix of skills and knowledge. The 'T' shape consists of a vertical bar and a horizontal bar. The vertical bar represents the deep and specific domain knowledge or core expertise

(e.g., business analysis techniques, specific industry knowledge). The horizontal bar (the top of the 'T') represents the multi-disciplinary breadth of skill and knowledge that an individual can apply to various situations. This breadth includes soft skills like communication, facilitation, leadership, and a broad understanding of different business areas (like finance, operations, IT, and strategy). It is this breadth that allows the business analyst to collaborate effectively across different teams and disciplines, understand the context of the change, and recommend truly holistic solutions.
