With the Salesforce CRT-211 valid dumps, you can easily prepare well for the actual Certification Preparation for Advanced Administrator exam at home.

## Salesforce Certification Preparation for Advanced Administrator Sample Questions (Q95-Q100):

### NEW QUESTION # 95

The administrator of Universal Containers is testing an approval process in a recently refreshed Developer Pro sandbox and is finding that none of the notification emails are being sent to the approvers. Which two reasons could be the cause? Choose 2 Answers

- A. The Deliverability Access Level setting is incorrect.
- B. HTML templates are not available in sandboxes.
- C. The email addresses for the users are incorrect.
- D. Workflow emails only work in Full sandboxes.

**Answer: A,C**

### NEW QUESTION # 96

Sales management wants a small subset of users with different profiles and roles to be able to view all data for compliance purposes. How can an administrator meet this requirement?

- A. Assign delegated administrator to the subset of users to View All Data.
- **B. Create a permission set with the View All Data permission for the subset of users.**
- C. Enable the View All Data permission for the roles of the subset of users.
- D. Create a new profile and role for the subset of users with the View All Data permission.

**Answer: B**

Explanation:

A permission set is a collection of settings and permissions that give users access to various tools and functions. The View All Data permission allows users to view all data, regardless of sharing settings. By creating a permission set with this permission and assigning it to the subset of users, the administrator can meet the requirement without changing their profiles or roles. References:

**NEW QUESTION # 97**

An administrator is asked to create a report to calculate the year-over-year change in the dollar amount of a company's opportunities.

What reporting tool should be used to complete this request?

- A. A row-level formula to compare amounts grouped by year.
- B. A custom summary formula with PARENTGROUPVAL function
- C. A joined report with two report blocks for each year
- **D. A custom summary formula with the PREVGROUPVAL function.**

**Answer: D**

Explanation:

A custom summary formula is a formula that calculates values from summary fields in reports such as sums, averages, counts, etc. Custom summary formulas can use functions such as PREVGROUPVAL which returns the value of a field from the previous row at the same grouping level. By using a custom summary formula with the PREVGROUPVAL function, an administrator can create a report to calculate the year-over-year change in the dollar amount of a company's opportunities by subtracting the amount from the previous year from the amount from the current year and dividing by the amount from the previous year. **NEW QUESTION # 98**

Ursa Major Solar has a junction object that connects Docs with Solar Panels. The administrator needs users to be able to see all the solar panels that a Dot is related to. Users already have access to the Dot and the Junction, but not the Solar Panel object.

What access does the user need to be able to see the solar panel records?

- A. Read permission is required on both master records.
- B. Access permission is not required on either master record.
- **C. Read permission is required on at least one master record.**
- D. Create permission is required on both master records.

**Answer: C**

Explanation:

To access a junction object record, a user needs to have at least read permission on one of its master records and on the junction object itself. If the user does not have access to either master record, they cannot access the junction object record. If the user has access to both master records, they can access the junction object record with the most permissive access level of either master record. ## NEW QUESTION # 99

Cloud Kicks has Service and Sales Manager roles that need to be able to see all Accounts. Currently, they each have their own custom profile. The organization-wide defaults are set to Private and a sharing rule share access to Accounts to the sales and service teams based on criteria.

What should the administrator do to allow the service and sales Manager to see all Accounts?

- A. Create a permission set with view All to Accounts and assign it to the Service and Sales Managers.
- B. Set the organization-wide default for Accounts to Public Read Only.
- C. Move the Service and Sales Managers higher in the role hierarchy.
- D. Configure a custom profile for each manager that gives them view All on Accounts.

**Answer: A**

## NEW QUESTION # 100

.....
