

Wir machen 1Z0-1042-25 leichter zu bestehen!

Übrigens, Sie können die vollständige Version der Zertpruefung 1Z0-1042-25 Prüfungsfragen aus dem Cloud-Speicher herunterladen: https://drive.google.com/open?id=1BbENoP_n06q7bYEK4faSO1HdzaH-E44K

Die hervorragende Qualität von Oracle 1Z0-1042-25 garantiert den guten Ruf der Zertpruefung. Dank erlässliches Kundendienstes behalten wir viele Stammkunden. Viele davon haben Oracle 1Z0-1042-25 Prüfungssoftware benutzt. Diese gut gekaufte Software ist eine unserer ausgezeichneten Produkte. Oracle 1Z0-1042-25 Prüfung ist heutzutage sehr populär, weil das Zertifikat eine bedeutende Rolle in Ihrem Berufsleben im IT-Bereich spielt. Jetzt können Sie auf unserer offiziellen Webseite die neuesten Informationen über Oracle 1Z0-1042-25 erfahren!

Haben Sie gedacht, wie Oracle 1Z0-1042-25 Zertifizierungsprüfung leicht bestehen? Haben Sie die Geräte finden? Wenn nein, erkläre ich zu Ihnen. Es gibt viele Methoden, die 1Z0-1042-25 Prüfung zu bestehen. Sehr fleißig die entsprechenden Bücher zu lesen, ist eine Methode. Machen Sie jetzt das? Aber diese Methode kostet dich viel Zeit und kann den Erfolg vielleicht nicht erreichen. Und Gibt es nicht genug Zeit für Sie, wenn Sie sich mit der Arbeit sehr beschäftigt sind? Lassen Sie Oracle 1Z0-1042-25

Dumps probieren. Diese Unterlagen können den Erfolg erreichen, woran Sie nicht glauben könnten.

1Z0-1042-25 Übungsmaterialien & 1Z0-1042-25 realer Test & 1Z0-1042-25 Testvorbereitung

Sie brauchen nicht so viel Geld und Zeit, nur ungefähr 30 Stunden spezielle Ausbildung, dann können Sie ganz einfach die Oracle 1Z0-1042-25 Zertifizierungsprüfung nur einmalig bestehen. Zertpruefung bietet Ihnen die Prüfungsthemen, deren Ähnlichkeit mit den realen Prüfungsübungen sehr groß ist.

Oracle 1Z0-1042-25 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.
Thema 2	Using OIC Connections & Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.
Thema 3	Creating Orchestrated Integrations: This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.
Thema 4	Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.
Thema 5	Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.

Oracle Cloud Infrastructure 2025 Application Integration Professional 1Z0-1042-25 Prüfungsfragen mit Lösungen (Q39-Q44):

39. Frage

You are an Oracle Integration Cloud (OIC) specialist working on a project to integrate two systems using OIC. During testing, you notice that the integration instance fails to execute and returns an error message.

Which step would you take first to troubleshoot the issue?

- A. Increase the number of instances to handle the error.
- B. Check the instance logs for specific error messages and details.**
- C. Contact Oracle Support and wait for a response.
- D. Immediately restart the integration instance.

Antwort: B

Begründung:

Comprehensive and Detailed Explanation:

Troubleshooting in OIC begins with diagnostics:

Option A: Checking instance logs (via the Monitoring or Activity Stream page) provides detailed error messages, stack traces, and context- the first logical step.

Option B: Increasing instances addresses scalability, not root cause identification.

Option C: Restarting might clear transient issues but skips understanding the failure.

Option D: Contacting support is a later step after initial investigation.

Logs are the primary tool for pinpointing issues efficiently.

40. Frage

You are tasked with creating a new integration in OIC that will be exposed to clients as a SOAP web service. In addition, this integration will be invoking an external SOAP web service as part of the orchestration flow logic.

In your creation of these SOAP adapter connection components, which is a valid consideration?

- A. The SAML and OAuth security policies are available options for creating either the inbound Trigger connection or the outbound Invoke connection configurations.
- **B. Suppress insertion of timestamp into the request and Ignore timestamp in the response message are optional fields only for the outbound Invoke connection configuration.**
- C. The WSDL URL property value can be defined by uploading a file for either the inbound Trigger connection or the outbound Invoke connection configurations.
- D. You must explicitly specify the target server TLS version for the external web service outbound Invoke connection configuration.

Antwort: B

Begründung:

For outbound SOAP Invoke connections, options like "Suppress insertion of timestamp into the request" and "Ignore timestamp in the response message" allow managing timestamps in SOAP messages. These options are relevant only for outbound configurations, not for inbound triggers.

41. Frage

As an Oracle Integration Cloud (OIC) specialist, you are tasked with implementing a scheduled integration between two enterprise applications. The client requires that the integration be run every weekday at 3:00 PM to synchronize data between the systems.

Which advanced scheduling configuration expression will you use?

- A. "FREQ=WEEKLY;BYDAY=MO,TU,WE,TH,FR;BYHOUR=15"
- **B. "FREQ=DAILY;BYDAY=MO-FR;BYHOUR=15"**
- C. "FREQ=WEEKLY;BYDAY=MO-FR;BYHOUR=15"
- D. "FREQ=DAILY;BYDAY!=SA,SU;BYHOUR=15"

Antwort: B

Begründung:

This expression specifies a daily frequency with a restriction to weekdays (Monday through Friday) at 3:00 PM, which matches the requirement.

42. Frage

You can group one or more Oracle Integration Cloud (OIC) integrations into a single structure called a package. Which statement is not true about OIC packages?

- A. New packages can be created by clicking the Create button on the packages page in the OIC console.
- B. You can import packages directly from the Oracle Marketplace.
- C. All packages must include at least one integration.
- D. Integrations do not need to be part of a package.
- E. Packages enable you to easily import and export a group of integrations to and from OIC.
- **F. Packages cannot be locked to deny other users access to your integrations.**

Antwort: F

Begründung:

Comprehensive and Detailed Explanation:

OIC packages are logical containers for grouping related integrations, facilitating management, export/import, and deployment. Let's dissect each option with in-depth analysis:

Option A: All packages must include at least one integration.

True: A package in OIC is meaningless without integrations. When you create a package, it's a prerequisite to associate at least one integration with it, either during creation or afterward. For example, if you're building a payroll processing suite, the package would include integrations for employee data sync, payment processing, etc. An empty package serves no purpose and isn't allowed in practice.

Option B: You can import packages directly from the Oracle Marketplace.

True: The Oracle Marketplace offers prebuilt integration packages (e.g., for connecting Oracle ERP to third-party apps). These can be imported into your OIC instance, saving development time. For instance, a Salesforce-to-Oracle HCM package could be downloaded and customized. This aligns with OIC's ecosystem approach to accelerate adoption.

Option C: Packages cannot be locked to deny other users access to your integrations.

False (Not True): Packages can be locked in OIC to restrict editing or access by other users, enhancing security and version control. Locking prevents unintended modifications, especially in collaborative environments. For example, a production-ready payroll package might be locked to ensure stability. The ability to lock is a feature in the OIC console under package management, making this statement incorrect and thus the answer.

Option D: New packages can be created by clicking the Create button on the packages page in the OIC console.

True: In the OIC console, navigating to the Packages page reveals a "Create" button. Clicking it initiates the package creation process, where you define a name, identifier, and optionally add integrations. This user-friendly interface simplifies grouping—for example, creating a "CustomerSyncPackage" for CRM integrations.

Option E: Integrations do not need to be part of a package.

True: Integrations can exist independently in OIC without being packaged. This flexibility suits standalone workflows, like a one-off file transfer integration, versus grouped processes like an end-to-end order management suite.

Option F: Packages enable you to easily import and export a group of integrations to and from OIC.

True: Packages streamline migration by exporting multiple integrations as a single PAR (Package Archive) file. For instance, exporting a package with five HR integrations to another OIC instance ensures consistency and reduces manual effort compared to exporting individual IAR files.

Why C is the answer: The ability to lock packages contradicts option C, making it the only untrue statement.

Locking is a critical feature for governance, especially in enterprise settings where multiple developers work concurrently.

Use Case Example: Imagine a team deploying a locked "OrderProcessingPackage" to production—locking prevents accidental changes, ensuring reliability.

43. Frage

Which two statements are true regarding messaging adapters in Oracle Integration Cloud?

- A. It is not mandatory to install a Connectivity agent to use the OCI Streaming Adapter for inbound polling.
- **B. The Apache Kafka adapter can be configured to support Transactions in case of Producer.**
- **C. Both the Apache Kafka and OCI Streaming adapter support XML, JSON, and Avro message formats.**
- D. The OCI Streaming Adapter does not support consuming messages from a specified consumer group.

Antwort: B,C

Begründung:

Both Apache Kafka and OCI Streaming adapters support various message formats like XML, JSON, and Avro. The Apache Kafka adapter also supports transactional messaging for producers.

44. Frage

.....

Wollen Sie Ihre IT-Fähigkeiten beweisen? Möchten Sie mehr Anerkennung und Berufschancen bekommen? Die Prüfungszertifizierung der Oracle 1Z0-1042-25 ist ein bedeutendster Ausweis für Sie. Die Wichtigkeit der Zertifizierung der Oracle 1Z0-1042-25 wissen fast alle Angestellte aus IT-Branche. Die Tatkraft von Menschen ist limitiert. Wenn Sie in einer kurzen Zeit diese wichtige Oracle 1Z0-1042-25 Prüfung bestehen möchten, brauchen Sie unsere die Prüfungssoftware von uns Zertprüfung als Ihr bester Helfer für die Prüfungsvorbereitung. Umfassende Prüfungsaufgaben enthaltende und Mnemotechnik entsprechende Software kann Ihnen beim Erfolg der Oracle 1Z0-1042-25 gut helfen!
