The Certified Production and HPE6-A88 certification is a valuable credential earned by individuals to validate their skills and competence to perform certain job tasks. Your HPE Aruba Networking ClearPass Exam HPE6-A88 Certification is usually displayed as proof that you've been trained, educated, and prepared to meet the specific requirement for your professional role.

HPE Aruba Networking ClearPass Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

A company is deploying new Cisco switches and wants to use SNMP enforcement for VLAN assignments. What requirement must be met for SNMP enforcement to work correctly in this scenario?

- A. Vendor-specific attributes must be used for enforcement.
- **B. SNMP services must be enabled on the Cisco switches.**
- C. Downloadable enforcement must be enabled for all devices.

Answer: B

Explanation:

For SNMP enforcement to function properly, SNMP services must be enabled on the Cisco switches. This allows ClearPass to communicate with the switches and dynamically apply VLAN assignments or other enforcement actions based on authentication and policy decisions.

NEW QUESTION # 12

To enhance the guest login experience, an administrator is configuring the Pre-Authentication Check on an Aruba controller. Where should the administrator edit these settings?

- A. In the certificate management section of the controller interface.
- **B. In the Login Form section of the web login page editor.**
- C. In the network policies section of the controller.

Answer: B

Explanation:

Pre-Authentication Check behavior is controlled within the web login page configuration. Editing the Login Form section allows the administrator to define checks and logic that occur before credentials are submitted, improving the guest login experience.

NEW QUESTION # 13

Why would an administrator use Downloadable User Roles (DUR) in a ClearPass-Aruba environment?

Response:

- A. To centralize user credentials in ClearPass
- B. To monitor active directory group usage
- **C. To enforce access policies dynamically at the network edge**
- D. To simplify AP configuration across sites

Answer: C

NEW QUESTION # 14

When managing network access through ClearPass, an administrator notices that client status changes are causing repeated disconnections and re-authentications. The administrator wants to prevent the service from making the same enforcement decision without considering newly gathered information. What action should the administrator take?

- A. Select the option 'Use Cached Results' on the enforcement tab.
- **B. Enable automatic endpoint reconciliation.**
- C. Increase the timeout period for client re-authentication.

Answer: B

Explanation:

Enabling automatic endpoint reconciliation ensures that ClearPass updates endpoint attributes dynamically as new information is gathered. This prevents repeated disconnections and redundant enforcement decisions by allowing ClearPass to adapt to the latest endpoint context without reapplying identical policies unnecessarily.

NEW QUESTION # 15

An IT professional is setting up a Pre-Authentication Check using RADIUS. They need to ensure that the same service will authenticate the user to the Network Access Device (NAD). What is a crucial step they must take to configure this correctly?

- A. Use a different authentication protocol for the NAD.
- **B. Configure the RADIUS server to process the Pre-Authentication Check and the NAD authentication request.**
- C. Set up a separate RADIUS server to handle the Pre-Authentication Check.

Answer: B

Explanation:

The RADIUS server must be configured to handle both the Pre-Authentication Check and the Network Access Device (NAD) authentication request within the same service. This ensures that the same authentication policies, credentials, and authorization logic are consistently applied to both stages of the connection process.

NEW QUESTION # 16

.....

The third format is desktop HPE6-A88 practice exam software that can be accessed easily after installing it on your Windows PC or Laptop. These formats are there so that the students can use them as per their unique needs and prepare successfully for HPE6-A88 the on first try.
