C_SIGDA_2403: SAP Certified Associate - Process Data Analyst - SAP Signavio–First-grade Exam Course

P.S. Free & New C_SIGDA_2403 dumps are available on Google Drive shared by ITdumpsfree: <https://drive.google.com/open?id=13kzyR7webzsRxgZbQU5Jl43wX1rFbayy>

As you know, it is not easy to be famous among a lot of the similar companies. Fortunately, we have survived and developed well. So our company has been regarded as the most excellent seller of the C_SIGDA_2403 learning materials. We positively assume the social responsibility and manufacture the high quality C_SIGDA_2403 study braindumps for our customers. And with the best C_SIGDA_2403 training guide and the best services, we will never be proud to do better in this career.

SAP C_SIGDA_2403 Exam Syllabus Topics:

Topic	Details
Topic 1	• Plug & Gain: In this topic, you encounter questions about sub-topics of pain and gain.
Topic 2	• SiGNAL: This topic explains how to use SiGNAL as query language. It also discusses how process data and analyze it in more depth.
Topic 3	• SAP Signavio Process Insights: The topic gives insights into SAP Signavio Process.
Topic 4	• Business Process Management: There are different areas of business process management. This topic explains those areas and also discusses the process levels and its architecture.
Topic 5	• SAP Signavio Process Collaboration Hub: By covering this topic, you learn how to navigate through different process information and collaborate with other business users. Lastly, the topic delves into this navigation to share feedback on process content.
Topic 6	• Process Mining: Its primary focus is discussing fundamentals of process mining. Furthermore, the topic explores pointing out the basic data requirements in process mining projects.

100% Pass Quiz SAP - C_SIGDA_2403 Pass-Sure Free Pdf Guide

ITdumpsfree believes in customer satisfaction and strives hard to make the entire SAP C_SIGDA_2403 exam preparation process simple, smart, and successful. To achieve this objective the ITdumpsfree is offering the top-rated and real C_SIGDA_2403 exam questions in three different C_SIGDA_2403 Exam study material formats. These C_SIGDA_2403 exam questions formats are

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q24-Q29):

NEW QUESTION # 24

What color have blockers that have an information purpose?

- A. Red
- **B. Blue**
- C. Green
- D. White

Answer: B

NEW QUESTION # 25

How can a metric be created in SAP Signavio Process Intelligence? Note: There are 3 correct answers to this question.

- **A. Create a custom metric**
- B. Upload logic from a Widget
- C. Import a metric from SAP Signavio Process Manager
- **D. Import a metric based on a JSON file**
- **E. Add a metric from the library**

Answer: A,D,E

Explanation:

Metrics in SAP Signavio Process Intelligence are used to quantify process performance, such as cycle time or error rates. The documentation outlines the methods for creating metrics:

- * Exact Extract:"Metrics can be created in SAP Signavio Process Intelligence by:
- * Importing metrics based on JSON files to define complex calculations.
- * Creating custom metrics using the metric editor to specify calculations based on event log data.
- * Adding predefined metrics from the metric library for common KPIs." (SAP Signavio Process Intelligence User Guide, section on "Metric Creation").

* Explanation:

* Option A (Import a metric based on a JSON file):Users can import metric definitions in JSON format, allowing for complex or predefined calculations to be reused across investigations.

* Option B (Create a custom metric):The metric editor enables users to define custom metrics by specifying calculations, such as averaging cycle times or counting specific events, tailored to the analysis needs.

* Option E (Add a metric from the library):The metric library provides a set of predefined metrics (e.g., total case count, average duration) that can be added directly to an investigation.

* Option C (Upload logic from a Widget)is incorrect as widgets display metrics but do not provide logic for creating new metrics.

* Option D (Import a metric from SAP Signavio Process Manager)is incorrect because Process Manager focuses on process modeling, not metric creation, and metrics are defined within Process Intelligence.

Reference:SAP Signavio Process Intelligence User Guide, section on "Metric Creation"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Metrics and KPIs.

NEW QUESTION # 26

What are some benefits of the comment function in the SAP Signavio Process Collaboration Hub?Note: There are 2correct answers to this question.

- **A. Optimization can be achieved much faster.**
- B. Add relevant attributes directly through the comment function.
- **C. Include all employees in process performances and reviews.**
- D. Edit and publish processes immediately.

Answer: A,C

Explanation:

The comment function within the SAP Signavio Process Collaboration Hub offers several benefits, primarily aimed at enhancing collaboration and optimization. Firstly, it allows for the inclusion of all employees in process performance reviews and discussions, thereby fostering a culture of continuous improvement and engagement across the organization. Secondly, optimization processes can be significantly accelerated as feedback and suggestions are gathered and acted upon swiftly. This function does not, however, directly enable users to edit and publish processes (which is more aligned with the administrative rights within the tool) or to add relevant attributes directly through the comment function, as attributes are typically managed within the process modeling environment. References: SAP Signavio Documentation

NEW QUESTION # 27

Which of the following Widgets need to be linked to a process model to provide insights? Note: There are 3 correct answers to this question.

- A. Diagram
- B. Variant Explorer
- C. Process Discovery
- D. Process Funnel
- E. Process Conformance

Answer: A,D,E

Explanation:

Certain widgets in SAP Signavio Process Intelligence require a link to a process model (e.g., a BPMN model) to generate meaningful insights by contextualizing data against a defined structure. The documentation specifies:

* Option A (Diagram): The Diagram Widget displays process models from the SAP Signavio Process Manager workspace and requires a link to a specific model to visualize it in the Collaboration Hub or Process Intelligence.

* Option D (Process Funnel): The Process Funnel Widget visualizes case progression along a process path and often needs to be linked to a process model to define the steps in the funnel, ensuring accurate representation of the process flow.

* Option E (Process Conformance): The Process Conformance Widget compares actual process execution against a reference BPMN model, requiring a direct link to the model to identify conformance issues.

* Option B (Process Discovery) is incorrect because it generates process models automatically from event logs without needing a predefined process model.

Reference: SAP Signavio Process Intelligence Widget Documentation, section on "Widget Configuration and Model Linking"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Widget and Model Integration.

NEW QUESTION # 28

What is the benefit of the Over Time Widget?

- A. It visualizes the process flow in a certain timeframe.
- B. It visualizes selected case attributes for a given period.
- C. It visualizes the variants of a period.
- D. It visualizes how KPI's are calculated in a certain timeframe.

Answer: B

Explanation:

The Over Time Widget in SAP Signavio provides valuable insights by visualizing selected case attributes over a defined period. The correct answer is:

* Option C (It visualizes selected case attributes for a given period.): This widget allows users to select specific case attributes and visualize how these attributes change over time. It's particularly useful for tracking the performance of processes, identifying trends, and making data-driven decisions to optimize process efficiency.
