This greatly improves the students' availability of fragmented time. You can also have a quite enjoyable experience with APP online version of our C\_S4CPB\_2508 Study Materials. Just have a try on this version of our C\_S4CPB\_2508 learning guide!

### SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q25-Q30):

#### NEW QUESTION # 25

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Maintain restrictions
- B. Maintain technical catalogs
- C. Assign PFCG profiles to a business role
- D. Assign business catalogs to a business role

**Answer: A,D**

#### NEW QUESTION # 26

Which of the following systems are used to implement SAP S/4HANA Cloud Public Edition for a customer? Note: There are 3 correct answers to this question.

- A. Sandbox system
- B. Starter system
- C. Development system
- D. Test system
- E. Trial system

**Answer: A,B,D**

Explanation:

\* Sandbox system: This is an optional system that can be used to explore the SAP S/4HANA Cloud Public Edition capabilities and features before the implementation project starts. It is not connected to the starter system or the test system and does not have any data migration or configuration tools. It can be refreshed on demand by the customer1.

\* Starter system: This is the first system that is provisioned for the customer after the contract is signed.

It is used to perform the fit-to-standard workshops, where the customer validates the standard processes and identifies the gaps and requirements. It also serves as the configuration system, where the customer configures the business processes using the SAP Central Business Configuration tool. The starter system is connected to the test system and can transfer the configuration and master data to it2.

\* Test system: This is the second system that is provisioned for the customer after the starter system is configured. It is used to perform the integration testing, user acceptance testing, data migration, and cutover activities. It also serves as the production

system, where the customer runs the live business processes after the go-live. The test system is connected to the starter system and can receive the configuration and master data from it<sup>3</sup>.

The systems that are not used to implement SAP S/4HANA Cloud Public Edition for a customer are:

\* Trial system: This is a system that can be used to experience the SAP S/4HANA Cloud Public Edition solution for a limited time. It is not connected to any other system and does not have any data migration or configuration tools. It is not part of the implementation project and does not require a contract<sup>4</sup>.

\* Development system: This is a system that can be used to develop custom applications or extensions using the SAP Business Technology Platform. It is not part of the SAP S/4HANA Cloud Public Edition landscape and does not have any data migration or configuration tools. It requires a separate contract and license.

### NEW QUESTION # 27

Which solution is designed to help customers understand their environmental, social, and governance (ESG) data?

- A. SAP Green Token
- B. SAP Responsible Design and Production
- C. SAP Sustainability Footprint Management
- **D. SAP Sustainability Control Tower**

**Answer: D**

Explanation:

SAP Sustainability Control Tower is a cloud-based solution that enables customers to record, report, and act on their ESG data. It provides a comprehensive and consistent view of the ESG performance across the enterprise and the value chain. It also supports automated, auditable, and compliant reporting based on global standards and frameworks. SAP Sustainability Control Tower helps customers to embed sustainability into their core business processes and make balanced decisions that support their sustainability goals. References = SAP S/4HANA Cloud, Public Edition - All Learning Journeys > Implementing SAP S/4HANA Cloud Public Edition > Unit 3: Sustainability and ESG Reporting > Topic 3.1: Introduction to SAP Sustainability Control Tower. SAP Cloud for Sustainable Enterprises: Taking Action Together. SAP Sustainability Control Tower: Data Foundation for ESG.

### NEW QUESTION # 28

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, where do you look next?

- **A. SAP Business Accelerator Hub**
- B. SAP Discovery Center
- C. SAP Business Technology Platform
- D. SAP Cloud ALM

**Answer: A**

Explanation:

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, you should look next at the SAP Business Accelerator Hub. The SAP Business Accelerator Hub is a central repository of integration content that can help you to connect SAP S/4HANA Cloud Public Edition with other SAP and non-SAP applications. You can browse, search, and filter the available integration packages, scenarios, and APIs, and access the relevant documentation and configuration guides<sup>1</sup>. The SAP Business Accelerator Hub also provides links to the SAP Integration Suite tools, such as SAP Cloud Integration, SAP API Management, and SAP Cloud Integration Automation Service, that you can use to implement and manage the integrations<sup>2</sup>.

The other options are not the correct places to look for integration requirements. SAP Discovery Center is a portal that helps you to discover, try, and buy SAP solutions and services<sup>3</sup>. SAP Business Technology Platform is a platform that enables you to extend, integrate, and build applications in the cloud<sup>4</sup>. SAP Cloud ALM is a cloud-based application lifecycle management tool that supports you in implementing, operating, and enhancing your cloud solutions<sup>5</sup>.
