

Quiz Authoritative Google - Professional-Cloud-Database-Engineer - Test Google Cloud Certified - Professional Cloud Database Engineer Centres

P.S. Free 2025 Google Professional-Cloud-Database-Engineer dumps are available on Google Drive shared by PrepAwayPDF: <https://drive.google.com/open?id=1oamJspJjkGpdNDge0mtVh61SHYrdKZse>

Each of us expects to have a well-paid job, with their own hands to fight their own future. But many people are not confident, because they lack the ability to stand out among many competitors. Now, our latest Professional-Cloud-Database-Engineer exam dump can help you. It can let users in the shortest possible time to master the most important test difficulties, improve learning efficiency. Also, by studying hard, passing a qualifying examination and obtaining a Professional-Cloud-Database-Engineer certificate is no longer a dream. With these conditions, you will be able to stand out from the interview and get the job you've been waiting for. However, in the real time employment process, users also need to continue to learn to enrich themselves. To learn our Professional-Cloud-Database-Engineer practice materials, victory is at hand.

Google Professional-Cloud-Database-Engineer certification exam is designed to test the skills and knowledge of professionals who are responsible for designing, building, and maintaining cloud-based database solutions. Google Cloud Certified - Professional Cloud Database Engineer certification is aimed at individuals who have experience in database administration, data management, and cloud computing. Professional-Cloud-Database-Engineer Exam is designed to test your knowledge of Google Cloud Platform's database services, including Cloud SQL, Bigtable, and Spanner.

Google Cloud Certified - Professional Cloud Database Engineer Valid Exam Reference & Professional-Cloud-Database-Engineer Free Training Pdf & Google Cloud Certified - Professional Cloud Database Engineer Latest Practice Questions

PrepAwayPDF trained experts have made sure to help the potential applicants of Google Professional-Cloud-Database-Engineer certification to pass their Google Professional-Cloud-Database-Engineer exam on the first try. Our PDF format carries real Google Professional-Cloud-Database-Engineer Exam Dumps. You can use this format of Google Professional-Cloud-Database-Engineer actual questions on your smart devices.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q75-Q80):

NEW QUESTION # 75

Your team uses thousands of connected IoT devices to collect device maintenance data for your oil and gas customers in real time. You want to design inspection routines, device repair, and replacement schedules based on insights gathered from the data produced by these devices. You need a managed solution that is highly scalable, supports a multi-cloud strategy, and offers low latency for these IoT devices. What should you do?

- A. Use Cloud Spanner with Data Studio.
- **B. Use MongoDB Atlas with Charts.**
- C. Use Bigtable with Looker.
- D. Use Firestore with Looker.

Answer: B

Explanation:

This scenario has BigTable written all over it - large amounts of data from many devices to be analysed in realtime. I would even argue it could qualify as a multicloud solution, given the links to HBASE. BUT it does not support SQL queries and is not therefore compatible (on its own) with Looker. Firestore + Looker has the same problem. Spanner + Data Studio is at least a compatible pairing, but I agree with others that it doesn't fit this use-case - not least because it's Google-native. By contrast, MongoDB Atlas is a managed solution (just not by Google) which is compatible with the proposed reporting tool (Mongo's own Charts), it's specifically designed for this type of solution and of course it can run on any cloud.

NEW QUESTION # 76

Your company is shutting down their data center and migrating several MySQL and PostgreSQL databases to Google Cloud. Your database operations team is severely constrained by ongoing production releases and the lack of capacity for additional on-premises backups. You want to ensure that the scheduled migrations happen with minimal downtime and that the Google Cloud databases stay in sync with the on-premises data changes until the applications can cut over. What should you do? (Choose two.)

- A. Use Database Migration Service to migrate the databases to Cloud SQL.
- B. Use an external read replica to migrate the databases to Cloud SQL.
- **C. Use replication from an external server to migrate the databases to Cloud SQL.**
- D. Use a cross-region read replica to migrate the databases to Cloud SQL.
- **E. Use a read replica to migrate the databases to Cloud SQL.**

Answer: C,E

NEW QUESTION # 77

Your customer has a global chat application that uses a multi-regional Cloud Spanner instance. The application has recently experienced degraded performance after a new version of the application was launched. Your customer asked you for assistance. During initial troubleshooting, you observed high read latency. What should you do?

- A. Use SQL statements to analyze SPANNER_SYS.QUERY_STATS* tables.

- B. Use query parameters to speed up frequently executed queries.
- **C. Change the Cloud Spanner configuration from multi-region to single region.**
- D. Use SQL statements to analyze SPANNER_SYS.READ_STATS* tables.

Answer: C

NEW QUESTION # 78

Your customer has a global chat application that uses a multi-regional Cloud Spanner instance. The application has recently experienced degraded performance after a new version of the application was launched. Your customer asked you for assistance. During initial troubleshooting, you observed high read latency. What should you do?

- A. Use SQL statements to analyze SPANNER_SYS.QUERY_STATS* tables.
- B. Use query parameters to speed up frequently executed queries.
- **C. Use SQL statements to analyze SPANNER_SYS.READ_STATS* tables.**
- D. Change the Cloud Spanner configuration from multi-region to single region.

Answer: C

Explanation:

To troubleshoot high read latency, you can use SQL statements to analyze the SPANNER_SYS.READ_STATS* tables. These tables contain statistics about read operations in Cloud Spanner, including the number of reads, read latency, and the number of read errors. By analyzing these tables, you can identify the cause of the high read latency and take appropriate action to resolve the issue. Other options, such as using query parameters to speed up frequently executed queries or changing the Cloud Spanner configuration from multi-region to single region, may not be directly related to the issue of high read latency. Similarly, analyzing the SPANNER_SYS.QUERY_STATS* tables, which contain statistics about query operations, may not be relevant to the issue of high read latency.

NEW QUESTION # 79

You are a DBA on a Cloud Spanner instance with multiple databases. You need to assign these privileges to all members of the application development team on a specific database:

Can read tables, views, and DDL

Can write rows to the tables

Can add columns and indexes

Cannot drop the database

What should you do?

- A. Assign the Cloud Spanner Admin role.
- **B. Assign the Cloud Spanner Database User role.**
- C. Assign the Cloud Spanner Database Admin role.
- D. Assign the Cloud Spanner Database Reader and Cloud Spanner Backup Writer roles.

Answer: B

Explanation:

<https://cloud.google.com/spanner/docs/iam#spanner.databaseUser>

NEW QUESTION # 80

.....

We make sure that the Google Professional-Cloud-Database-Engineer exam questions prices are affordable for everyone. All three PrepAwayPDF Professional-Cloud-Database-Engineer exam practice test questions formats are being offered at the lowest price. Just get benefits from this cheap Google Cloud Certified - Professional Cloud Database Engineer Professional-Cloud-Database-Engineer Exam Questions price and download it right now.
