

# NSE5\_FNC\_AD-7.6 New Dumps Files - NSE5\_FNC\_AD-7.6 Trustworthy Dumps

DOWNLOAD the newest Exam4PDF NSE5\_FNC\_AD-7.6 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1S9xD2rGkL4Jn3EHtbvnr\\_0IQBgqX\\_bH](https://drive.google.com/open?id=1S9xD2rGkL4Jn3EHtbvnr_0IQBgqX_bH)

NSE5\_FNC\_AD-7.6 exam certification is very useful in your daily work in IT industry. When you decide to attend the NSE5\_FNC\_AD-7.6 exam test, it is not an easy thing at begin. First, you should have a detail study plan and have a basic knowledge of the NSE5\_FNC\_AD-7.6 actual test. Here, Fortinet NSE5\_FNC\_AD-7.6 test pdf dumps are recommended to you for preparation. NSE5\_FNC\_AD-7.6 Pdf Torrent will tell you the basic question types in the actual test and give the explanations where is available. With the help of the NSE5\_FNC\_AD-7.6 vce dumps, you will be confident to attend the NSE5\_FNC\_AD-7.6 actual test and get your certification with ease.

These Fortinet NSE5\_FNC\_AD-7.6 questions can be customized by the user according to their needs. This customization feature so that customers can adjust the time as they want. They can change the settings of the time and questions as per need while giving the Fortinet NSE5\_FNC\_AD-7.6 tests. These Fortinet NSE5\_FNC\_AD-7.6 exam questions train candidates to maintain discipline so that they can solve the real Fortinet NSE5\_FNC\_AD-7.6 questions on time while giving their final NSE5\_FNC\_AD-7.6 exam.

## Fortinet NSE5\_FNC\_AD-7.6 Trustworthy Dumps - Exam NSE5\_FNC\_AD-7.6 Bootcamp

If you have questions about us, you can contact with us at any time via email or online service. We will give you the best suggestions on the NSE5\_FNC\_AD-7.6 study guide. And you should also trust the official cNSE5\_FNC\_AD-7.6 certification. Or, you can try it by yourself by free downloading the demos of the NSE5\_FNC\_AD-7.6 learning braindumps. I believe you will make your own judgment. We are very confident in our NSE5\_FNC\_AD-7.6 exam questions.

## Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Sample Questions (Q37-Q42):

### NEW QUESTION # 37

An administrator wants to create a conference manager administrator account but would like to limit the number of conference accounts that can be generated to 30.

Which statement about conference accounts is true?

- A. The conference account limit is defined in the onboarding conference portal.
- B. The administrator can set a maximum of 30 conference accounts in the administrative profile for the conference manager.

- C. In FortiNAC-F, conference accounts can be limited by multiples of 25, so the conference administrator could create 50 accounts.
- D. Conference account limits are defined in the conference guest and contractor template.

**Answer: B**

Explanation:

In FortiNAC-F, the Conference Manager is a specialized administrative role designed for delegated administration, often used by receptionists or event organizers to create temporary guest accounts. To maintain security and prevent the over-provisioning of credentials, FortiNAC-F allows for granular restrictions on these accounts.

According to the FortiNAC-F Administration Guide regarding Administrative Profiles, when an administrator creates a profile for a Conference Manager, they can define specific "Account Limits." Under the profile settings (located in System > Settings > Admin Profiles), there is a field specifically for "Max Accounts." By entering "30" into this field, the administrator ensures that any user assigned to this profile cannot exceed 30 active conference accounts at any given time.

This setting is distinct from the Portal configuration or the Guest templates. While templates define the type of account (e.g., duration and access level), the Administrative Profile defines the capabilities and limitations of the person creating those accounts. This ensures that even if a guest template allows for unlimited registrations, the specific administrator is physically restricted by the system from generating more than the allotted 30.

"Administrative Profiles define what an administrator can see and do within the system. For delegated administration roles like the Conference Manager, the 'Max Accounts' field in the Administrative Profile is used to specify the maximum number of accounts the user is permitted to create. Once this limit is reached, the user will be unable to generate additional accounts until existing ones expire or are deleted."

#### NEW QUESTION # 38

Refer to the exhibit. What will happen to the host of a guest user created from this template if the time of connection is 8:00 PM?

- A. The host will be administratively disabled.
- B. The host will be marked as a rogue device.
- C. The host will be marked as at-risk.
- D. The host will be marked as non-authenticated.

**Answer: D**

Explanation:

In FortiNAC-F, the Guest & Contractor Template is a configuration object that defines the parameters for accounts created by

sponsors or through self-registration. One of the critical security controls within this template is the Login Availability setting. This setting restricts the specific days and times during which a guest or contractor is permitted to authenticate and access the network. As shown in the exhibit, the "StandardGuest" template has Login Availability set to "Specify Time", with a schedule defined as Mon-Fri, 6:00 AM to 7:00 PM. If a guest user attempts to connect or authenticate at 8:00 PM, which is outside of the permitted window, FortiNAC-F's policy engine will automatically deny the authentication request. When an authentication attempt is denied due to schedule restrictions, the system does not move the host into the "Authenticated" or "Registered" state required for production access. Instead, the host is marked as non-authenticated in the adapter or host view.

### NEW QUESTION # 39

An administrator wants to continually monitor endpoints for the existence of a specific registry key and the status of a required security service.

Which two requirements must be in place for the administrator to use FortiNAC-F compliance monitors? (Choose two.)

- A. Persistent agent
- B. MDM integration
- C. Remediation admin scan
- D. Custom scan

**Answer: A,D**

Explanation:

Compliance monitors require the persistent agent to continuously evaluate endpoint conditions such as registry keys and service status. A custom scan must be defined to specify the exact registry key and security service checks that the monitor will assess on the endpoint.

### NEW QUESTION # 40

An administrator wants FortiNAC-F to return a group of user-defined RADIUS attributes in RADIUS responses.

Which condition must be true to achieve this?

- A. RADIUS accounting must be enabled on the FortiNAC-F RADIUS server configuration.
- B. Inbound RADIUS requests must contain the Calling-Station-ID attribute.
- C. The device models in the inventory view must be configured for proxy-based authentication.
- D. The requesting device must support RFC 5176.

**Answer: B**

Explanation:

In FortiNAC-F, the RADIUS Attribute Groups feature allows administrators to return customized RADIUS attributes (such as specific VLAN IDs, filter IDs, or vendor-specific attributes) in an Access-Accept packet sent back to a network device. This is particularly useful for supporting

"Generic RADIUS" devices that are not natively supported but can be managed using standard AVPairs.

According to the FortiNAC-F Generic RADIUS Wired Cookbook and the RADIUS Attribute Groups section of the Administration Guide, there is one critical prerequisite for this feature to function: the inbound RADIUS request must contain the Calling-Station-ID attribute. The Calling-Station-ID typically contains the MAC address of the connecting endpoint. Because FortiNAC-F is a host-centric system, it uses the MAC address as the unique identifier to look up the host record, evaluate the associated Network Access Policy, and determine which Logical Network (and thus which Attribute Group) should be applied. If the incoming request lacks this attribute, FortiNAC-F cannot reliably identify the host and, as a safety mechanism, will not include any user-defined RADIUS attributes in the response. This ensures that unauthorized or unidentifiable devices do not receive privileged access through misapplied attributes.

"Configure a set of attributes that must be included in the RADIUS Access-Accept packet returned by FortiNAC... Requirement: Inbound RADIUS request must contain Calling-Station-Id.

Otherwise, FortiNAC will not include the RADIUS attributes. This attribute is used to identify the host and its current state within the FortiNAC database."

### NEW QUESTION # 41

What must an administrator configure to allow FortiNAC-F to process incoming syslog messages that are not supported by default?

- A. A Security Action
- B. A Log Receiver
- **C. A Security Event Parser**
- D. A Syslog Service Connector

**Answer: C**

Explanation:

FortiNAC-F provides a robust engine for processing security notifications from third-party devices.

For standard integrations, such as FortiGate or Check Point, the system comes pre-loaded with templates to interpret incoming data. However, when an administrator needs FortiNAC-F to process syslog messages from a vendor or device that is not supported by default, they must configure a Security Event Parser.

The Security Event Parser acts as the translation layer. It uses regular expressions (Regex) or specific field mappings to identify key data points within a raw syslog string, such as the source IP address, the threat type, and the severity. Without a parser, FortiNAC-F may receive the syslog message but will be unable to "understand" its contents, meaning it cannot generate the necessary Security Event required to trigger automated responses. Once a parser is created, the system can extract the host's IP address from the message, resolve it to a MAC address via L3 polling, and then apply the appropriate security rules. This allows for the integration of any security appliance capable of sending RFC-compliant syslog messages.

"FortiNAC parses the information based on pre-defined security event parsers stored in FortiNAC's database... If the incoming message format is not recognized, a new Security Event Parser must be created to define how the system should extract data fields from the raw syslog message. This enables FortiNAC to generate a security event and take action based on the alarm configuration."

## NEW QUESTION # 42

.....

Our exam prep material is famous among NSE5\_FNC\_AD-7.6 exam candidates which help to polish the knowledge required to pass the Fortinet NSE5\_FNC\_AD-7.6 exam. The certification is organized by NSE5\_FNC\_AD-7.6 internationally. Our Fortinet NSE5\_FNC\_AD-7.6 exam questions are the most cost-effective as we understand that you need low-cost material but are authentic and updated. Exam4PDF provides its Fortinet NSE5\_FNC\_AD-7.6 Exam Questions in three forms, one is PDF eBook, the second is practice exam software for Windows-based systems, and the third is an online practice test.

**NSE5\_FNC\_AD-7.6 Trustworthy Dumps:** [https://www.exam4pdf.com/NSE5\\_FNC\\_AD-7.6-dumps-torrent.html](https://www.exam4pdf.com/NSE5_FNC_AD-7.6-dumps-torrent.html)

Fortinet NSE5\_FNC\_AD-7.6 New Dumps Files So, how to get out of the embarrassing dilemma is very important, If you have any questions about purchasing NSE5\_FNC\_AD-7.6 exam software, you can contact with our online support who will give you 24h online service, Passing the NSE5\_FNC\_AD-7.6 exam is your best career opportunity, Fortinet NSE5\_FNC\_AD-7.6 New Dumps Files More and more users become our regular customer.

Many designers believe that using stateless session beans is a more NSE5\_FNC\_AD-7.6 viable session bean design strategy for scalable systems, Implementing deployment pipelines at team and organizational levels.

## NSE5\_FNC\_AD-7.6 - Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Updated New Dumps Files

So, how to get out of the embarrassing dilemma is very important, If you have any questions about purchasing NSE5\_FNC\_AD-7.6 Exam software, you can contact with our online support who will give you 24h online service.

Passing the NSE5\_FNC\_AD-7.6 exam is your best career opportunity, More and more users become our regular customer, And we will be always on you side from the day to buy our NSE5\_FNC\_AD-7.6 practice engine until you finally pass the exam and get the certification.
