

The screenshot shows the Tableau Desktop interface. The 'Columns' shelf is highlighted with a yellow circle, and the 'Rows' shelf is highlighted with a red box. The chart displays a horizontal bar chart of disciplines. The 'Columns' shelf contains the 'Disciplines' field, and the 'Rows' shelf contains the 'Count' field. The chart shows disciplines like Training, Coaching, Selling, etc., with their respective counts. The 'Columns' shelf is highlighted with a yellow circle, and the 'Rows' shelf is highlighted with a red box.

Gott will, dass ich eine Person mit Fähigkeit, statt eine gute aussehende Puppe zu werden. Wenn ich IT-Branche wähle, habe ich dem Gott meine Fähigkeiten bewiesen. Aber der Gott ist mit nichts zufrieden. Er hat mich gezwungen, nach oben zu gehen. Die Salesforce Analytics-DA-201 Zertifizierungsprüfung ist eine große Herausforderung in meinem Leben. So habe ich sehr hart gelernt. Aber das macht doch nichts, weil ich Pass4Test die Fragenkataloge zur Salesforce Analytics-DA-201 Zertifizierung gekauft habe. Mit ihr kann ich sicher die die Salesforce Analytics-DA-201 Prüfung bestehen. Der Weg ist unter unseren Füßen, nur Sie können ihre Richtung entscheiden. Mit den Prüfungsmaterialien zur Salesforce Analytics-DA-201 Prüfung von Pass4Test können Sie sicher eine bessere Zukunft haben.

>> Analytics-DA-201 Praxisprüfung <<

Warum sind wir vorrangiger als die anderen Websites? Weil die Salesforce Analytics-DA-201 Schulungsunterlagen von uns die umfassendste, die genaueste sind. Außerdem sind sie von guter Qualität. So ist Pass4Test Ihnen die beste Wahl und die beste Garantie zur Salesforce Analytics-DA-201 Zertifizierungsprüfung.

Thema	Einzelheiten
Thema 1	• Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S • 4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.

Thema 2	• SAP Clean Core Extensibility and ABAP Cloud: This part of the exam targets the SAP S/4HANA Technical Consultant and covers concepts of clean core extensibility using ABAP in the cloud. The focus is on in-app and side-by-side extensibility techniques, ensuring that custom code complies with cloud-readiness principles and does not compromise the upgrade stability of core systems.
Thema 3	• Object-Oriented Design: This section of the exam evaluates the SAP ABAP Cloud Developer's understanding of object-oriented principles in the ABAP context. It focuses on class-based programming, inheritance, interfaces, and polymorphism, all crucial for building modular and maintainable ABAP cloud applications.
Thema 4	• ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S/4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP.
Thema 5	• ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.

Salesforce Certified Tableau Data Analyst Analytics-DA-201 Prüfungsfragen mit Lösungen (Q25-Q30):

25. Frage

You have a table that contains the following data.

How should you complete the formula? (Drag the appropriate Options to the Answer Area and drop into the correct locations.)

Antwort:

Begründung:

Explanation:

To complete the formula, you should drag the option MAX from the list of options and drop it into the first blank space, and then drag the option [Sales] and drop it into the second blank space. The formula will look like this: Option (MAX) Option ([Sales]). This formula will calculate the maximum value of the sales field for each country. You can use this formula to create a calculated field that will show the highest sales amount for each country in your data source. References:

26. Frage

Your company has two divisions located in the United States and Germany. Each division has a separate database. The following is a sample of the sales data for the division in the United States.

The following is a sample of the sales data for the division in Germany.

You have population data in a file named Population.csv. The following is a sample of the data.

You plan to create a visualization that will show the sales per capita for each salesperson. Each salesperson must be identified by their full name.

You need to prepare the data to support the planned visualization. The data source must support being published.

Which four actions should you perform in order?

(Place the four correct options in order. Use the arrows to move Options to Answer Area arrows to re-order the options.)

Use Answer Area arrows to re-order the options.

Antwort:

Begründung:

□ Explanation:

- 1) Open Tableau prep
- 2) Create a new column ...
- 3) Union the sales ...
- 4) Join the sales ...

27. Frage

A Data Analyst has a data source that contains the following columns:

□ The analyst has the following FIXED Level of Detail (LOD) expression called Region Sales:

{ FIXED [Region] : SUM([Sales]) }

The analyst has a view that has a dimension filter on the State column to exclude five states.

What should the analyst do to ensure the five states are also excluded from the LOD expression?

- A. Drag the LOD expression to the Filters shelf.
- B. Right-click the State dimension filter, and then click Attribute.
- **C. Right-click the State dimension filter, and then click Add to Context.**
- D. Change the LOD expression to { FIXED [Region], [State] : SUM([Sales]) }.

Antwort: C

28. Frage

You want to create the following dashboard that will contain two sheets.

□ What should you do?

- A. Add a border to both sheets and add both sheets to a horizontal object.
- B. Drag both sheets to the dashboard and add a border to each sheet.
- C. Drag both sheets to the dashboard and add a background to each sheet.
- **D. Add both sheets to a horizontal container and add a border to the container.**

Antwort: D

29. Frage

A Data Analyst has two tables named EmployeeInfo and DepartmentInfo. EmployeeInfo contains four fields named Full Name, Department ID, Start Date, and Salary. DepartmentInfo contains four fields named Department Name, Size, Department ID, and VP. The analyst wants to combine the tables to meet the following requirements:

* EmployeeInfo is the first table that is dragged to the canvas,

* The records must contain the Full Name, and the Department Name, Size, and VP fields if available,

* Not all records have an exact match.

Which type of join should the analyst use?

- A. Union
- **B. Left**
- C. Inner
- D. Full outer

Antwort: B

30. Frage
