ISO-IEC-27001-Foundation Valid Study Guide - Exam ISO-IEC-27001-Foundation Cram

There are some prominent features that are making the ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam dumps the first choice of ISO-IEC-27001-Foundation certification exam candidates. The prominent features are real and verified ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam questions, availability of APMG-International APMG-International exam dumps in three different formats, affordable price, 1 year free updated APMG-International ISO-IEC-27001-Foundation Exam Questions download facility, and 100 percent APMG-International ISO-IEC-27001-Foundation exam passing money back guarantee.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which factor is required to be determined when understanding the organization and its context?

- A. The processes that will be required to operate the ISMS
- B. The ISO/IEC 27001 clauses which apply to the management system
- C. The information security objectives relevant to the ISMS
- D. Internal issues affecting the purpose of the ISMS

Answer: D

Explanation:

Clause 4.1 specifies exactly what must be determined when establishing context: "The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system." This requirement is about understanding internal and external issues (e.g., culture, capabilities, regulatory environment) that influence the ISMS's effectiveness.

NEW QUESTION # 22

Which attribute is NOT a required focus of continual ISMS improvement?

- A. Suitability
- B. Adequacy
- C. Importance
- D. Effectiveness

Answer: C

Explanation:

Clause 10.2 (Continual Improvement) specifies that the organization must "continually improve the suitability, adequacy and effectiveness of the information security management system." This makes it clear that three attributes are explicitly required to be addressed:

Suitability: ensuring the ISMS continues to meet organizational needs in changing contexts.

Adequacy: ensuring the ISMS covers the necessary scope and provides sufficient control coverage.

Effectiveness: ensuring the ISMS achieves intended outcomes in protecting information security.

The word "importance" is not part of the continual improvement requirement. Importance is implicit in prioritization of risks and

actions, but it is not a required continual improvement attribute in ISO/IEC 27001. Therefore, option D: Importance is the correct choice as it is not specified.

This distinction reinforces that continual improvement is not about subjective importance, but about systematic enhancement of the ISMS's suitability, adequacy, and effectiveness.

NEW QUESTION # 23

What is the definition of the term 'integrity' according to ISO/IEC 27000?

- A. The property of accuracy and completeness
- B. The property of availability and confidentiality
- C. The property that information is NOT made available inappropriately
- D. The property of being accessible and usable

Answer: A

Explanation:

According to ISO/IEC 27000:2018, Clause 3.35:

"Integrity is the property of accuracy and completeness."

This is one of the three core principles of information security (CIA triad):

NEW QUESTION # 24

To whom does the scope of the Terms and conditions of employment control apply?

- A. Employees only
- B. All employees, contractors and third-party users
- C. Contractors only
- D. Personnel and the organization

Answer: B

Explanation:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

NEW QUESTION # 25

What is residual risk?

- A. Risk caused by external parties
- B. Risk remaining after risk treatment
- C. Risk before treatment
- D. Risk that has been transferred

Answer: B

Explanation:

Residual risk is the level of risk that remains after security controls have been implemented.

Organizations must evaluate whether the remaining risk is acceptable according to their risk acceptance criteria and business objectives.

NEW QUESTION # 26

.....

It's universally acknowledged that passing the exam is a good wish for all candidates, if you choose ISO-IEC-27001-Foundation

study materials of us, we can ensure you that you can pass the exam just one time. We have the professional team to search for and study the latest information for exam, therefore you can get the latest information. Furthermore, the quality and accuracy for ISO-IEC-27001-Foundation Exam braindumps are pretty good. We also pass guarantee and money back guarantee for you fail to pass the exam. Or if you have other exam to attend, we will replace other 2 valid exam dumps for you freely.
