## CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q77-Q82):

### NEW QUESTION # 77

How is the Kerberos key tab file created?

- A. Using Kerberos principals
- **B. With the ktpass tool**
- C. Using the AD server
- D. Using encryption keys

**Answer: B**

### NEW QUESTION # 78

What is the default Agent Uninstall Password, which protects the client from unauthorized removal?

- **A. secret**
- B. Chkp1234
- C. RemoveMe
- D. Secret

**Answer: A**

Explanation:

The default Agent Uninstall Password in Harmony Endpoint is a security feature that prevents unauthorized removal of the endpoint agent. Based on common practices in security software, the default password is often a simple, lowercase string that administrators are prompted to change after installation. In this case, the default password is "secret". This is a widely recognized default value in many systems, intended to be straightforward yet requiring replacement for enhanced security.

Option A, "Secret", is incorrect due to its capitalization, as defaults are typically case-sensitive and lowercase.

Option B, "Chkp1234", could be plausible but is not a standard default for Check Point products in this context. Option D, "RemoveMe", is intuitive but not a commonly used default. Therefore, the correct answer is C. secret.

### NEW QUESTION # 79

One of the ways to install Endpoint Security clients is 'Automatic Deployment'. Which of this is true for automatic deployment of Endpoint Security clients?

- A. Automatic deployment first requires installation of the Initial Client package, which is exported and distributed manually
- **B. For automatic deployment to work, the client system must have SVN Foundation enabled in Windows 10 or downloaded and installed on other operating systems**
- C. Automatic deployment can be done on any Windows 10 machine without any Check Point component pre-installed
- D. Automatic deployment can be done on any Windows machine with Check Point SmartConsole first installed

**Answer: B**

### NEW QUESTION # 80

In addition to passwords, what else does the pre-boot environment also support?

- A. Options for double-factor authentication method
- B. Options for remote authentication method
- **C. Options for multi-factor authentication methods**
- D. Options for single-factor authentication method
