2026 Professional SAP C-SEC-2405 Free Learning Cram

Will you feel nervous while facing the real exam? Choose us, since we will help you relieve your nerves. C-SEC-2405 Soft test engine can stimulate the real exam environment, so that you can know the procedure of the exam, and your confidence for the exam will be strengthened. In addition, C-SEC-2405 exam dumps are edited by professional experts, who are quite familiar with the exam center, therefore the quality can be guaranteed. We offer you free demo for C-SEC-2405 to have a try before buying. And you will receive the downloading link and password within ten minutes for C-SEC-2405 exam materials, so that you can start your learning immediately.

SAP C-SEC-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• SAP Fiori Authorizations and SAP S• 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S• 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.

Topic 2	<ul style="list-style-type: none"> • Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.
Topic 3	<ul style="list-style-type: none"> • Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
Topic 4	<ul style="list-style-type: none"> • Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.

SAP Certified Associate - Security Administrator Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which user types can log on to the SAP S/4HANA system in interactive mode? Note: There are 2 correct answers to this question.

- **A. Service User**
- B. Communication User
- **C. Dialog User**
- D. System User

Answer: A,C

Explanation:

In SAP S/4HANA, the user types that can log on in interactive mode are Dialog User and Service User.

Dialog Users are designed for human interaction, allowing individuals to log on via the SAP GUI or Fiori launchpad to perform tasks like data entry or reporting. They support full interactive access, including personalized sessions and user-specific settings. Service Users, while primarily used for web-based or anonymous access (e.g., via Fiori apps or web services), can also support limited interactive logon in specific scenarios, such as testing or administrative tasks, depending on system configuration. System Users are intended for background processes, like batch jobs, and do not support interactive logon. Communication Users are used for machine-to-machine interactions, such as API calls, and are not configured for interactive access. These distinctions ensure that interactive access is restricted to appropriate user types, enhancing security by limiting human logon capabilities to Dialog and Service Users while aligning with SAP's user management framework.

NEW QUESTION # 60

Which user types can log on to the SAP S/4HANA system in interactive mode? Note: There are 2 correct answers to this question.

- A. Service User
- **B. Communication User**
- **C. Dialog User**
- D. System User

Answer: B,C

NEW QUESTION # 61

What happens to data within SAP Enterprise Threat Detection during the aggregation process? Note: There are 3 correct answers to this question.

- **A. It is pseudonymized.**
- **B. It is enriched.**

- C. It is categorized.
- D. It is prioritized.
- E. It is normalized.

Answer: A,B,E

NEW QUESTION # 62

Which of the following services does the Identity Authentication Service provide? Note: There are 2 correct answers to this question.

- A. Policy refinement
- B. Central User Repository
- C. Single Sign-On
- D. Authentication

Answer: C,D

Explanation:

The SAP Identity Authentication Service provides Authentication and Single Sign-On (SSO) services.

Authentication verifies user identities by validating credentials, such as usernames and passwords, or integrating with external identity providers, ensuring secure access to SAP cloud applications. Single Sign-On enables users to access multiple SAP and non-SAP systems with a single set of credentials, streamlining user experience and reducing authentication overhead while maintaining security. These services are core to the Identity Authentication Service's role in SAP's cloud ecosystem, supporting secure and efficient access management. Policy refinement is not a function of this service, as it focuses on policy enforcement rather than creation. A Central User Repository is typically managed by other systems, like SAP Cloud Identity Services, not the Identity Authentication Service. By offering Authentication and SSO, the service ensures robust identity verification and seamless access across cloud-based SAP solutions, aligning with modern security standards and enhancing user productivity.

NEW QUESTION # 63

When segregating the duties for user and role maintenance, which of the following should be part of a decentralized treble control strategy for a production system? Note: There are 3 correct answers to this question.

- A. One authorization profile administrator
- B. One decentralized role administrator
- C. One user administrator per application area in the production system
- D. One authorization data administrator
- E. One user administrator per production system

Answer: B,C,E

Explanation:

* Context: Decentralized treble control ensures segregation of duties, minimizing risks of unauthorized access or role misuse.

* Solution Descriptions:

* B: Focuses on separating administrative responsibilities at a system level.

* D: Ensures administrators are assigned to specific application areas, improving focus.

* E: Decentralized role administrators maintain and update roles independently.
