

# NCP-EUC Exam Reviews, Updated NCP-EUC Testkings

P.S. Free & New NCP-EUC dumps are available on Google Drive shared by FreePdfDump: <https://drive.google.com/open?id=1KIPIEx-dcXK9Hnod01sN5OzUXmpInZy>

There is a ton of Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) prep material available on the internet. But the main thing to notice is their validity and reliability. Many applicants remain unsuccessful in locating the right Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) practice test and lose their time and money.

You do not need to think it is too late for you to study. As the saying goes, success and opportunity are only given to those people who are well-prepared! If you really long to own the NCP-EUC certification, it is necessary for you to act now. We are willing to help you gain the certification. In order to meet the needs of all people, the experts of our company designed such a NCP-EUC Guide Torrent that can help you pass your exam successfully.

## Get The UP-To-Date Nutanix NCP-EUC Exam Questions

There may be a lot of people feel that the preparation process for exams is hard and boring, and hard work does not necessarily mean good results, which is an important reason why many people are afraid of examinations. Today, our NCP-EUC study materials will radically change this. High question hit rate makes you no longer aimless when preparing for the exam, so you just should review according to the content of our NCP-EUC Study Materials prepared for you.

Nutanix NCP-EUC (Nutanix Certified Professional - End - User Computing) Certification Exam is a highly sought-after certification for IT professionals interested in managing and deploying end-user computing solutions. As businesses continue to migrate to cloud-based solutions, the demand for certified professionals who can design and manage these solutions has increased.

## Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q176-Q181):

### NEW QUESTION # 176

An administrator receives reports that members in a delivery group that recently had a new gold image applied are being prompted to restart their non-persistent desktops in the middle of the workday.

Which setting in the recently applied gold image does the administrator need to address to resolve this issue?

- A. Java is checking for updates every 24 hours.
- **B. Windows Update policy is set to Automatic.**
- C. The Windows power profile settings are improperly configured.
- D. The mandatory user profile is set to wrong profile extension.

**Answer: B**

Explanation:

In a non-persistent VDI environment, changes to the operating system should only occur within the Golden Image (or Master Image), not on the individual provisioned VMs. If the Windows Update policy is set to Automatic within the Gold Image, the clones generated from that image will independently check for updates, download them, and attempt to install them during the user's session.

This behavior often triggers a "Restart Required" prompt to the end-user to finish installing the updates. To prevent this disruption and ensure version consistency, Nutanix and VDI best practices dictate that the Windows Update service should be disabled or set to Manual in the Gold Image. Updates should be applied administratively to the Gold Image during a maintenance window, followed by a recompose/update of the machine catalog.

#### NEW QUESTION # 177

Which display protocol developed by Omnisys Horizon supports both TCP and UDP to be adaptive to network conditions?

- A. PCoIP
- B. Microsoft RDP
- **C. Blast Extreme**
- D. Citrix HDX

**Answer: C**

Explanation:

Blast Extreme is the proprietary display protocol developed by Omnisys (formerly VMware) for Horizon.

A key feature of Blast Extreme is its use of Adaptive Transport. This technology allows the protocol to dynamically switch between UDP (for high performance and lossy networks) and TCP (as a fallback for reliability) based on real-time network conditions. This adaptability ensures the best possible user experience regardless of bandwidth or latency constraints. (PCoIP primarily relies on UDP, and RDP is traditionally TCP-heavy, while HDX is a Citrix protocol).

#### NEW QUESTION # 178

What is one key benefit of using Nutanix Validated Designs (NVD) for Citrix VDI deployments?

- A. NVD-based deployments are designed to provide 99.999% up time.
- B. Determines performance impact during peak I/O
- C. NVD-based deployments are designed to provide Disaster Recovery
- **D. Provides sizing guidance and scaling capabilities.**

**Answer: D**

Explanation:

Nutanix and Citrix provide a turnkey validated VDI infrastructure solution that allows 10x faster deployments, cuts management time by 70% and significantly reduces the number of support calls. Nutanix eliminates the complexity of managing discrete storage, servers and separate virtualization and networking stacks.

#### NEW QUESTION # 179

An administrator needs to ensure that accounts are locked permanently after repeated incorrect logins. Which feature needs to be enabled on the cluster?

- **A. DoD In Additional Settings**
- B. Lock CVM Security Status
- C. RHEL 8 fail2ban
- D. Cluster Lockdown

**Answer: A**

Explanation:

To change the account lockout behavior from the default (which is typically a temporary 15-minute lockout) to a permanent lockout

required for high-security environments, the administrator must enable the DoD (Department of Defense) configuration compliance. This is managed through the Security Configuration Management Automation (SCMA) framework, often found within the "Cluster Hardening" or "Security Dashboard" settings (sometimes referenced as "Additional Settings" in exam contexts). Applying the DoD STIG (Security Technical Implementation Guide) policy modifies the underlying Linux PAM (Pluggable Authentication Modules) configuration (pam\_faillock) to enforce strict rules, including permanently locking user accounts after a specific number of failed attempts until an administrator manually unlocks them. "Cluster Lockdown" (Option A) refers to disabling password authentication entirely in favor of SSH keys, which does not fit the requirement of locking accounts after incorrect login attempts.<sup>1</sup> Here are the 100% verified answers for Questions 12, 13, 14, and 15, derived from Nutanix End User Computing architectural best practices.

### NEW QUESTION # 180

Shutterstock

An administrator is using EUC broker software to manage and direct connections to virtual desktops and applications. The administrator is being asked to make sure traffic is distributed across the broker VMs and wants to make sure the best solution is being implemented.

How can the administrator best accomplish this goal?

- A. Use the virtual switch in active-active mode across all hosts.
- **B. Use round-robin DNS to distribute connections.**
- C. Use Flow Virtual Networking and external load balancers.
- D. Use Nutanix Data Lens to provide efficiency across VMs.

**Answer: B**

Explanation:

In the context of distributing connections across multiple broker VMs (such as Citrix Delivery Controllers or Horizon Connection Servers) without introducing complex third-party infrastructure dependencies like strict SDN overlays (Option A), Round-robin DNS is the standard supported method for connection distribution mentioned in basic Nutanix EUC architecture guides.

While enterprise production environments often use dedicated External Load Balancers (like Citrix ADC), Option A implies the mandatory use of Flow Virtual Networking (an overlay SDN solution) to achieve this, which is not a standard requirement for simple broker load balancing. Therefore, among the available choices, creating multiple DNS A-records for the broker FQDN (Round-robin DNS) is the valid mechanism to distribute incoming user traffic across the available broker nodes.

### NEW QUESTION # 181

.....

Related study materials proved that to pass the Nutanix NCP-EUC exam certification is very difficult. But do not be afraid, FreePdfDump have many IT experts who have plentiful experience. After years of hard work they have created the most advanced Nutanix NCP-EUC Exam Training materials. FreePdfDump have the best resource provided for you to pass the exam. Does not require much effort, you can get a high score. Choose the FreePdfDump's Nutanix NCP-EUC exam training materials for your exam is very helpful.
