

Easy Access to Oracle 1z0-1073-25 Exam Questions in PDF Format

BTW, DOWNLOAD part of Getcertkey 1z0-1073-25 dumps from Cloud Storage: <https://drive.google.com/open?id=1zYIFg4XstxVl1N4p-6KCuhN843XI-iqF>

The Getcertkey is a leading platform that is committed to making the Oracle 1z0-1073-25 exam dumps preparation simple, quick, and successful. To achieve this objective Getcertkey is offering real, valid, and updated Oracle Inventory Cloud 2025 Implementation Professional (1z0-1073-25) practice questions in three different formats. These formats are Getcertkey Oracle 1z0-1073-25 PDF Dumps Files, desktop practice test software, and web-based practice test software. All these Getcertkey Oracle exam questions formats are easy to use and compatible with all web browsers, operating systems, and devices.

The Oracle Inventory Cloud 2025 Implementation Professional (1z0-1073-25) practice questions are designed by experienced and qualified 1z0-1073-25 exam trainers. They have the expertise, knowledge, and experience to design and maintain the top standard of Oracle Inventory Cloud 2025 Implementation Professional (1z0-1073-25) exam dumps. So rest assured that with the Oracle Inventory Cloud 2025 Implementation Professional (1z0-1073-25) exam real questions you can not only ace your Oracle Inventory Cloud 2025 Implementation Professional (1z0-1073-25) exam dumps preparation but also get deep insight knowledge about Oracle 1z0-1073-25 exam topics. So download Oracle Inventory Cloud 2025 Implementation Professional (1z0-1073-25) exam questions now and start this journey.

Customized 1z0-1073-25 Lab Simulation, 1z0-1073-25 Labs

If you choose our 1z0-1073-25 exam question for related learning and training, the system will automatically record your actions and analyze your learning effects. Many people want to get a 1z0-1073-25 certification, but they worry about their ability. So please do not hesitate and join our study. Our 1z0-1073-25 Exam Question will help you to get rid of your worries and help you achieve your wishes. So you will have more opportunities than others and get more confidence. Our 1z0-1073-25 quiz guide is based on the actual situation of the customer.

Oracle Inventory Cloud 2025 Implementation Professional Sample Questions (Q10-Q15):

NEW QUESTION # 10

Which statement is true regarding WIP inventory transactions?

- A. Errors can be resolved in either the manufacturing or inventory application.
- **B. Errors need to be resolved in the discrete manufacturing application. (*)**
- C. Errors can be resolved only in the inventory work area.
- D. Errors need to be manually moved from inventory to discrete manufacturing application for reprocessing.

Answer: B

NEW QUESTION # 11

Which functionalities are part of Supply Chain Orchestration? (Choose four)

- **A. performing automated change management to match supply to demand**
- **B. receiving supply requests from several sources operating in Oracle Cloud**
- **C. providing a 360-degree view of the supply-creation process**
- D. providing supply requests to Fusion Planning Central
- **E. launching and managing complex business processes**

Answer: A,B,C,E

NEW QUESTION # 12

The Supply Chain Orchestration Work Area Supply Line Overview page displays supply lines that are aggregated and grouped. Which of the following form the group? (Choose four)

- A. Rejections
- **B. Errors**
- **C. On-Track**
- **D. Jeopardy**
- **E. Exceptions**

Answer: B,C,D,E

NEW QUESTION # 13

SIMULATION

Set Up Back-to-Back Transfer Flow

The topic explains what you need to do for setting up back-to-back transfer flow.

In the Oracle Product Information Management, ensure that the Item is Back-to-Back enabled.

In Oracle Global Order Promising:

1. Set up a global sourcing rule with Type as Transfer from. Set the organization as the organization requesting the transfer (example, Warehouse 1).
2. Set up a local sourcing rule for the organization (in this example, Warehouse 1) Type as Transfer from, from the organization that has the stock from which the transfer will take place (example, Warehouse 2).
3. Set up an ATP rule with the Promising Mode as Supply chain availability search.
4. Ensure that the Supply chain availability search attributes are enabled according to your requirements. For example, you might want the application to search components and resources to include on-hand or in-transit Supply Types or fulfillment lines Demand Types.
5. Set the ATP Rule Assignment as required.
6. Set the sourcing assignments for the sourcing rules that you defined in steps 1 and 2.
7. Ensure that the assignment level used for the global sourcing rule doesn't include any Organization.
8. Refresh and restart the Order Promising Server for ATP Rules and Sourcing.

With this setup:

* The global rule is used to source the item from Warehouse 1 if there is stock available to reserve.

* If there's no stock on hand, Global Order Promising uses the local rule to transfer the item from Warehouse 2 to Warehouse 1.

Answer:

Explanation:

See the Explanation for the complete solution

Explanation:

Set Up Back-to-Back Transfer Flow in Oracle Cloud

The Back-to-Back (B2B) Transfer Flow allows organizations to move inventory from one warehouse (source) to another warehouse (destination) when stock is unavailable in the fulfillment location. This setup ensures that Oracle Global Order Promising (GOP) can automatically determine the best supply source and execute the transfer process efficiently.

1. Prerequisites: Enable Back-to-Back for Items

Before setting up the transfer flow, ensure that the item is Back-to-Back enabled in Oracle Product Information Management (PIM):

Navigate to Oracle Product Information Management (PIM).

Search for the item you want to enable for back-to-back fulfillment.

In the item definition, enable the "Back-to-Back Enabled" attribute.

Save and publish the item updates.

☐ This ensures that the item can participate in the B2B fulfillment process.

2. Configure Global Order Promising (GOP) for Back-to-Back Transfer Flow In Oracle Global Order Promising (GOP), configure the system to determine the best transfer source when fulfilling back-to-back orders.

Step 1: Create a Global Sourcing Rule (Type: Transfer From)

Navigate to Oracle Global Order Promising (GOP).

Create a Global Sourcing Rule with the following details:

Type: "Transfer From"

Source Organization: Warehouse 1 (Requesting warehouse or fulfillment location).

☐ This rule ensures that items are sourced from Warehouse 1 whenever stock is available.

Step 2: Create a Local Sourcing Rule (Type: Transfer From)

Create a Local Sourcing Rule for Warehouse 1 as follows:

Type: "Transfer From"

Source Organization: Warehouse 2 (Stock-holding warehouse).

☐ This rule ensures that if Warehouse 1 does not have stock, the system transfers items from Warehouse 2.

Step 3: Set Up an ATP Rule for Availability Check

Create an ATP Rule (Available-to-Promise Rule) with the following parameters:

Promising Mode: "Supply Chain Availability Search".

Enable attributes for supply chain availability search based on business needs.

Configure ATP search to consider on-hand stock, in-transit inventory, components, and resources if needed.

☐ This ensures that GOP can evaluate stock levels across multiple locations.

Step 4: Assign ATP Rule to Organizations

Assign the ATP Rule to the appropriate organizations.

Ensure that the rule applies to Warehouse 1 and Warehouse 2 based on their roles in the sourcing process.

☐ This enables availability checking when processing sales orders.

Step 5: Assign Sourcing Rules to Organizations

Assign the Global Sourcing Rule to the enterprise-wide sourcing assignment.

Assign the Local Sourcing Rule to Warehouse 1, specifying Warehouse 2 as the sourcing location.

Ensure that the assignment level for the global sourcing rule does not include a specific organization (it should apply at a broader level).

☐ This ensures that Oracle GOP prioritizes sourcing stock from Warehouse 1 first and transfers from Warehouse 2 if needed.

Step 6: Refresh and Restart Order Promising Server

Once the sourcing rules and ATP configurations are in place:

Refresh Oracle Global Order Promising (GOP) Rules.

Restart the Order Promising Server to apply sourcing and ATP rule changes.

☐ This step ensures that all updates take effect and are used in future order promising decisions.

3. Expected Behavior After Setup

If Warehouse 1 has stock → GOP reserves inventory and processes the sales order immediately.

If Warehouse 1 does not have stock → GOP triggers a transfer order to move stock from Warehouse 2 to Warehouse 1.

Once the transfer order is fulfilled and received, the sales order is shipped to the customer.

☐ This ensures automated order fulfillment with minimal manual intervention.

4. Benefits of Back-to-Back Transfer Flow in Oracle Cloud

✓ Optimized Inventory Utilization - Uses stock efficiently across multiple warehouses.

✓ Automated Stock Transfers - Eliminates manual intervention by automatically moving stock when needed.

✓ Reduced Procurement Costs - Moves existing inventory instead of purchasing new stock.

✓ Faster Order Fulfillment - Reduces lead times by sourcing from internal stock before procurement.

✓ Seamless Oracle Cloud Integration - Works across Oracle Order Management, Inventory, GOP, and Supply Chain Orchestration.

NEW QUESTION # 14

Your customer has implemented Product Recall Management solution and recall notices are imported using FBFI. How are the recalled parts located for them in quantity-tracked locations?

- A. Based on item status
- B. Based on material status
- **C. Based on on-hand balance (*)**
- D. Based on transaction history

Answer: C
