Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q211-Q216):

NEW QUESTION # 211

Which of the following reports the cloud service provider normally share with customer WITHOUT any non-disclosure agreement and is in the public domain?

- A. SOC1 Type1
- B. SOC3

- C. SOC2 Type2
- D. SOC2 Type1

Answer: B

Explanation:

A Soc3 reports on the same information as a Soc2 report. The main difference between the two is that a Soc3 is intended for a general audience. These reports are shorter and do not include the same details as a Soc2 report, which is distributed to an informed audience of stakeholders. Due to their more general nature, Soc3 reports can be shared openly and posted on a company's website with a seal indicating their compliance.

NEW QUESTION # 212

Big data includes high volume, high variety, and high velocity.

- A. True
- B. False

Answer: A

NEW QUESTION # 213

Which is the primary tool for governance in Cloud Computing environment?

- A. Governance memo
- B. Contract
- C. Operational level Agreement
- D. Service Level Agreement

Answer: C

Explanation:

Contracts: The primary tool of governance is the contract between a cloud provider and a cloud customer (this is true for public and private cloud). The contract is your only guarantee of any level of service or commitment assuming there is no breach of contract, which tosses everything into a legal scenario. Contracts are the primary tool to extend governance into business partners and providers.

NEW QUESTION # 214

Which of the below hypervisors are OS based and are more attractive to attackers?

- A. Type V
- B. Type III
- C. Type I
- D. Type II

Answer: D

Explanation:

Type II hypervisors are OS-based and more attractive to attackers. There are lots of vulnerabilities which are found not only on OS but also in applications residing on the OS.

NEW QUESTION # 215

Logs, documentation, and other materials needed for audits and compliance and often serve as evidence of compliance activities are known as:

- A. Proof of Audit
- B. Log Trail
- C. Artifacts

- D. Documented Evidence

Answer: C

Explanation:

Artifacts are the logs, documentation, and other materials needed for audits and compliance; they are the evidence to support compliance activities. Both providers and customers have responsibilities for producing and managing their respective artifacts. Reference: CSA Security Guidelines V.4(reproduced here for the educational purpose)
