

Updated Oracle 1z0-1080-25 Exam Questions–Key to Your Career Growth

2026 Latest Real4exams 1z0-1080-25 PDF Dumps and 1z0-1080-25 Exam Engine Free Share: https://drive.google.com/open?id=178IRM5-e0ep4XtPnFE7PsVIEruXQR_s8

The pass rate of 1z0-1080-25 study materials are 98.95%, if you buy 1z0-1080-25 study material from us, we can ensure you pass the exam successfully. Besides you can get 1z0-1080-25 exam dumps in ten minutes after your payment. You can use the 1z0-1080-25 exam dumps freely, if you have any questions in the process of your learning, you can consult the service staff, and they have the professional knowledge about 1z0-1080-25 Learning Materials, so don't hesitate to ask for help from them.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 2	<ul style="list-style-type: none">• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 3	<ul style="list-style-type: none">• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 4	<ul style="list-style-type: none">• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 5	<ul style="list-style-type: none">• Design business rules and rulesets: This section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 6	<ul style="list-style-type: none">• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 7	<ul style="list-style-type: none">• Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 8	<ul style="list-style-type: none">• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 9	<ul style="list-style-type: none">• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.

Topic 10	<ul style="list-style-type: none"> • Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 11	<ul style="list-style-type: none"> • Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 12	<ul style="list-style-type: none"> • Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 13	<ul style="list-style-type: none"> • This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 14	<ul style="list-style-type: none"> • Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 15	<ul style="list-style-type: none"> • Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 16	<ul style="list-style-type: none"> • Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 17	<ul style="list-style-type: none"> • Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 18	<ul style="list-style-type: none"> • Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 19	<ul style="list-style-type: none"> • Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 20	<ul style="list-style-type: none"> • Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 21	<ul style="list-style-type: none"> • Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 22	<ul style="list-style-type: none"> • Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.

Oracle 1z0-1080-25 Reliable Test Pdf & Detailed 1z0-1080-25 Study Plan

The Oracle 1z0-1080-25 exam dumps features are a free demo download facility, real, updated, and error-free Oracle 1z0-1080-25 test questions, 1 year free updated Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam questions and availability of Oracle 1z0-1080-25 real questions in three different formats. Oracle PDF Questions format, web-based practice test, and desktop-based 1z0-1080-25 Practice Test formats. All these three Oracle 1z0-1080-25 exam dumps formats features surely will help you in preparation and boost your confidence to pass the challenging Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam with good scores.

Oracle Planning 2025 Implementation Professional Sample Questions (Q49-Q54):

NEW QUESTION # 49

You need to schedule a weekly data import job. Which two statements are true about scheduling jobs?

- A. You can check the execution status of a job only if it completed.
- **B. You can schedule an Import Data job to run later at intervals.**
- **C. You can set to receive notifications when the job has completed.**
- D. You can delete that are currently processing.
- E. You can set the daily maintenance time when scheduling cloning environment jobs.

Answer: B,C

Explanation:

In Oracle Planning 2024, scheduling jobs such as a weekly data import is managed through the Jobs interface, which provides options for automation, monitoring, and notifications. Let's evaluate the provided statements to identify the two that are true:

* A. You can check the execution status of a job only if it completed: This is false. The Jobs console in Oracle EPM allows users to check the status of a job (e.g., Running, Completed, Failed) at any time, not just after completion. Real-time monitoring is a key feature.

* B. You can set the daily maintenance time when scheduling cloning environment jobs: This is false.

Daily maintenance time is a system-wide setting controlled by administrators via Application Settings, not something adjustable when scheduling specific jobs like cloning or data imports.

* C. You can set to receive notifications when the job has completed: This is true. When scheduling a job (e.g., Import Data), users can enable email notifications to be alerted upon job completion, success, or failure, enhancing job management.

* D. You can schedule an Import Data job to run later at intervals: This is true. The scheduling feature supports recurring jobs, such as weekly data imports, allowing users to define the start time and frequency (e.g., daily, weekly) for tasks like importing data from external sources.

* E. You can delete that are currently processing: This is false. Jobs that are currently processing (i.e., in a "Running" state) cannot be deleted until they complete or fail, as per Oracle's job management rules.

Thus, the two true statements are C and D, reflecting the flexibility of scheduling recurring Import Data jobs and receiving completion notifications, both of which are explicitly supported in Oracle Planning 2024.

NEW QUESTION # 50

With Machine Learning, which type of prediction would you define to predict revenue using several input variables such as price, promotions, industry market size, and climate?

- A. Dimension Prediction
- **B. Multivariate Prediction**
- C. Source Prediction
- D. Forecast Prediction

Answer: B

Explanation:

In Oracle Planning 2024's Machine Learning capabilities, particularly with the "Bring Your Own ML" feature, predictions can be defined based on the type of analysis required. To predict revenue using multiple input variables such as price, promotions, industry market size, and climate, the appropriate prediction type is:

* A. Dimension Prediction: Incorrect. This type is not a standard term in Oracle's ML framework for Planning; it suggests predicting across dimensions, which isn't specific to multi-variable revenue prediction.

* B. Source Prediction: Incorrect. This is not a defined prediction type in Oracle Planning's ML documentation; it might imply source data analysis, but it's not applicable here.

* C. Forecast Prediction: Incorrect. While forecasting involves predicting future values, "Forecast Prediction" is not a specific ML type in Oracle, and it doesn't emphasize the use of multiple variables.

* D. Multivariate Prediction: Correct. Multivariate prediction involves using multiple input variables (e.g., price, promotions, market size, climate) to predict an outcome (e.g., revenue). Oracle's ML integration supports importing PMML models that handle multivariate analysis, aligning with this scenario.

The Oracle documentation confirms that Multivariate Prediction is the type suited for complex predictions with several input

variables, making D the correct answer.

NEW QUESTION # 51

What feature can Service Administrators use to automatically complete all the actions required to create an exact copy of the current application in a target environment?

This includes the removal of the current application and data, if any, from the target environment.

- A. Migration Backup
- **B. Clone Snapshot**
- C. Migration Export
- D. Replicate Snapshot

Answer: B

Explanation:

In Oracle Planning 2024, Service Administrators can use the Clone Snapshot feature to create an exact copy of the current application in a target environment. This feature automates all actions required for cloning, including removing the existing application and data in the target environment (if any) and replacing it with a snapshot of the source environment. The process involves exporting a snapshot from the source, deleting the target environment's current application and data, and then importing and applying the snapshot to recreate the application identically.

* A. Replicate Snapshot: This is incorrect because "Replicate Snapshot" is not a defined feature in Oracle Planning. Replication typically implies duplicating data without necessarily overwriting the target, which doesn't align with the requirement of removing existing content.

* B. Migration Export: This is incorrect because Migration Export only exports application artifacts (e.g., metadata, data) to a file for manual transfer or backup, but it does not automate the removal of the target environment's content or the import process.

* C. Clone Snapshot: This is correct. The Clone Snapshot feature, available under the Environment management tools, fully automates the cloning process, including deletion of the target environment's application and data, followed by the recreation of the source application.

* D. Migration Backup: This is incorrect because Migration Backup creates a backup file for recovery purposes but does not involve cloning or overwriting a target environment.

The Oracle Planning 2024 documentation specifies that Clone Snapshot is designed for such end-to-end automation, making it the ideal choice for Service Administrators to replicate an application across environments efficiently.

NEW QUESTION # 52

Which module do you enable and configure if you want to develop plans and forecasts with driver-based or based income statement, balance sheet, and cash flow planning, or revenue and expenses?

- A. Capital
- B. Projects
- **C. Financials**
- D. Strategic Workforce

Answer: C

NEW QUESTION # 53

If you are using your own chart of accounts and want to use dashboards that graphically depict total results, you must add your accounts as shared members under the appropriate parent. To which four parent members do you add your own chart of accounts

- Answer: B,C,E,F**
