Secondly, another amazing benefit of doing the SSM Practice Tests is that you can easily come to know the real exam format and develop your skills to answer all questions without any confusion. Hence, you can develop your pass percentage.

## Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q48-Q53):

### NEW QUESTION # 48

Team A wants to use the IP Iteration to continue their "usual work." What is one benefit the Scrum Master/Team Coach could share with the team about using the IP Iteration as intended?

- A. The team can consider additional retrospective action items
- **B. The team can participate in hackathons**
- C. The team can find time to participate in ad hoc groups
- D. The team can perform needed system maintenance

**Answer: B**

Explanation:

Hackathons are one of the activities that can be done during the IP Iteration to foster innovation and learning. They allow the team members to work on whatever they want, with whomever they want, as long as the work reflects the mission of the company. The teams then demo their work to others at the end of the hackathon. Hackathons can help the team explore new ideas, technologies, and solutions that can benefit the business and the customers. They can also increase the team's engagement, creativity, and collaboration. Reference: Innovation and Planning Iteration - Scaled Agile Framework, Exam Study Guide: SSM (6.0) - SAFe Scrum Master

#### **NEW QUESTION # 49**

When does the Inspect and Adapt event happen?

- A. At the end of every two weeks
- **B. At the end of each PI**
- C. At the end of the System Demo
- D. At the end of the second day of PI Planning

**Answer: B**

Explanation:

Explanation/Reference:

#### **NEW QUESTION # 50**

According to SAFe, which of the following metrics are reported at the Inspect and Adapt event?

- **A. ART predictability measure**
- B. ART cycle velocity
- C. Cumulative value measure
- D. Cumulative value rate

**Answer: A**

Explanation:

According to the SAFe 6 Scrum Master documentation, one of the metrics that are reported at the Inspect and Adapt event is the ART predictability measure. This metric shows how well the ART delivers on its PI objectives, which are the SMART commitments made by the teams during PI planning. The ART predictability measure is calculated by dividing the total actual business value achieved by the total planned business value, as shown in the PI system demo. The ART predictability measure helps the ART to assess its performance, identify gaps, and improve its forecasting accuracy and reliability. #### **NEW QUESTION # 51**

During which of the following stages of team development do team members stop focusing on their own goals and begin focusing on developing better ways of working together?

- A. Transforming
- B. Forming
- **C. Norming**
- D. Storming

**Answer: C**

Explanation:

Norming is the stage of team development where team members stop focusing on their own goals and begin focusing on developing better ways of working together. Norming occurs after the team has gone through the Forming and Storming stages, where they have established their roles and responsibilities, and have resolved their initial conflicts and disagreements<sup>12</sup> In the Norming stage, the team starts to build trust, respect, and cohesion among themselves. They also align on a common vision, mission, and goals, and agree on the norms and expectations for their collaboration and communication<sup>12</sup> The team becomes more productive, efficient, and effective, as they leverage their collective strengths and skills, and support each other in overcoming challenges and delivering value<sup>12</sup> The team also develops a sense of identity and pride, and celebrates their achievements and learnings<sup>12</sup> (Must be taken from SAFe 6 Scrum Master resources) Reference:
