Salesforce Health Cloud Accredited Professional AP-211 Prüfungsfragen mit Lösungen (Q99-Q104):

99. Frage

Prior to go-live for Bloomington Caregivers, a consultant loads the future system users into Salesforce.

Which two out-of-the-box permission sets should the consultant assign to the users to give them access to Health Cloud?

Choose 2 answers

- A. Health Cloud permission set license
- B. Health Cloud Foundation
- C. Health Cloud User
- D. Health Cloud Platform permission set license
- E. Health Cloud Standard

Antwort: A,D

100. Frage

A pharma customer requires a scheduling tool to book infusions with multiple steps as part of its Health Cloud implementation. It needs a solution for care coordinators to book appointments without having to manually check availability and resources themselves. Which solution should a consultant recommend?

- A. Intelligent Appointment Management
- B. Advanced Therapy Management
- C. Procedure Scheduling
- D. Salesforce Scheduler

Antwort: B

101. Frage

Care managers at Bloomington Caregivers call patients after they are discharged from a hospital to ask a series of questions, which the care manager enters into Health Cloud. The patient is then automatically assigned a personalized care plan based on the answers they provided.

Which two capabilities should a consultant leverage together to fulfill this requirement?

Choose 2 answers

- A. Salesforce Surveys
- B. Care Programs
- C. Discovery Framework
- D. Integrated Care Management

Antwort: A,C

Begründung:

The scenario involves collecting structured information (series of questions) from patients and automatically assigning a personalized care plan based on their answers.

Step-by-Step Reference:

Salesforce Surveys can be used to gather responses from patients post-discharge.

Extract:

"With Salesforce Surveys, care managers can send and record responses directly within Health Cloud, allowing structured data capture from patients." (Source: Administer Health Cloud - Surveys) Discovery Framework processes responses and triggers automated care plan assignments based on responses.

Extract:

"The Discovery Framework in Health Cloud enables dynamic question flows and recommendations, such as assigning care plans based on patient answers." (Source: Administer Health Cloud - Discovery Framework) Combining these, care managers can capture structured data (Surveys) and drive workflow automation and personalization (Discovery Framework).

102. Frage

Bloomington Caregivers has identified the need to encrypt data to comply with the Health Insurance Portability and Accountability Act (HIPAA).

What are three key considerations when complying with HIPAA regulations using Salesforce Shield in conjunction with Bloomington Caregivers' data strategy?

Choose 3 answers

- A. Implementing audit trails and regularly reviewing them to detect unauthorized access attempts
- B. Configuring data retention policies to ensure that records are retained for the appropriate length of time
- C. Using third-party data backup solutions to store backups of sensitive data off-site
- D. Providing access to third-party auditors to regularly review Shield implementation settings
- E. Ensuring that sensitive data is encrypted both In transit and at rest

Antwort: A,B,E

Begründung:

When complying with HIPAA using Salesforce Shield, Bloomington Caregivers must:

Encrypt sensitive data in transit and at rest:

Shield Platform Encryption ensures encryption at rest; Salesforce uses TLS for encryption in transit.

Extract:

"Salesforce Shield encrypts sensitive data at rest. Salesforce also encrypts data in transit using TLS." (Source: Salesforce Security Guide, Shield Platform Encryption Guide) Implement and regularly review audit trails:

Shield Event Monitoring and Field Audit Trail help monitor data access and modifications.

Extract:

"Implement audit trails and monitor them to detect unauthorized or suspicious activities." ([Source: Salesforce Security Guide, Shield Platform Encryption Guide]) Configure data retention policies:

Retain records for legally required periods to comply with HIPAA.

Extract:

"Data retention policies must comply with legal and regulatory requirements, including HIPAA." ([Source: Salesforce Security Guide]) Why not B or C?

Providing access to third-party auditors is not a Salesforce Shield requirement; such reviews are typically handled internally.

Using third-party backup solutions is not a core Shield/HIPAA control within Salesforce, and data residency must be managed with care.

103. Frage

A payer is looking to track relevant information for its provider network.

Which three objects are supported with Health Cloud out-of-the-box to track information related to a provider?

Choose 3 answers

- A. Healthcare Practitioner Facility
- B. Practitioner Tier
- C. Provider Education
- D. Healthcare Provider Specialty
- E. Board Certification

Antwort: B,C,D

104. Frage
