100% Pass Professional PCCP - Valid Dumps Palo Alto Networks Certified Cybersecurity Practitioner Book

Because industry of information technology is fast-moving. To excel in this advanced industry, pass the PCCP exam of the Palo Alto Networks PCCP certification. Hundreds of applicants have faced issues in updated dumps material to crack the Palo Alto Networks PCCP examination in one go.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q158-Q163):

NEW QUESTION # 158

Which term describes establishment of on-premises software on a cloud-based server?

- A. Kubernetes
- B. Cloud-hosted
- C. Serverless
- D. Dockers

Answer: B

Explanation:

Cloud-hosted refers to the deployment of traditional on-premises software on cloud-based servers. This approach allows organizations to run their applications in the cloud without re-architecting them for cloud-native environments.

NEW QUESTION # 159

What is the primary security focus after consolidating data center hypervisor hosts within trust levels?

- A. control and protect inter-host traffic by using IPv4 addressing
- B. control and protect inter-host traffic using routers configured to use the Border Gateway Protocol (BGP) dynamic routing protocol
- C. control and protect inter-host traffic by exporting all your traffic logs to a sysvol log server using the User Datagram Protocol (UDP)
- **D. control and protect inter-host traffic using physical network security appliances**

Answer: D

Explanation:

page 211 "Consolidating servers within trust levels: Organizations often consolidate servers within the same trust level into a single virtual computing environment: This virtual systems capability enables a single physical device to be used to simultaneously meet the unique requirements of multiple VMs or groups of VMs. Control and protection of inter-host traffic with physical network security appliances that are properly positioned and configured is the primary security focus."

NEW QUESTION # 160

Which tool supercharges security operations center (SOC) efficiency with the world's most comprehensive operating platform for enterprise security?

- A. Cortex XDR
- **B. Cortex XSOAR**
- C. WildFire
- D. Prisma SAAS

Answer: B

Explanation:

Cortex XSOAR enhances Security Operations Center (SOC) efficiency with the world's most comprehensive operating platform for enterprise security. Cortex XSOAR unifies case management, automation, real-time collaboration, and native threat intel management in the industry's first extended security orchestration, automation, and response (SOAR) offering.

NEW QUESTION # 161

Which statement describes the process of application allow listing?

- A. It encrypts application data to protect the system from external threats.
- B. It creates a set of specific applications that do not run on the system.
- C. It allows safe use of applications by scanning files for malware.
- **D. It allows only trusted files, applications, and processes to run.**

Answer: D

Explanation:

Application allow listing is a security practice that permits only pre-approved (trusted) applications, files, and processes to run on a system. This approach helps prevent unauthorized or malicious software from executing, thereby reducing the attack surface.

NEW QUESTION # 162

Which Palo Alto Networks tools enable a proactive, prevention-based approach to network automation that accelerates security

analysis?

- A. AutoFocus
- B. WildFire
- C. Cortex XDR
- D. MineMeld

Answer: C

Explanation:

Cortex XDR is a security analytics platform that converges logs from network, identity, endpoint, application, and other security relevant sources to generate high-fidelity behavioral alerts and facilitate rapid incident analysis, investigation, and response¹. Cortex XDR uses machine learning algorithms to automate data analysis and apply modeling in real time, helping organizations to reduce analyst workloads and improve security¹. Cortex XDR also integrates with Palo Alto Networks next-generation firewalls and other security tools to streamline and speed network security response².
