최신 SAP Certified Associate C_S4CPR_2502 무료샘플문제 (Q11-Q16):

질문 # 11
An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user. How would you troubleshoot? Note: There are 3 correct answers to this question.

- A. Check the Role Maintenance app.
- B. Check the space and page(s) assigned to the role.
- C. Check the business catalogues assigned to the role.
- D. Check the restrictions for the role.
- E. Check the business role template.

정답：B,C,D

설명：
If an SAP Fiori app is not displaying on the SAP Fiori Launchpad despite the user having the correct business role, the issue could stem from several configuration areas. Here's how to troubleshoot:
* Check the business catalogues assigned to the role (A):Business catalogues group apps into logical sets. Ensure that the business role assigned to the user includes the catalogue containing the missing app.
* Check the restrictions for the role (B):Restrictions such as organizational assignments or field-level constraints might prevent the app from being visible. Verify that no such restrictions are applied to the role.
* Check the space and page(s) assigned to the role (C):Spaces and pages define the layout of the SAP Fiori Launchpad. Ensure that the app is assigned to the correct space and page within the role configuration.
* Check the Role Maintenance app (D):While the Role Maintenance app is useful for managing roles, it does not directly address visibility issues related to spaces, pages, or catalogues.
* Check the business role template (E):Business role templates serve as a starting point for creating roles but do not directly impact app visibility once the role is assigned.

질문 # 12
You are recording actions for a custom process step in a test automate. When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture text in a message screen that can be used for data binding later.
- B. To capture an error message on the screen that can be used later.
- C. To capture a static label on the screen that should be checked during test execution.
- D. To capture a value in a text field that should be stored as a variable.

정답：C,D

질문 # 13
Which of the following can you do with Automated Invoice Settlement (2LH)? Note: There are 2 correct answers to this question.

- A. Settle the created goods movements without receipt of an invoice.
- B. Schedule a job that will periodically settle invoices.
- C. Post the appropriate invoices yourself while using evaluated receipt settlement.
- D. Use the evaluated receipt settlement without the supplier's approval.

정답：B

설명：
Automated Invoice Settlement (2LH) in SAP S/4HANA Cloud Public Edition is designed to streamline invoice processing by automating settlement based on predefined conditions. Below is an explanation of the correct answers:
* Schedule a job that will periodically settle invoices (A):Automated Invoice Settlement allows users to schedule background jobs that automatically process and settle invoices at regular intervals. This ensures timely settlement of invoices without manual intervention.
* Use the evaluated receipt settlement without the supplier's approval (C):Evaluated Receipt Settlement (ERS) enables automatic invoice creation based on goods receipts. With this functionality, invoices can be settled without requiring explicit approval from the supplier, provided the terms are pre- agreed.
* Post the appropriate invoices yourself while using evaluated receipt settlement (B):While ERS automates invoice creation, it does not require manual posting of invoices. The system handles this automatically based on goods receipt data.
* Settle the created goods movements without receipt of an invoice (D):Goods movements cannot be settled without an invoice unless specific configurations like ERS are in place. However, this is not a feature of Automated Invoice Settlement (2LH).
