

# Valid 1Z0-1084-25 Exam Topics & Practice 1Z0-1084-25 Online

P.S. Free & New 1Z0-1084-25 dumps are available on Google Drive shared by Exam4Docs: <https://drive.google.com/open?id=1YcQIUSmOR3QT9lhKVZKnx-vZ45i-LVC7>

Firstly, we have free trials of the 1Z0-1084-25 exam study materials to help you know our products. Once you find it unsuitable for you, you can choose other types of the study materials. You will never be forced to purchase our 1Z0-1084-25 test answers. Just make your own decisions. We can satisfy all your demands and deal with all your problems. Our online test engine and windows software of the 1Z0-1084-25 Test Answers will let your experience the flexible learning style. Apart from basic knowledge, we have made use of the newest technology to enrich your study of the 1Z0-1084-25 exam study materials. Online learning platform is different from traditional learning methods. One of the great advantages is that you will

Before the clients buy our 1Z0-1084-25 guide prep they can have a free download and tryout. The client can visit the website pages of our product and understand our 1Z0-1084-25 study materials in detail. You can see the demo, the form of the software and part of our titles. To better understand our 1Z0-1084-25 Preparation questions, you can also look at the details and the guarantee. So it is convenient for you to have a good understanding of our 1Z0-1084-25 exam questions before you decide to buy our 1Z0-1084-25 training materials.

## Pass Guaranteed Quiz 1Z0-1084-25 - Oracle Cloud Infrastructure 2025 Developer Professional –Professional Valid Exam Topics

If you choose our 1Z0-1084-25 exam questions, then you can have a study on the latest information and technologies on the subject and you will definitely get a lot of benefits from it. Of course, the most effective point is that as long as you carefully study the 1Z0-1084-25 Study Guide for twenty to thirty hours, you can go to the exam. To really learn a skill, sometimes it does not take a lot of time. Come to buy our 1Z0-1084-25 practice materials and we teach you how to achieve your goals efficiently.

## Oracle Cloud Infrastructure 2025 Developer Professional Sample Questions (Q56-Q61):

### NEW QUESTION # 56

(CHK\_4>2) You have a scenario where a DevOps team wants to store secrets in Oracle Cloud Infrastructure (OCI) Vault so that it can inject the secrets into an app's environment variables (for example, MYSQL\_DB\_PASSWD) at deployment time. Which is NOT valid about managing secrets in the OCI Vault service?

- A. You can manually create new secrets as well as new secret versions using the OCI Console.
- B. A secret reuse rule prevents the use of secret contents across different versions of a secret.
- C. A unique OCID is automatically generated for each secret and remains unchanged even when creating a new secret version.
- D. New secret versions automatically expire in 90 days unless you configure an expiry rule.

### Answer: C

Explanation:

The correct answer is: "A unique OCID is automatically generated for each secret and remains unchanged even when creating a new secret version." The statement that is NOT valid about managing secrets in the OCI Vault service is: "A unique OCID is automatically generated for each secret and remains unchanged even when creating a new secret version." In OCI Vault, a secret is identified by its OCID (Oracle Cloud Identifier), which is a unique identifier for each resource in Oracle Cloud Infrastructure. However, when a new secret version is created for an existing secret, the OCID remains the same for the secret itself, but a new OCID is generated for the secret version. This allows you to track and manage different versions of a secret while maintaining a consistent OCID for the secret itself. The other statements mentioned are valid: You can manually create new secrets as well as new secret versions using the OCI Console. This means you have control over creating and managing secrets within the Vault service. A secret reuse rule prevents the use of secret contents across different versions of a secret. This ensures that each secret version maintains its own unique set of contents and avoids accidental reuse or sharing of secrets across versions. By default, new secret versions automatically expire in 90 days unless you configure an expiry rule. This helps enforce good security practices by automatically rotating secrets periodically, reducing the risk of unauthorized access in case of compromise. Therefore, the statement that is NOT valid is the one regarding the uniqueness and consistency of the OCID when creating new secret versions.

### NEW QUESTION # 57

Which one of the following is NOT a valid backend-type supported by Oracle Cloud Infrastructure (OCI) API Gateway?

- A. ORACLE\_STREAMS\_BACKEND
- B. HTTP\_BACKEND
- C. ORACLE\_FUNCTIONS\_BACKEND
- D. STOCK\_RESPONSE\_BACKEND

### Answer: A

Explanation:

Oracle Cloud Infrastructure (OCI) API Gateway supports various backend-types to handle incoming requests and route them to the appropriate backend service. However, "ORACLE\_STREAMS\_BACKEND" is not a valid backend-type in OCI API Gateway. "STOCK\_RESPONSE\_BACKEND" is a valid backend-type that allows you to configure static responses directly in the API Gateway without routing requests to any specific backend service. This can be useful for handling simple requests or returning predefined responses. "HTTP\_BACKEND" is another valid backend-type that enables routing requests to an HTTP backend service. "ORACLE\_FUNCTIONS\_BACKEND" is a valid backend-type that allows you to route requests to Oracle Functions, which are serverless functions that can be used to execute specific logic or operations. However, "ORACLE\_STREAMS\_BACKEND" is not a valid backend-type in OCI API Gateway. The API Gateway does not have native support for Oracle Streams as a backend service. Oracle Streams is a feature of Oracle Database that provides a publish-subscribe mechanism for data replication and distribution within an Oracle Database environment. It is not directly integrated as a backend service in OCI API Gateway.

### NEW QUESTION # 58

Which TWO statements are true for serverless computing and serverless architectures? (Choose two.)

- A. Application DevOps team is responsible for scaling.
- B. Long running tasks are perfectly suited for serverless.
- C. Serverless function execution is fully managed by third party.
- D. Applications running on a FaaS (Functions as a Service) platform
- E. Serverless function state should never be stored externally.

### Answer: C,D

Explanation:

The two true statements for serverless computing and serverless architectures are: Applications running on a FaaS (Functions as a Service) platform. Serverless architectures typically involve running code in the form of functions on a serverless platform. These functions are event-driven and executed in response to specific triggers or events. Serverless function execution is fully managed by a third party: In serverless computing, the cloud provider takes care of the infrastructure management and resource provisioning. The execution of serverless functions is handled automatically by the platform, relieving developers from the responsibility of managing servers or infrastructure. It's important to note that long running tasks are not typically suited for serverless architectures due to the event-driven nature of serverless functions. Also, while serverless functions may have state, it is recommended to avoid external

storage dependencies and instead leverage stateless functions whenever possible. Additionally, scaling in serverless architectures is typically handled automatically by the platform, rather than being the responsibility of the application DevOps team.

#### NEW QUESTION # 59

What is the maximum execution time of Oracle Functions?

- A. 120 seconds
- B. 60 seconds
- **C. 300 seconds**
- D. 240 seconds

**Answer: C**

Explanation:

The maximum execution time of Oracle Functions is 300 seconds, which is equivalent to 5 minutes. This means that a function running within Oracle Functions cannot exceed a runtime of 5 minutes. If a function requires longer execution times, alternative approaches such as invoking external services asynchronously or using long-running processes should be considered. It is important to design functions with this execution time limitation in mind to ensure optimal performance and efficiency within the Oracle Functions platform.

#### NEW QUESTION # 60

Which is ONE of the differences between a microservice and a serverless function?

- A. Microservices are triggered by events while serverless functions are not.
- B. Microservices are stateless while serverless functions are stateful.
- C. Microservices always use a data store while serverless functions never use a data store.
- **D. Microservices are used for long running operations while serverless functions are used for short running operations.**

**Answer: D**

Explanation:

The correct answer is: Microservices are used for long running operations while serverless functions are used for short running operations. One of the key differences between microservices and serverless functions is the duration of their execution.

Microservices are typically designed to handle long-running operations and may continuously run and process requests as part of a larger system. They are often deployed and managed as long-lived services. On the other hand, serverless functions are designed to handle short-lived operations or tasks that execute in response to specific events or triggers. They are event-driven and execute only when invoked, providing a lightweight and ephemeral computing model. Serverless functions are often used for executing small, isolated pieces of code without the need for managing infrastructure or scaling concerns. While both microservices and serverless functions can be stateless or stateful depending on the specific implementation, the key distinction lies in the typical duration and execution pattern of these components within an application architecture.

#### NEW QUESTION # 61

.....

Perhaps you have no choice and live unhappily now because you cannot change your current situation. Our 1Z0-1084-25 exam materials will remove your from the bad condition. Life needs to be colorful and meaningful. We must realize our own values and make progress. Do not worry. Our 1Z0-1084-25 Study Guide will help you regain confidence. we can claim that with our 1Z0-1084-25 practice engine for 20 to 30 hours, you will be quite confident to pass the exam.
